

Reasoning

Box Puzzle

Level-1

Q1 Directions: Study the following informations carefully and answer the questions given below.

Eight shelves are stacked one above another such that each shelf has a different shaped solid on it. The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. The diamond is kept immediately below the sphere. Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism.

How many shelves are above the cone?

- (A) Two
- (B) Three
- (C) Zero
- (D) More than three
- (E) One

Q2 Directions: Study the following informations carefully and answer the questions given below.

Eight shelves are stacked one above another such that each shelf has a different shaped solid on it. The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. The diamond is kept immediately below the sphere. Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism.

If all the solids are arranged in the dictionary order of their names from top to bottom, then which of the following solids will retain their original position in the stack?

- I. prism
- II. cone
- III. pyramid
- (A) Only III
- (B) Only I and II
- (C) Only II
- (D) Only I
- (E) Only II and III

Q3 Directions: Study the following informations carefully and answer the questions given below.

Eight shelves are stacked one above another such that each shelf has a different shaped solid on it. The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. The diamond is kept immediately below the sphere. Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism.

Which of the following is kept below the sixth shelf from the top?

- (A) cone
- (B) prism
- (C) cube
- (D) diamond
- (E) sphere

Q4 Directions: Study the following informations carefully and answer the questions given below.

Eight shelves are stacked one above another such that each shelf has a different shaped solid on it. The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. The diamond is kept immediately below the sphere. Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism.

Which of the following shape is kept just above the torus ?

- (A) Prism (B) Diamond
(C) Pyramid (D) Cone
(E) Sphere

Q5 Directions: Study the following informations carefully and answer the questions given below.

Eight shelves are stacked one above another such that each shelf has a different shaped solid on it. The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. The diamond is kept immediately below the sphere. Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism.

Which solid is kept immediately below the cylinder?

- (A) Diamond (B) Pyramid
(C) Torus (D) None
(E) Sphere

Q6 Read the information given below carefully and answer the questions accordingly.

Eight boxes i.e. B, U, I, E, Q, O, R, and W are placed one above the other but not necessarily

in the same order. Three boxes are placed between B and W. B is placed either at the topmost or bottommost position. Box I is placed just above box U. Box W is placed just above box R. There are two boxes placed between O and R. Not more than two boxes are placed between B and O. More than three boxes are placed between I and E.

Four of the following five are alike in a certain way and hence form a group. Find out the one that does not belong to that group.

- (A) B and Q (B) E and W
(C) O and R (D) U and I
(E) U and W

Q7 Read the information given below carefully and answer the questions accordingly.

Eight boxes i.e. B, U, I, E, Q, O, R, and W are placed one above the other but not necessarily in the same order. Three boxes are placed between B and W. B is placed either at the topmost or bottommost position. Box I is placed just above box U. Box W is placed just above box R. There are two boxes placed between O and R. Not more than two boxes are placed between B and O. More than three boxes are placed between I and E.

How many boxes are placed between I and R?

- (A) Five (B) Four
(C) Three (D) Two
(E) None

Q8 Read the information given below carefully and answer the questions accordingly.

Eight boxes i.e. B, U, I, E, Q, O, R, and W are placed one above the other but not necessarily in the same order. Three boxes are placed between B and W. B is placed either at the

topmost or bottommost position. Box I is placed just above box U. Box W is placed just above box R. There are two boxes placed between O and R. Not more than two boxes are placed between B and O. More than three boxes are placed between I and E.

The number of boxes placed above the box I is same as the number of boxes placed below the box?

- (A) U (B) Q
(C) E (D) W
(E) R

Q9 Read the information given below carefully and answer the questions accordingly.

Eight boxes i.e. B, U, I, E, Q, O, R, and W are placed one above the other but not necessarily in the same order. Three boxes are placed between B and W. B is placed either at the topmost or bottommost position. Box I is placed just above box U. Box W is placed just above box R. There are two boxes placed between O and R. Not more than two boxes are placed between B and O. More than three boxes are placed between I and E.

The number of boxes placed between E and R is same as the number of boxes placed between ___ and O?

- (A) Z
(B) I
(C) B
(D) W
(E) None of these

Q10 Read the information given below carefully and answer the questions accordingly.

