

Reasoning

Circular Arrangements

Level-1

Q1 Directions: Read the information carefully and answer the questions given below.

At a reunion party, eight friends named P, Q, R, S, T, U, V and W sit together on a round table facing the center. Interestingly, all eight friends are pursuing bachelor's degrees in different subjects namely Mathematics, English, Business studies, Polity, Physics, Chemistry, Mythology and Hindi. They are not necessarily seated in the mentioned order. R sits adjacent to S who is studying Business studies. Q is studying Polity and does not sit adjacent to R or S. U is sitting fifth to the left of P and is studying Physics. One who is studying Chemistry sits immediate left to U. V sits opposite to P. Neither W nor T is immediate neighbor of V. One who is studying Hindi sits fifth to the left of V, who is learning Mythology. T is studying English and sits next to the one who is studying Hindi.

What does the person study who is sitting third to the left of R?

- (A) Mathematics (B) Physics
(C) Mythology (D) Polity
(E) Hindi

Q2 Directions: Read the information carefully and answer the questions given below.

At a reunion party, eight friends named P, Q, R, S, T, U, V and W sit together on a round table facing the center. Interestingly, all eight friends are pursuing bachelor's degrees in different subjects namely Mathematics, English, Business studies, Polity, Physics, Chemistry, Mythology and Hindi. They are not necessarily seated in the mentioned

order. R sits adjacent to S who is studying Business studies. Q is studying Polity and does not sit adjacent to R or S. U is sitting fifth to the left of P and is studying Physics. One who is studying Chemistry sits immediate left to U. V sits opposite to P. Neither W nor T is immediate neighbor of V. One who is studying Hindi sits fifth to the left of V, who is learning Mythology. T is studying English and sits next to the one who is studying Hindi.

Which subject is P studying?

- (A) Mythology (B) English
(C) Chemistry (D) Polity
(E) Mathematics

Q3 Directions: Read the information carefully and answer the questions given below.

At a reunion party, eight friends named P, Q, R, S, T, U, V and W sit together on a round table facing the center. Interestingly, all eight friends are pursuing bachelor's degrees in different subjects namely Mathematics, English, Business studies, Polity, Physics, Chemistry, Mythology and Hindi. They are not necessarily seated in the mentioned order. R sits adjacent to S who is studying Business studies. Q is studying Polity and does not sit adjacent to R or S. U is sitting fifth to the left of P and is studying Physics. One who is studying Chemistry sits immediate left to U. V sits opposite to P. Neither W nor T is immediate neighbor of V. One who is studying Hindi sits fifth to the left of V, who is learning Mythology. T is studying English and sits next to the one who is studying Hindi.

Who is diagonally opposite to Q?

- (A) S (B) P
(C) W (D) U
(E) T

Q4 Directions: Read the information carefully and answer the questions given below.

At a reunion party, eight friends named P, Q, R, S, T, U, V and W sit together on a round table facing the center. Interestingly, all eight friends are pursuing bachelor's degrees in different subjects namely Mathematics, English, Business studies, Polity, Physics, Chemistry, Mythology and Hindi. They are not necessarily seated in the mentioned order. R sits adjacent to S who is studying Business studies. Q is studying Polity and does not sit adjacent to R or S. U is sitting fifth to the left of P and is studying Physics. One who is studying Chemistry sits immediate left to U. V sits opposite to P. Neither W nor T is immediate neighbor of V. One who is studying Hindi sits fifth to the left of V, who is learning Mythology. T is studying English and sits next to the one who is studying Hindi.

Who is studying Chemistry?

- (A) P (B) Q
(C) U (D) R
(E) None of these

Q5 Directions: Read the information carefully and answer the questions given below.

At a reunion party, eight friends named P, Q, R, S, T, U, V and W sit together on a round table facing the center. Interestingly, all eight friends are pursuing bachelor's degrees in different subjects namely Mathematics, English, Business studies, Polity, Physics, Chemistry, Mythology and Hindi. They are not necessarily seated in the mentioned order. R sits adjacent to S who is studying Business studies. Q is studying Polity and does not sit adjacent to R or S. U is sitting fifth to the

left of P and is studying Physics. One who is studying Chemistry sits immediate left to U. V sits opposite to P. Neither W nor T is immediate neighbor of V. One who is studying Hindi sits fifth to the left of V, who is learning Mythology. T is studying English and sits next to the one who is studying Hindi.

Who sits between P and T?

- (A) S (B) W
(C) R (D) Q
(E) None of these

Q6 Study the following information carefully and answer the questions given below:

Seven persons i.e. Z, Y, X, W, V, U and T of different ages i.e. 6, 15, 19, 23, 30, 45, 60 years are sitting in a circular table facing towards the center. Note- No two consecutive letters are in alphabetical order. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. X sits immediate to the right of the person whose age is 15. One person sits between V and X. One person sits between Z and the person whose age is 6. Age of V is twice the age of the person who sits 2nd to the right of V. Difference between the age of the immediate neighbors of T is more than 14. Age of U must not be multiple of 10. Sum of the ages of immediate neighbors of X is 34. Y is younger than Z.

What is the age of Z?

- (A) 15 (B) 60
(C) 23 (D) 6
(E) 19

Q7 Study the following information carefully and answer the questions given below:

Seven persons i.e. Z, Y, X, W, V, U and T of different ages i.e. 6, 15, 19, 23, 30, 45, 60 years are sitting in a circular table facing towards the

center. Note- No two consecutive letters are in alphabetical order. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. X sits immediate to the right of the person whose age is 15. One person sits between V and X . One person sits between Z and the person whose age is 6 . Age of V is twice the age of the person who sits 2nd to the right of V. Difference between the age of the immediate neighbors of T is more than 14. Age of U must not be multiple of 10. Sum of the ages of immediate neighbors of X is 34. Y is younger than Z.

What is the position of W with respect to X?

- (A) Immediate left
- (B) 4th to the right
- (C) 2nd to the left
- (D) Immediate left
- (E) None of these

Q8 Study the following information carefully and answer the questions given below:

Seven persons i.e. Z, Y, X, W, V, U and T of different ages i.e. 6, 15, 19, 23, 30, 45, 60 years are sitting in a circular table facing towards the center. Note- No two consecutive letters are in alphabetical order. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. X sits immediate to the right of the person whose age is 15. One person sits between V and X . One person sits between Z and the person whose age is 6 . Age of V is twice the age of the person who sits 2nd to the right of V. Difference between the age of the immediate neighbors of T is more than 14. Age of U must not be multiple of 10. Sum of the ages of immediate neighbors of X is 34. Y is younger than Z.

Which of the following is true?

- (A) W's age is 60 years
- (B) X is younger than Y

- (C) U sits immediate right of Z
- (D) T's age is 19
- (E) None of these

Q9 Study the following information carefully and answer the questions given below:

Seven persons i.e. Z, Y, X, W, V, U and T of different ages i.e. 6, 15, 19, 23, 30, 45, 60 years are sitting in a circular table facing towards the center. Note- No two consecutive letters are in alphabetical order. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. X sits immediate to the right of the person whose age is 15. One person sits between V and X . One person sits between Z and the person whose age is 6 . Age of V is twice the age of the person who sits 2nd to the right of V. Difference between the age of the immediate neighbors of T is more than 14. Age of U must not be multiple of 10. Sum of the ages of immediate neighbors of X is 34. Y is younger than Z.

Who among the following is the youngest person?