Eight boxes i.e. B, U, I, E, Q, O, R, and W are placed one above the other but not necessarily

in the same order. Three boxes are placed between B and W. B is placed either at the topmost or bottommost position. Box I is placed just above box U. Box W is placed just above box R. There are two boxes placed between O and R. Not more than two boxes are placed between B and O. More than three boxes are placed between I and E.

Which of the following box is placed third from the top?

- (A) B (B) R
(C) O (D) E
(E) Q

Q11 Directions: Study the following information carefully and answer the question given below.

In a general store seven boxes of different names are kept. They are: A, B, C, D, E, F, and G. Each box has a number written on it from 1 to 7 but not essentially in the same order. The boxes are arranged in ascending order with the lowest number on the bottom. Box B is immediately above the box E. E is placed on an odd number. Two boxes are kept between B and D. Not more than one box is put down between D and A, in which D is placed above A. Two boxes are kept between E and C. The box G is placed immediately below box E but not immediately above the box F.

Which of the following condition is true?

- (A) C - 7th (B) F - 1st
(C) G - 6th (D) A - 3rd
(E) B - 6th

Q12 Directions: Study the following information carefully and answer the question given below.

In a general store seven boxes of different names are kept. They are: A, B, C, D, E, F, and G. Each box has a number written on it from 1 to 7 but not essentially in the same order. The boxes are arranged in ascending order with the lowest number on the Bottom. Box B is immediately

above the box E. E is place on an odd number. Two boxes are kept between B and D. Not more than one box is put down between D and A, in which D is placed above A. Two boxes are kept between E and C. The box G is placed immediately below box E but not immediately above the box F.

Which box is kept between box D and A?

- (A) G (B) C
(C) B (D) E
(E) None of these

Q13 **Directions:** Study the following information carefully and answer the question given below.

In a general store seven boxes of different names are kept. They are: A, B, C, D, E, F, and G. Each box has a number written on it from 1 to 7 but not essentially in the parallel order. The boxes are arranged in a pile in ascending order with the lowest number on the bottom.Box B is immediately above the box E. E is place on an odd number. Two boxes are kept between B and D. Not more than one box is put down between D and A, in which D is placed above A. Two boxes are kept between E and C. The box G is placed immediately below box E but not immediately above the box F

Box G is which number box?

- (A) 3rd (B) 6th
(C) 4th (D) 5th
(E) None of these

Q14 **Directions:** Study the following information carefully and answer the question given below.

In a general store seven boxes of different names are kept. They are: A, B, C, D, E, F, and G. Each box

has a number written on it from 1 to 7 but not essentially in the parallel order. The boxes are arranged in a pile in ascending order with the lowest number on the bottom.Box B is immediately above the box E. E is place on an odd number. Two boxes are kept between B and D. Not more than one box is put down between D and A, in which D is placed above A. Two boxes are kept between E and C. The box G is placed immediately below box E but not immediately above the box F

How many boxes are there between box B and C?

- (A) 2 (B) 5
(C) 4 (D) 3
(E) None of these

Q15 **Directions:** Study the following information carefully and answer the question given below.

In a general store seven boxes of different names are kept. They are: A, B, C, D, E, F, and G. Each box has a number written on it from 1 to 7 but not essentially in the parallel order. The boxes are arranged in a pile in ascending order with the lowest number on the bottom.Box B is immediately above the box E. E is place on an odd number. Two boxes are kept between B and D. Not more than one box is put down between D and A, in which D is placed above A. Two boxes are kept between E and C. The box G is placed immediately below box E but not immediately above the box F

Which box is at the bottom?

- (A) A (B) D
(C) F (D) E
(E) B

Hints & Solutions

Q1 Text Solution:

The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. So, we get two possible cases:

Shapes	Shapes
Case 1	Case 2
	Sphere
Torus	Torus
Cube	Cube
Sphere	

The diamond is kept immediately below the sphere. So, case 1 is ruled out here.

Shapes	Shapes
Case 1	Case 2
-	
-	Sphere
-	Diamond
Torus	Torus
Cube	Cube
-	
-	
Sphere	

Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism. Hence, the final arrangement is: -

Shapes
Cone
Sphere
Diamond

Torus
Cube
Pyramid
Prism
Cylinder

Q2 Text Solution:

The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. So, we get two possible cases:

Shapes	Shapes
Case 1	Case 2
	Sphere
Torus	Torus
Cube	Cube
Sphere	

The diamond is kept immediately below the sphere. So, case 1 is ruled out here.

Shapes	Shapes
Case 1	Case 2
-	
-	Sphere
-	Diamond
Torus	Torus
Cube	Cube
-	
-	
Sphere	

Two shelves are in between the diamond and the pyramid. The prism is kept immediately above

the cylinder. The cone is kept above the prism.
Hence, the final arrangement is: -

Shapes
Cone
Sphere
Diamond
Torus
Cube
Pyramid
Prism
Cylinder

The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. So, we get two possible cases:

Shapes	Shapes
Case 1	Case 2
	Sphere
Torus	Torus
Cube	Cube
Sphere	

The diamond is kept immediately below the sphere. So, case 1 is ruled out here.

Shapes	Shapes
Case 1	Case 2
-	
-	Sphere
-	Diamond
Torus	Torus
Cube	Cube
-	
-	

Sphere	
--------	--

Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism.
Hence, the final arrangement is: -

Shapes
Cone
Sphere
Diamond
Torus
Cube
Pyramid
Prism
Cylinder

Q3 Text Solution:

The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. So, we get two possible cases:

Shapes	Shapes
Case 1	Case 2
	Sphere
Torus	Torus
Cube	Cube
Sphere	

The diamond is kept immediately below the sphere. So, case 1 is ruled out here.

Shapes	Shapes
Case 1	Case 2
-	
-	Sphere
-	Diamond

Torus	Torus
Cube	Cube
-	
-	
Sphere	

Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism. Hence, the final arrangement is: -

Shapes
Cone
Sphere
Diamond
Torus
Cube
Pyramid
Prism
Cylinder

The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. So, we get two possible cases:

Shapes	Shapes
Case 1	Case 2
	Sphere
Torus	Torus
Cube	Cube
Sphere	

The diamond is kept immediately below the sphere. So, case 1 is ruled out here.

Shapes	Shapes
--------	--------

Case 1	Case 2
-	
-	Sphere
-	Diamond
Torus	Torus
Cube	Cube
-	
-	
Sphere	

Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism. Hence, the final arrangement is: -

Shapes
Cone
Sphere
Diamond
Torus
Cube
Pyramid
Prism
Cylinder

Q4 Text Solution:

The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. So, we get two possible cases:

Shapes	Shapes
Case 1	Case 2
	Sphere
Torus	Torus
Cube	Cube
Sphere	

The diamond is kept immediately below the sphere. So, case 1 is ruled out here.

Shapes	Shapes
Case 1	Case 2
-	
-	Sphere
-	Diamond
Torus	Torus
Cube	Cube
-	
-	
Sphere	

Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism. Hence, the final arrangement is: -

Shapes
Cone
Sphere
Diamond
Torus
Cube
Pyramid
Prism
Cylinder

The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. So, we get two possible cases:

Shapes	Shapes
Case 1	Case 2
	Sphere
Torus	Torus

Cube	Cube
Sphere	

The diamond is kept immediately below the sphere. So, case 1 is ruled out here.

Shapes	Shapes
Case 1	Case 2
-	
-	Sphere
-	Diamond
Torus	Torus
Cube	Cube
-	
-	
Sphere	

Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism. Hence, the final arrangement is: -

Shapes
Cone
Sphere
Diamond
Torus
Cube
Pyramid
Prism
Cylinder

Q5 Text Solution:

The torus is kept immediately above the cube. As many shelves are above the cube as many are below the torus. Two shelves are in between the cube and the sphere. So, we get two possible cases:

Shapes	Shapes
Case 1	Case 2

	Sphere
Torus	Torus
Cube	Cube
Sphere	

The diamond is kept immediately below the sphere. So, case 1 is ruled out here.