- (A) Z
- (B) V
- (C) T
- (D) Y
- (E) None of these

Q10 Study the following information carefully and answer the questions given below:

Seven persons i.e. Z, Y, X, W, V, U and T of different ages i.e. 6, 15, 19, 23, 30, 45, 60 years are sitting in a circular table facing towards the center. Note- No two consecutive letters are in alphabetical order. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. X sits immediate to the right of the person whose age is 15. One person sits between V and X . One person sits between Z and the person whose age is 6 . Age of V is twice the age of the person who sits 2nd

to the right of V. Difference between the age of the immediate neighbors of T is more than 14. Age of U must not be multiple of 10. Sum of the ages of immediate neighbors of X is 34. Y is younger than Z.

Who among the following sits 2nd to the left of the person whose age is 6 years?

- (A) Z (B) X
(C) W (D) T
(E) None of these

Q11 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing inside the circle. G and A are immediate neighbors of each other. There are three people sitting between A and F. C sits second to the left of F. The number of people sitting between G and C is the same number of people sitting between C and E. B sits second to the right of D, who does not sit near to F.

Four of the following five are alike in a certain way and so form a group. Which one does not belong to that group?

- (A) E-H (B) A-D
(C) B-F (D) G-A
(E) H-F

Q12 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing inside the circle. G and A are immediate neighbors of each other. There are three people sitting between A and F. C sits second to the left of F. The number of people sitting between G and C is the same number of people sitting between C and E. B sits second to the right of D, who does not sit near to F.

How many people are sitting between B and E?

- (A) One (B) Three
(C) Two (D) Four
(E) None of these

Q13 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing inside the circle. G and A are immediate neighbors of each other. There are three people sitting between A and F. C sits second to the left of F. The number of people sitting between G and C is the same number of people sitting between C and E. B sits second to the right of D, who does not sit near to F.

How many persons sit between D and H when counted from right of D ?

- (A) Four (B) Five
(C) Three (D) Two
(E) None of these

Q14 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing inside the circle. G and A are immediate neighbors of each other. There are three people sitting between A and F. C sits second to the left of F. The number of people sitting between G and C is the same number of people sitting between C and E. B sits second to the right of D, who does not sit near to F.

What is the position of B with respect to C?

- (A) Second right
(B) Third left
(C) Second left
(D) Fourth right
(E) Immediate right

Q15 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a circular table with equal distance

between each other but not necessarily in the same order. All are facing inside the circle. G and A are immediate neighbors of each other. There are three people sitting between A and F. C sits second to the left of F. The number of people sitting between G and C is the same number of people sitting between C and E. B sits second to the right of D, who does not sit near to F.

What is the position of H with respect to B?

- (A) Immediate left (B) Second left
(C) Third right (D) Third left
(E) None of these

Q16 Directions: Study the following data carefully and answer the questions accordingly.

Eight people P, Q, R, S, T, U, V and W are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing inside the circle. V sits third to the left of W. There is only one person sitting between V and Q. R sits third to the right of Q. S and R sit adjacent to each other. S does not sit opposite to V. P is the immediate neighbor of T. There are two people sitting between P and U.

As many people sitting between R and T as many between W and _ ?

- (A) V (B) S
(C) Q (D) P
(E) U

Q17 Directions: Study the following data carefully and answer the questions accordingly.

Eight people P, Q, R, S, T, U, V and W are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing inside the circle. V sits third to the left of W. There is only one person sitting between V and Q. R sits third to the right of Q. S and R sit adjacent to each other. S does not sit opposite to V. P is the immediate neighbor of T. There are two people sitting between P and U.

How many people sit between U and P ?

- (A) One
(B) Two
(C) Four
(D) Five
(E) Either Two or Four

Q18 Directions: Study the following data carefully and answer the questions accordingly.

Eight people P, Q, R, S, T, U, V and W are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing inside the circle. V sits third to the left of W. There is only one person sitting between V and Q. R sits third to the right of Q. S and R sit adjacent to each other. S does not sit opposite to V. P is the immediate neighbor of T. There are two people sitting between P and U.

If U related to T, Q related to P in the same way S related to ?

- (A) V (B) P
(C) Q (D) R
(E) None of these

Q19 Directions: Study the following data carefully and answer the questions accordingly.

Eight people P, Q, R, S, T, U, V and W are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing inside the circle. V sits third to the left of W. There is only one person sitting between V and Q. R sits third to the right of Q. S and R sit adjacent to each other. S does not sit opposite to V. P is the immediate neighbor of T. There are two people sitting between P and U.

Who among the following sits opposite to V ?

- (A) P (B) R
(C) S (D) U
(E) W

Q20 Directions: Study the following data carefully and answer the questions accordingly.

Eight people Z, Y, X, W, V, U, T and S are sitting around a circular table with equal distance

between each other but not necessarily in the same order. All are facing outside the circle. W sits three places away from the T. X sits second to the left of W. There are two people sitting between X and Z. Z sits opposite to U. There are two people sitting between Y and V. Both V and Y does not sit near to X.

How many people are sitting between W and T?

- (A) One (B) Three
(C) None (D) Four
(E) Five

Q21 Directions: Study the following data carefully and answer the questions accordingly.

Eight people Z, Y, X, W, V, U, T and S are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing outside the circle. W sits three places away from the T. X sits second to the left of W. There are two people sitting between X and Z. Z sits opposite to U. There are two people sitting between Y and V. Both V and Y does not sit near to X.

If V sits opposite to T, then who sits third to the left of U ?

- (A) Y (B) W
(C) U (D) X
(E) S

Q22 Directions: Study the following data carefully and answer the questions accordingly.

Eight people Z, Y, X, W, V, U, T and S are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing outside the circle. W sits three places away from the T. X sits second to the left of W. There are two people sitting between X and Z. Z sits opposite to U. There are two people sitting between Y and V. Both V and Y does not sit near to X.

What is the position of V with respect to S?

- (A) Immediate left
(B) Third left
(C) Second right
(D) Either (A) or (C) option
(E) None of these

Q23 Directions: Study the following data carefully and answer the questions accordingly.

Eight people Z, Y, X, W, V, U, T and S are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing outside the circle. W sits three places away from the T. X sits second to the left of W. There are two people sitting between X and Z. Z sits opposite to U. There are two people sitting between Y and V. Both V and Y does not sit near to X.

Which of the following statements is true?

- (A) V sits just right of Z
(B) Two people sit between X and W
(C) S sits opposite to X
(D) Y sits second to the right of U
(E) None of these

Q24 Directions: Study the following data carefully and answer the questions accordingly.

Eight people Z, Y, X, W, V, U, T and S are sitting around a circular table with equal distance between each other but not necessarily in the same order. All are facing outside the circle. W sits three places away from the T. X sits second to the left of W. There are two people sitting between X and Z. Z sits opposite to U. There are two people sitting between Y and V. Both V and Y does not sit near to X.

Who sits third to the right of Z ?

- (A) W (B) V
(C) Y (D) X
(E) S

Hints & Solutions

Q1 Text Solution:

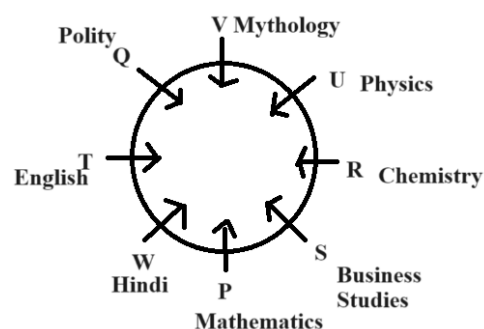

1. U is sitting fifth to the left of P and is studying Physics.
2. V sits opposite to P.
3. One who is studying Chemistry sits immediate left to U.
4. One who is studying Hindi sits fifth to the left of V, who is learning Mythology.
5. T is studying English and sits next to the one who is studying Hindi.
6. R sits adjacent to S who is studying Business studies.
7. Q is studying Polity and does not sit adjacent to R or S.
8. Neither W nor T is immediate neighbor of V.

Thus, V is sitting third to the left of R and studies Mythology. Hence, the correct option is (C).

Q2 Text Solution:

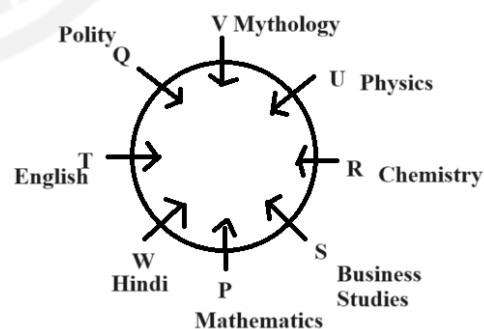

1. U is sitting fifth to the left of P and is studying Physics.
2. V sits opposite to P.
3. One who is studying Chemistry sits immediate left to U.
4. One who is studying Hindi sits fifth to the left of V, who is learning Mythology.
5. T is studying English and sits next to the one who is studying Hindi.
6. R sits adjacent to S who is studying Business studies.
7. Q is studying Polity and does not sit adjacent to R or S.
8. Neither W nor T is immediate neighbor of V.

Thus, P is studying Mathematics.
Hence, the correct option is (E).

Q3 Text Solution:

1. U is sitting fifth to the left of P and is studying Physics.
2. V sits opposite to P.
3. One who is studying Chemistry sits immediate left to U.
4. One who is studying Hindi sits fifth to the left of V, who is learning Mythology.
5. T is studying English and sits next to the one who is studying Hindi.
6. R sits adjacent to S who is studying Business studies.
7. Q is studying Polity and does not sit adjacent to R or S.
8. Neither W nor T is immediate neighbor of V.

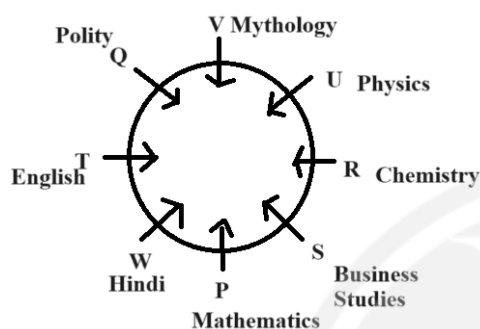

Thus, S is sitting diagonally opposite to Q.
Hence, the correct option is A

Q4 Text Solution:

1. U is sitting fifth to the left of P and is studying Physics.
2. V sits opposite to P.

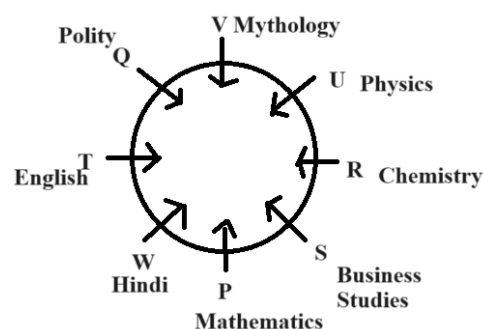

- One who is studying Chemistry sits immediate left to U.
- One who is studying Hindi sits fifth to the left of V, who is learning Mythology.
- T is studying English and sits next to the one who is studying Hindi.
- R sits adjacent to S who is studying Business studies.
- Q is studying Polity and does not sit adjacent to R or S.
- Neither W nor T is immediate neighbor of V.

Thus, R is studying Chemistry. Hence, the correct option is (D).

Q5 Text Solution:

- U is sitting fifth to the left of P and is studying Physics.
- V sits opposite to P.
- One who is studying Chemistry sits immediate left to U.
- One who is studying Hindi sits fifth to the left of V, who is learning Mythology.
- T is studying English and sits next to the one who is studying Hindi.
- R sits adjacent to S who is studying Business studies.
- Q is studying Polity and does not sit adjacent to R or S.
- Neither W nor T is immediate neighbor of V.

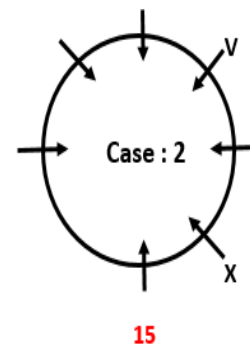

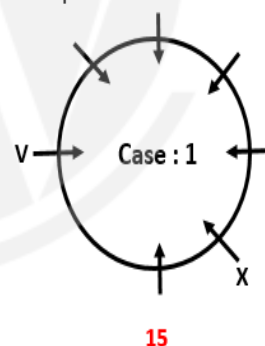

Thus, W sits between P and T. Hence, the correct option is (B).

Q6 Text Solution:

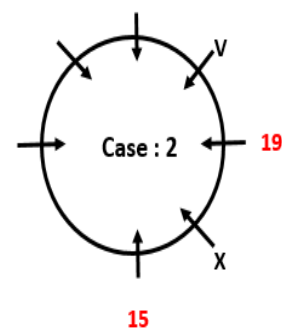

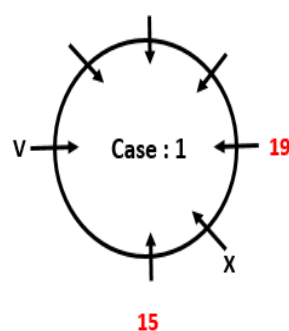

X sits immediate to the right of the person whose age is 15.

One person sits between V and X.

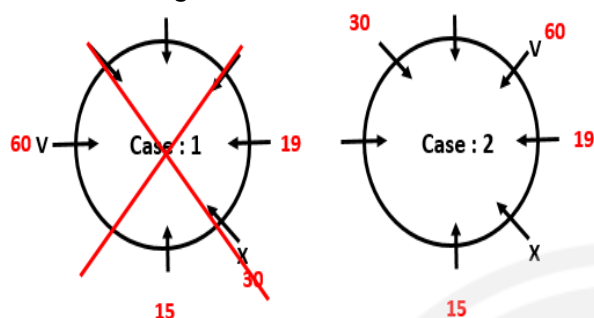

Sum of the ages of immediate neighbors of X is 34.

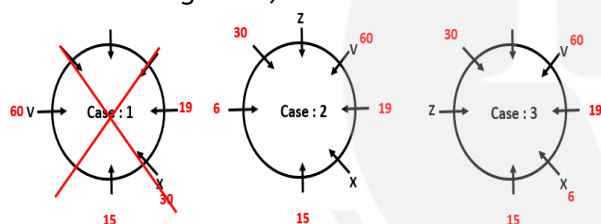

Age of V is twice the age of the person who sits 2nd to the right of V.

(Remaining ages are 6, 23, 30, 45 and 60, so use 30 and 60. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors.)

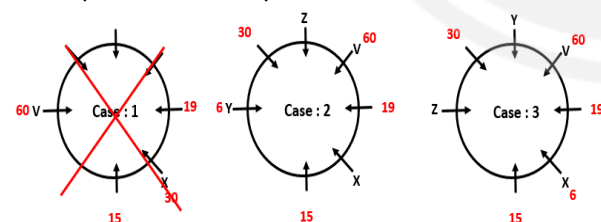

Case 1 is eliminated because 15 is the factor or a multiple of the sum of the ages of their immediate neighbors.

One person sits between Z and the person whose age is 6. (Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors.)

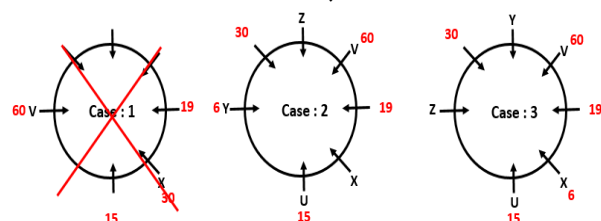

No two consecutive letters are in alphabetical order. (Now Y is fixed.)