Shapes	Shapes
Case 1	Case 2
-	
-	Sphere
-	Diamond
Torus	Torus
Cube	Cube
-	
-	
Sphere	

Two shelves are in between the diamond and the pyramid. The prism is kept immediately above the cylinder. The cone is kept above the prism. Hence, the final arrangement is: -

Shapes
Cone
Sphere
Diamond
Torus
Cube
Pyramid
Prism
Cylinder

Q6 Text Solution:

Three boxes are placed between B and W. B is placed either at the topmost or bottommost position. So, we get two possible cases: -

Case 1	Case 2
B	W
W	B

Box W is placed just above box R. There are two boxes placed between O and R. Not more than two boxes are placed between B and O. Thus, case 2 is cancelled here.

Case 1	Case 2
B	⊖
	-
O	W
	R
W	-
R	-
	B

Box I is placed just above box U. More than three boxes are placed between I and E. We know, Q is one of the boxes, hence the final arrangement is:

Boxes
B
E
O
Q
W
R
I
U

Q7 Text Solution:

Three boxes are placed between B and W. B is placed either at the topmost or bottommost position. So, we get two possible cases: -

Case 1	Case 2
B	W

W	B

Box W is placed just above box R. There are two boxes placed between O and R. Not more than two boxes are placed between B and O. Thus, case 2 is cancelled here.

Case 1	Case 2
B	⊖
	-
O	W
	R
W	-
R	-
	B

Box I is placed just above box U. More than three boxes are placed between I and E. We know, Q is one of the boxes, hence the final arrangement is:

Boxes
B
E
O
Q
W
R
I
U

Q8 Text Solution:

Three boxes are placed between B and W. B is placed either at the topmost or bottommost position. So, we get two possible cases: -

Case 1	Case 2
B	W
W	B

Box W is placed just above box R. There are two boxes placed between O and R. Not more than two boxes are placed between B and O. Thus, case 2 is cancelled here.

Case 1	Case 2
B	⊖
	-
O	W
	R
W	-
R	-
	B

Box I is placed just above box U. More than three boxes are placed between I and E. We know, Q is one of the boxes, hence the final arrangement is:

Boxes
B
E
O
Q
W
R
I
U

Q9 Text Solution:

Three boxes are placed between B and W. B is placed either at the topmost or bottommost position. So, we get two possible cases: -

Case 1	Case 2
B	W
W	B

Box W is placed just above box R. There are two boxes placed between O and R. Not more than

two boxes are placed between B and O. Thus, case 2 is cancelled here.

Case 1	Case 2
B	Θ
	-
O	W
	R
W	-
R	-
	B

Box I is placed just above box U. More than three boxes are placed between I and E. We know, Q is one of the boxes, hence the final arrangement is:

Boxes
B
E
O
Q
W
R
I
U

Q10 Text Solution:

Three boxes are placed between B and W. B is placed either at the topmost or bottommost position. So, we get two possible cases: -

Case 1	Case 2
B	W
W	B

Box W is placed just above box R. There are two boxes placed between O and R. Not more than two boxes are placed between B and O. Thus, case 2 is cancelled here.

Case 1	Case 2
--------	--------

B	Θ
	-
O	W
	R
W	-
R	-
	B

Box I is placed just above box U. More than three boxes are placed between I and E. We know, Q is one of the boxes, hence the final arrangement is:

Boxes
B
E
O
Q
W
R
I
U

Q11 Text Solution:

- 1) Box B is immediately above the box E
 - 2) E is placed on an odd number
 - 3) The box G is placed immediately below box E but not immediately above the box F.
 - 4) Two boxes are kept between B and D.
- Here Three cases arise CASE I , CASE II and CASE III

Box	CASE I (eliminated)	CASE II	CASE III
7		D/	
6			B
5			E
4		B	G
3		E	D
2	B	G	

1	E	D/	
---	---	----	--

CASE I is eliminated

5) Two boxes are kept between E and C

6) Not more than one box is put down between D and A, in which D is placed above A.

Box	CASE III	CASE II (Eliminated)
7	F	D
6	B	C
5	E	A
4	G	B
3	D	E
2	C	G
1	A	F

Case II is eliminated because it is not allowing condition number 3 in which The box G is placed immediately below box E but not immediately above the box F.