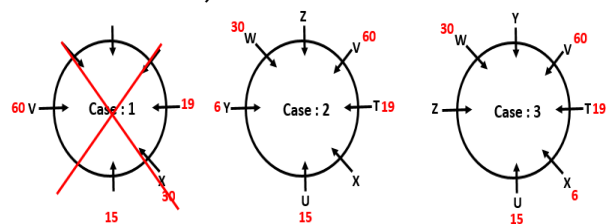

Age of U must not be multiple of 10.

(No two consecutive letters are in alphabetical order. U is not sit near to V)

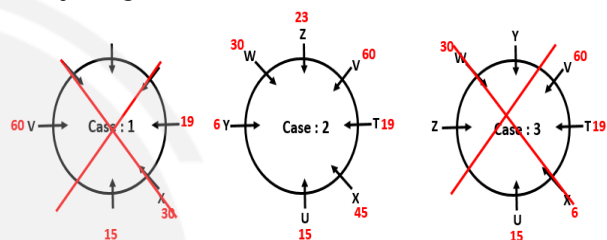

Fixed remaining person uses of No two consecutive letters are in alphabetical order. (W is not sit near to X)

Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. 45 is not fixed in case 3 so it is eliminated.

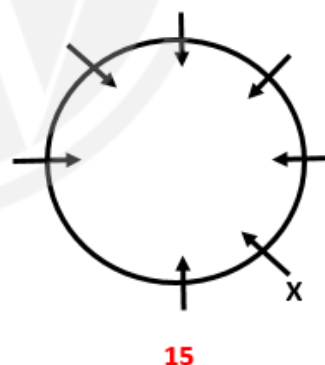

Difference between the age of the immediate neighbors of T is more than 14.

Y is younger than Z.

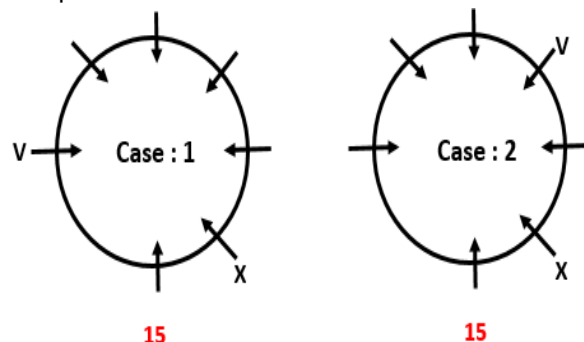

Q7 Text Solution:

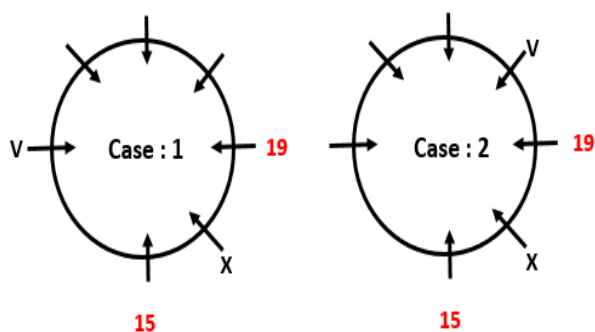

X sits immediate to the right of the person whose age is 15.

One person sits between V and X.

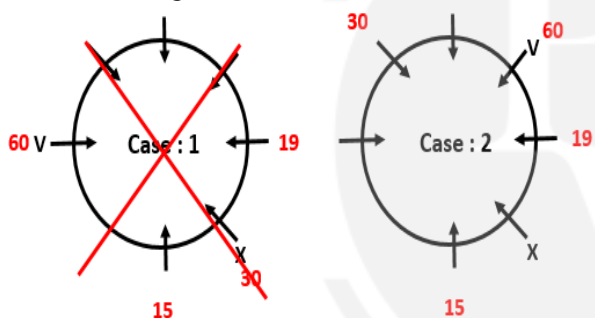

Sum of the ages of immediate neighbors of X is 34.

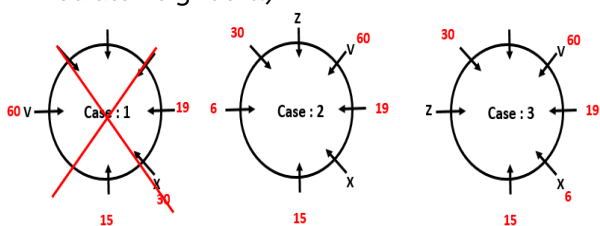

Age of V is twice the age of the person who sits 2nd to the right of V.

(Remaining ages are 6, 23, 30, 45 and 60, so use 30 and 60. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors.)

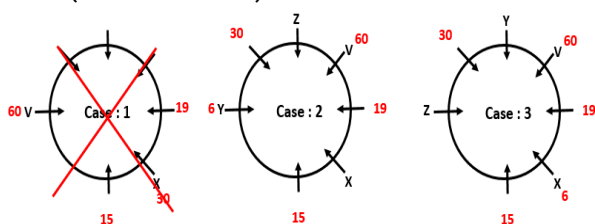

Case 1 is eliminated because 15 is the factor or a multiple of the sum of the ages of their immediate neighbors.

One person sits between Z and the person whose age is 6. (Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors.)

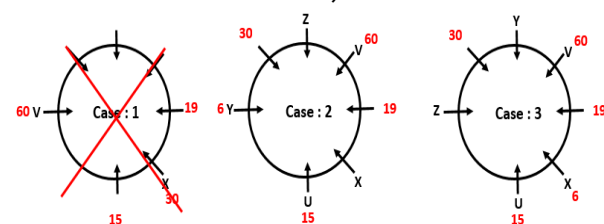

No two consecutive letters are in alphabetical order. (Now Y is fixed.)

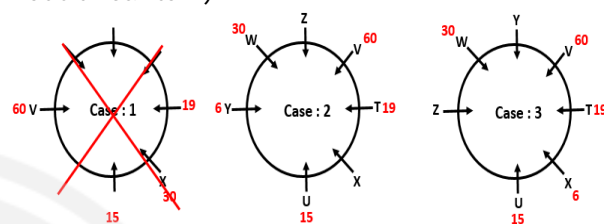

Age of U must not be multiple of 10.

(No two consecutive letters are in alphabetical order. U is not sit near to V)

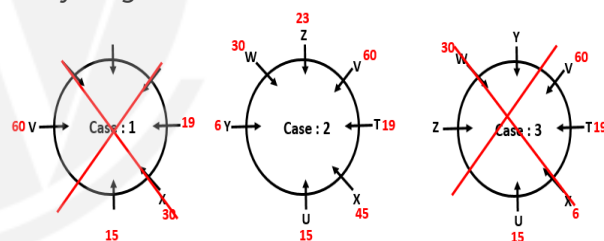

Fixed remaining person uses of No two consecutive letters are in alphabetical order. (W is not sit near to X)

Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. 45 is not fixed in case 3 so it is eliminated.

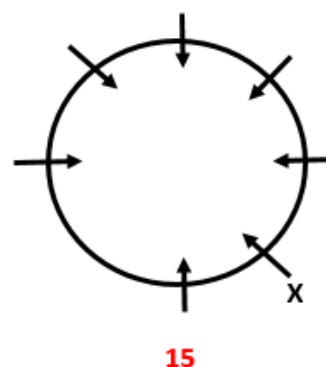

Difference between the age of the immediate neighbors of T is more than 14.

Y is younger than Z.

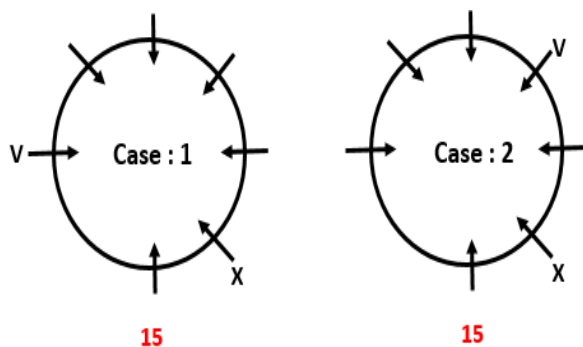

Q8 Text Solution:

X sits immediate to the right of the person whose age is 15.

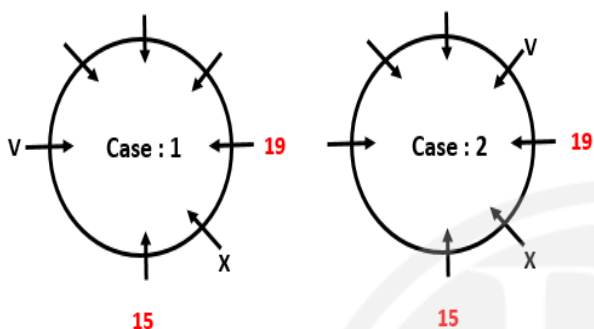

One person sits between V and X.

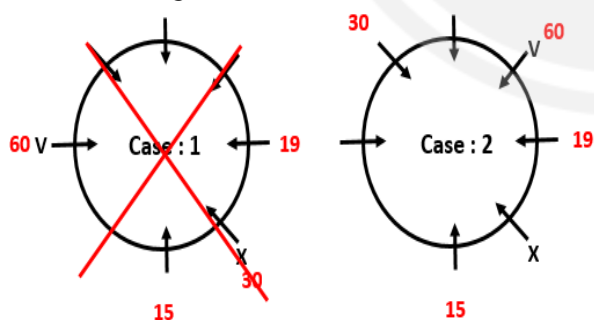

Sum of the ages of immediate neighbors of X is 34.

Age of V is twice the age of the person who sits 2nd to the right of V.

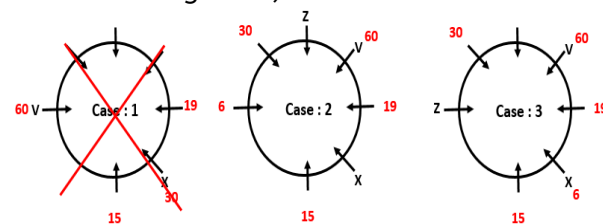

(Remaining ages are 6, 23, 30, 45 and 60, so use 30 and 60. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors.)

Case 1 is eliminated because 15 is the factor or a multiple of the sum of the ages of their immediate neighbors.

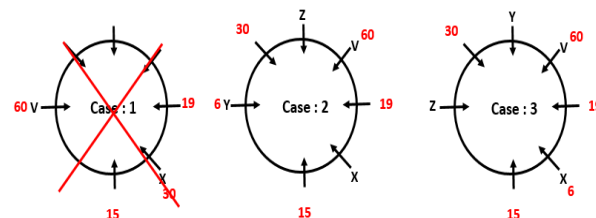

One person sits between Z and the person whose age is 6. (Person's age must not be a factor or a multiple of the sum of the ages of their

immediate neighbors.)

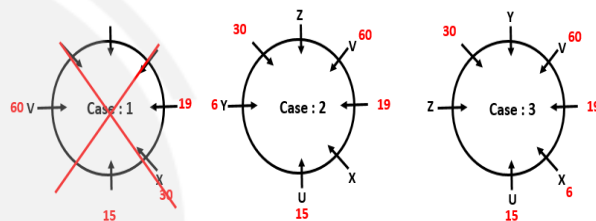

No two consecutive letters are in alphabetical order. (Now Y is fixed.)

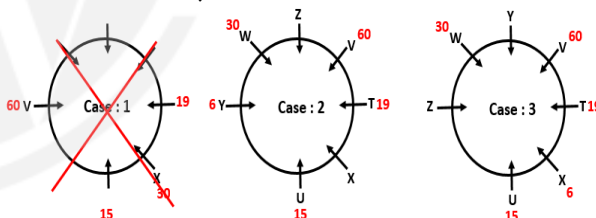

Age of U must not be multiple of 10.

(No two consecutive letters are in alphabetical order. U is not sit near to V)

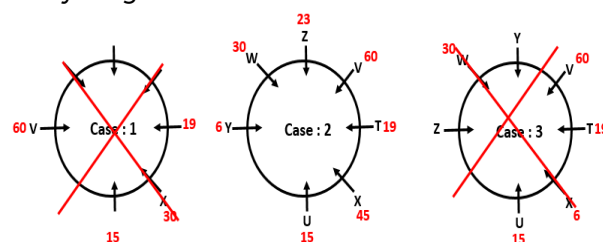

Fixed remaining person uses of No two consecutive letters are in alphabetical order. (W is not sit near to X)

Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. 45 is not fixed in case 3 so it is eliminated.

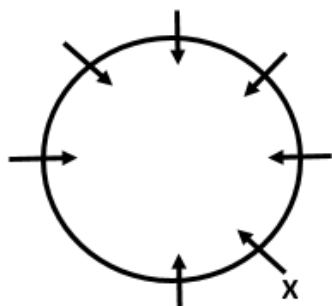

Difference between the age of the immediate neighbors of T is more than 14.

Y is younger than Z.

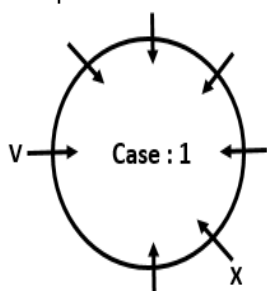

Q9 Text Solution:

X sits immediate to the right of the person whose age is 15.

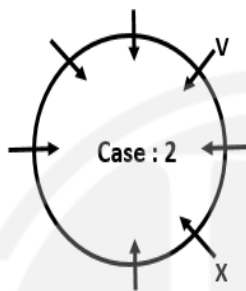

15

One person sits between V and X.

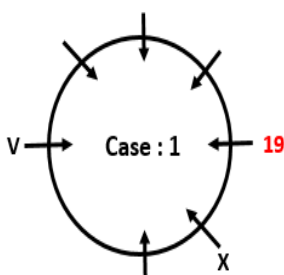

15

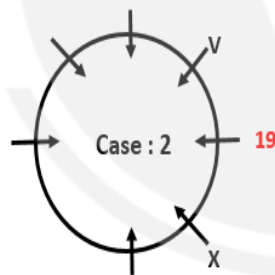

15

Sum of the ages of immediate neighbors of X is 34.

15

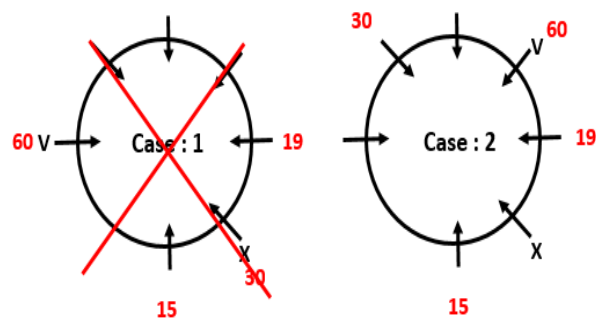

15

Age of V is twice the age of the person who sits 2nd to the right of V.

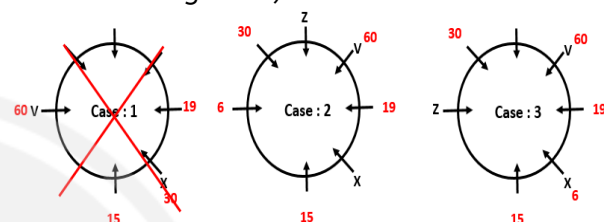

(Remaining ages are 6, 23, 30, 45 and 60, so use 30 and 60. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors.)