So case III is final arrangement

Box Number	
7	F
6	B
5	E
4	G
3	D
2	C
1	A

Q12 Text Solution:

1) Box B is immediately above the box E

2) E is placed on an odd number

3) The box G is placed immediately below box E but not immediately above the box F.

4) Two boxes are kept between B and D.

Here three cases arise: CASE I, CASE II and CASE III

Box	CASE I (eliminated)	CASE II	CASE III
7		D/	
6			B
5			E
4		B	G
3		E	D
2	B	G	
1	E	D/	

CASE I is eliminated

5) Two boxes are kept between E and C

6) Not more than one box is put down between D and A, in which D is placed above A.

Box	CASE III	CASE II (Eliminated)
7	F	D
6	B	C
5	E	A
4	G	B
3	D	E
2	C	G
1	A	F

Case II is eliminated because it is not allowing condition number 3 in which The box G is placed immediately below box E but not immediately above the box F.

So case III is final arrangement

Box Number	
7	F
6	B
5	E
4	G
3	D
2	C
1	A

So, Box C is kept between box D and Box A.

Hence, the correct option is (B).

Q13 Text Solution:

- 1) Box B is immediately above the box E
 - 2) E is placed on an odd number
 - 3) The box G is placed immediately below box E but not immediately above the box F.
 - 4) Two boxes are kept between B and D.
- Here Three cases arise CASE I , CASE II and CASE III

Box	CASE I (eliminated)	CASE II	CASE III
7		D/	
6			B
5			E
4		B	G
3		E	D
2	B	G	
1	E	D/	

CASE I is eliminated

- 5) Two boxes are kept between E and C
- 6) Not more than one box is put down between D and A, in which D is placed above A.

Box	CASE III	CASE II (Eliminated)
7	F	D
6	B	C
5	E	A
4	G	B
3	D	E
2	C	G
1	A	F

Case II is eliminated because it is not allowing condition number 3 in which The box G is placed immediately below box E but not immediately above the box F.

So case III is final arrangement

Box Number	
------------	--

7	F
6	B
5	E
4	G
3	D
2	C
1	A

So, box G is 4th number box.

Hence, the correct option is (C).

Q14 Text Solution:

- 1) Box B is immediately above the box E
 - 2) E is placed on an odd number
 - 3) The box G is placed immediately below box E but not immediately above the box F.
 - 4) Two boxes are kept between B and D.
- Here Three cases arise CASE I , CASE II and CASE III

Box	CASE I (eliminated)	CASE II	CASE III
7		D/	
6			B
5			E
4		B	G
3		E	D
2	B	G	
1	E	D/	

CASE I is eliminated

- 5) Two boxes are kept between E and C
- 6) Not more than one box is put down between D and A, in which D is placed above A.

Box	CASE III	CASE II (Eliminated)
7	F	D
6	B	C
5	E	A
4	G	B
3	D	E

2	C	G
1	A	F

Case II is eliminated because it is not allowing condition number 3 in which The box G is placed immediately below box E but not immediately above the box F.

So case III is final arrangement

Box Number	
7	F
6	B
5	E
4	G
3	D
2	C
1	A

So, 3 boxes are there between box B and C
Hence, the correct option is (D).

Q15 Text Solution:

- 1)Box B is immediately above the box E
 - 2)E is place on an odd number
 - 3)The box G is placed immediately below box E but not immediately above the box F.
 - 4)Two boxes are kept between B and D.
- Here Three cases arises CASE I , CASE II and CASE III

Box	CASE I(eliminated)	CASE II	CASE III
7		D/	
6			B
5			E
4		B	G

3		E	D
2	B	G	
1	E	D/	

CASE I is eliminated

5)Two boxes are kept between E and C

6)Not more than one box is put down between D and A, in which D is placed above A.

Box	CASE III	CASE II(Eliminated)
7	F	D
6	B	C
5	E	A
4	G	B
3	D	E
2	C	G
1	A	F

Case II is eliminated because it is not allowing condition number 3 in which The box G is placed immediately below box E but not immediately above the box F.

So case III is final arrangement

Box Number	
7	F
6	B
5	E
4	G
3	D
2	C
1	A

So, box A is at the bottom

Hence, the correct option is (A).