Case 1 is eliminated because 15 is the factor or a multiple of the sum of the ages of their

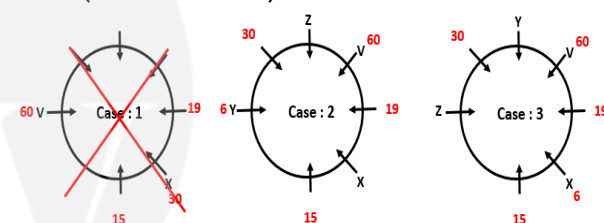

immediate neighbors.

One person sits between Z and the person whose age is 6. (Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors.)

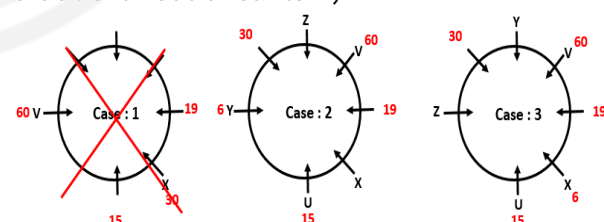

No two consecutive letters are in alphabetical order. (Now Y is fixed.)

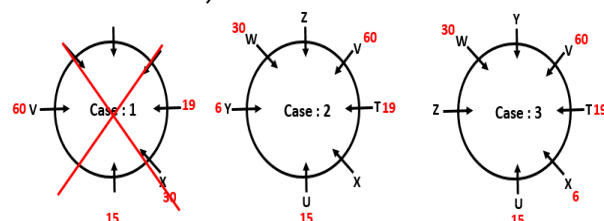

Age of U must not be multiple of 10.

(No two consecutive letters are in alphabetical order. U is not sit near to V)

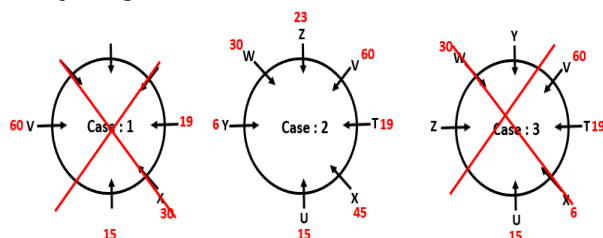

Fixed remaining person uses of No two consecutive letters are in alphabetical order. (W is not sit near to X)

Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. 45 is not fixed in case 3 so it is eliminated.

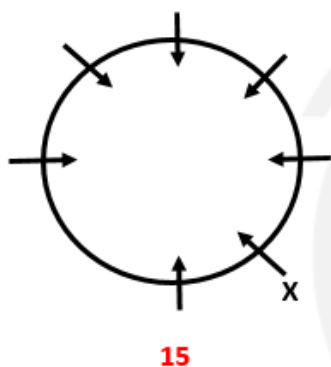

Difference between the age of the immediate neighbors of T is more than 14.

Y is younger than Z.

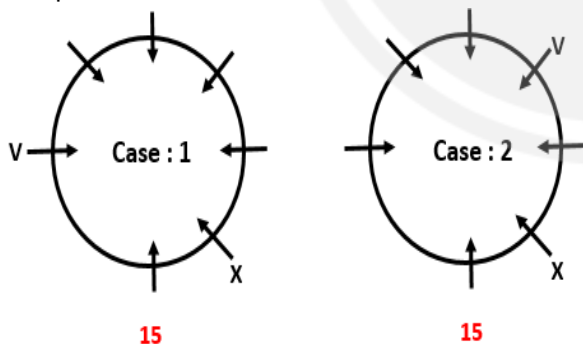

Q10 Text Solution:

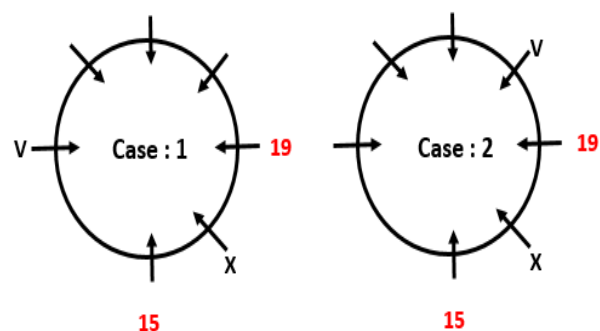

X sits immediate to the right of the person whose age is 15.

One person sits between V and X.

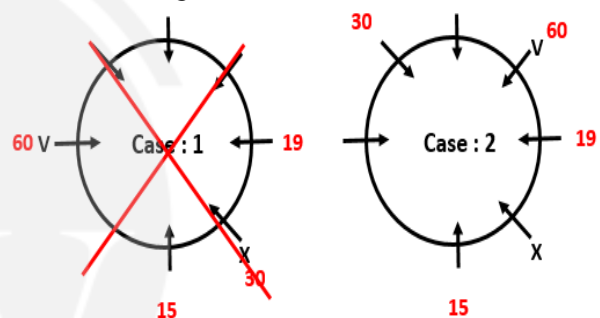

Sum of the ages of immediate neighbors of X is 34.

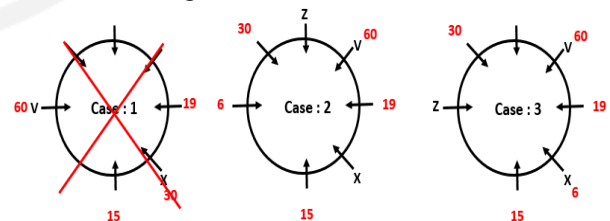

Age of V is twice the age of the person who sits 2nd to the right of V.

(Remaining ages are 6, 23, 30, 45 and 60, so use 30 and 60. Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors.)

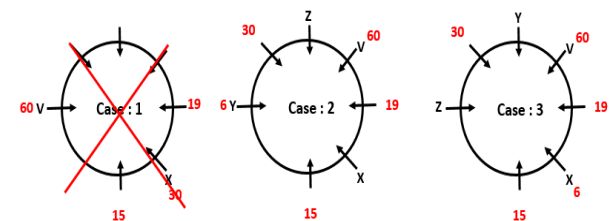

Case 1 is eliminated because 15 is the factor or a multiple of the sum of the ages of their immediate neighbors.

One person sits between Z and the person whose age is 6. (Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors.)

No two consecutive letters are in alphabetical order. (Now Y is fixed.)

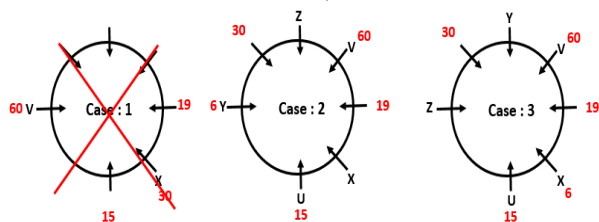

Age of U must not be multiple of 10.

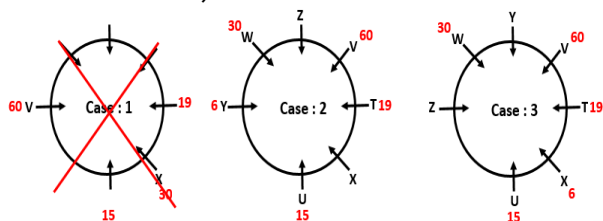

(No two consecutive letters are in alphabetical

order. U is not sit near to V)

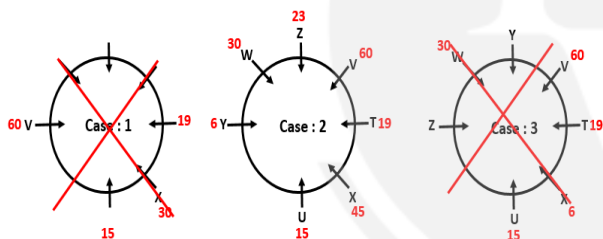

Fixed remaining person uses of No two consecutive letters are in alphabetical order.(W is not sit near to X)

Person's age must not be a factor or a multiple of the sum of the ages of their immediate neighbors. 45 is not fixed in case 3 so it is eliminated.

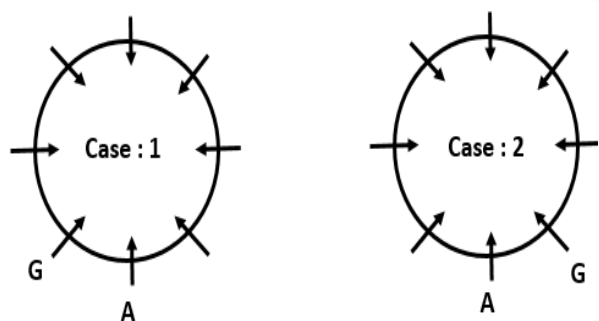

Difference between the age of the immediate neighbors of T is more than 14.

Y is younger than Z.

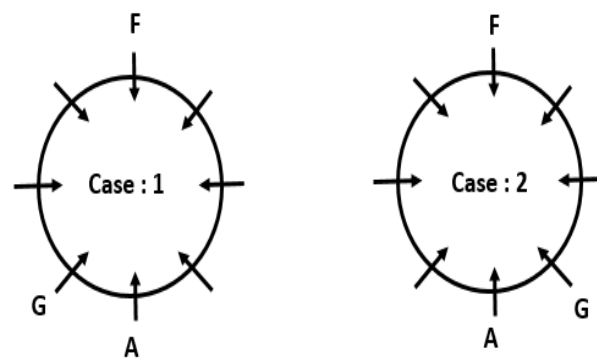

Q11 Text Solution:

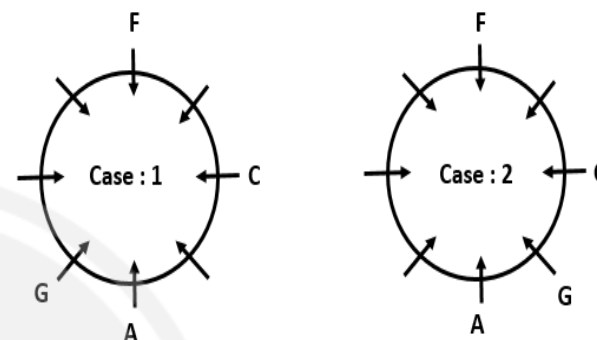

G and A are immediate neighbors of each other.

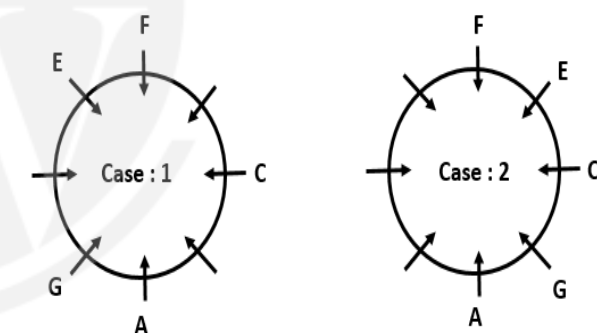

There are three people sitting between A and F.

C sits second to the left of F.

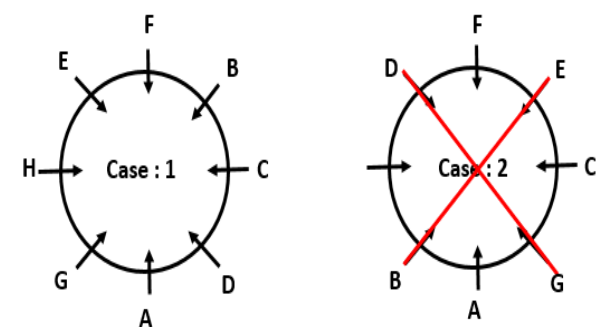

The number of people sitting between G and C is the same number of people sitting between C and E.

B sits second to the right of D, who does not sit near to F.

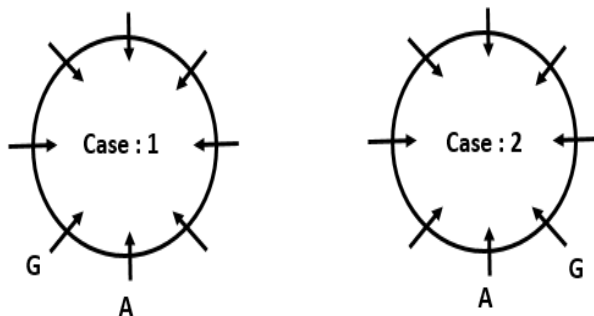

Case 2: is eliminated.

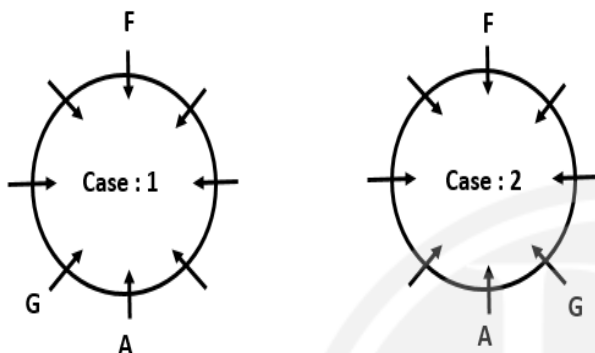

Q12 Text Solution:

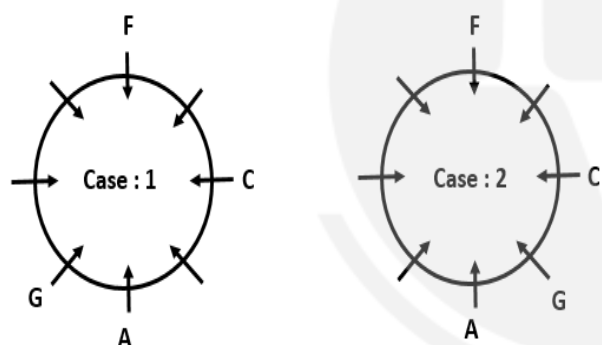

G and A are immediate neighbors of each other.

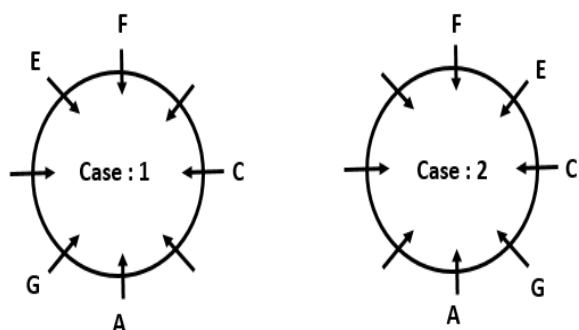

There are three people sitting between A and F.

C sits second to the left of F.

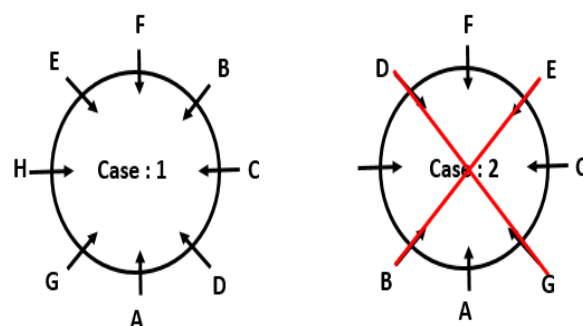

The number of people sitting between G and C is the same number of people sitting between C and E.

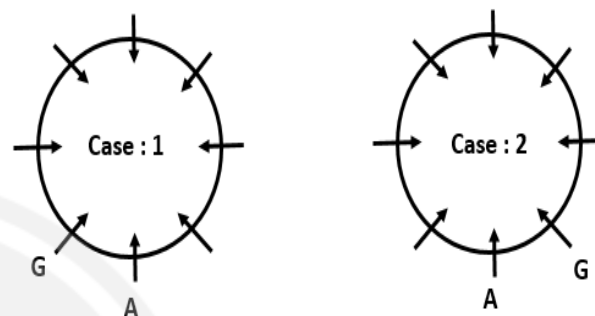

B sits second to the right of D, who does not sit near to F.

Case 2: is eliminated.

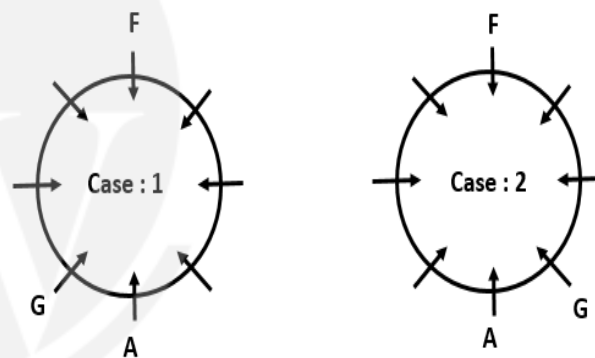

Q13 Text Solution:

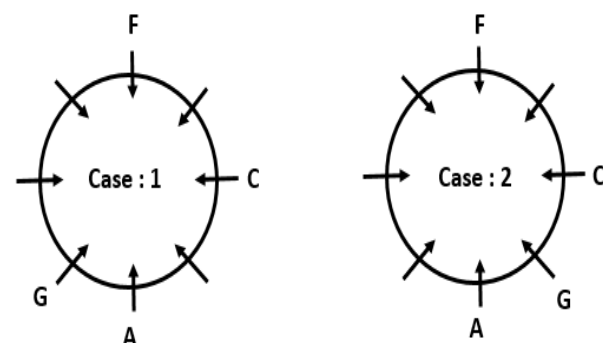

G and A are immediate neighbors of each other.

There are three people sitting between A and F.

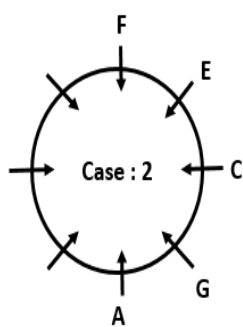

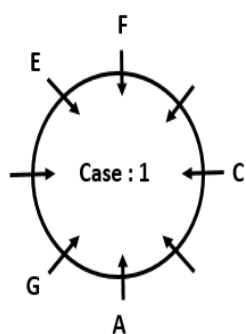

C sits second to the left of F.

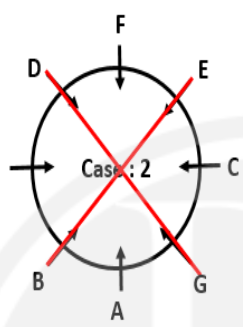

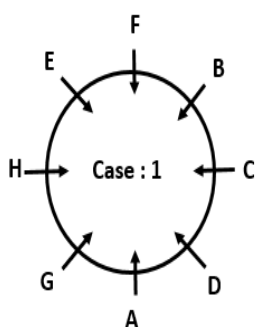

The number of people sitting between G and C is the same number of people sitting between C and E.

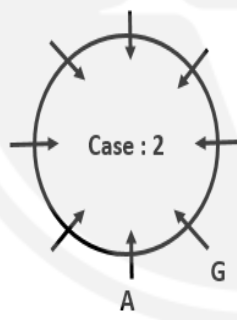

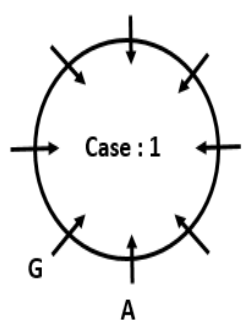

B sits second to the right of D, who does not sit near to F.

Case 2: is eliminated.

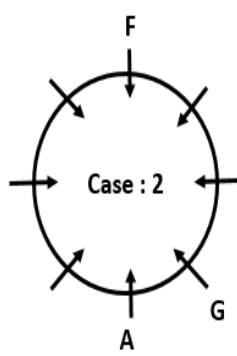

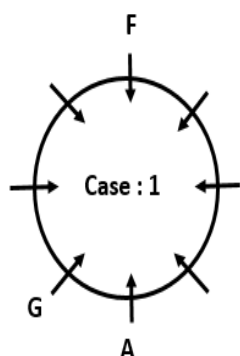

Q14 Text Solution:

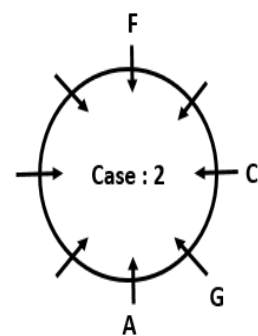

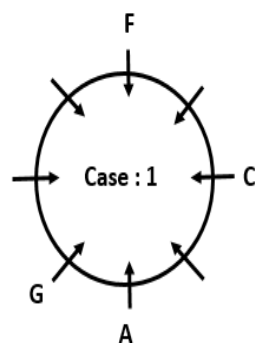

G and A are immediate neighbors of each other.

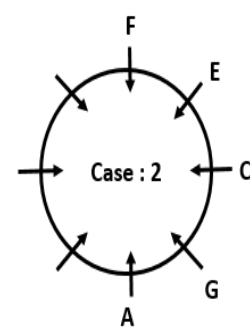

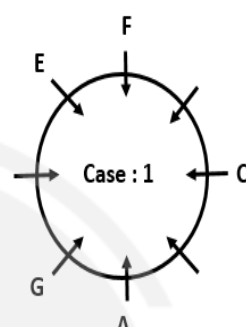

There are three people sitting between A and F.

C sits second to the left of F.

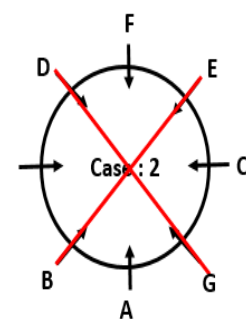

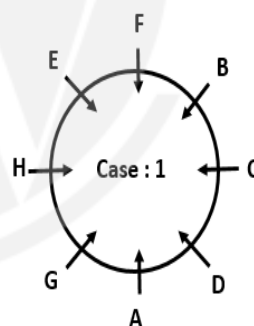

The number of people sitting between G and C is the same number of people sitting between C and E.

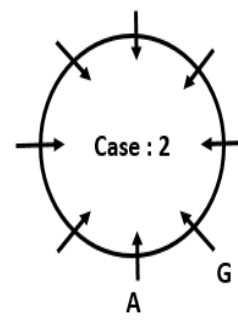

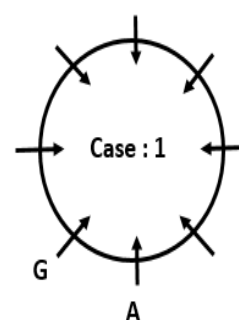

B sits second to the right of D, who does not sit near to F.

Case 2: is eliminated.

There is only one person sitting between V and Q.

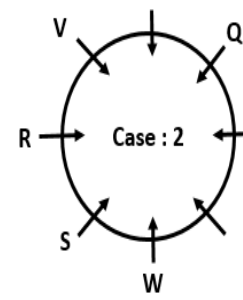

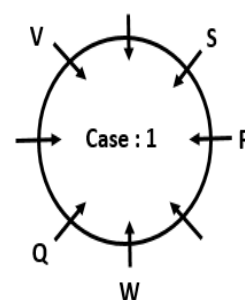

R sits third to the right of Q.

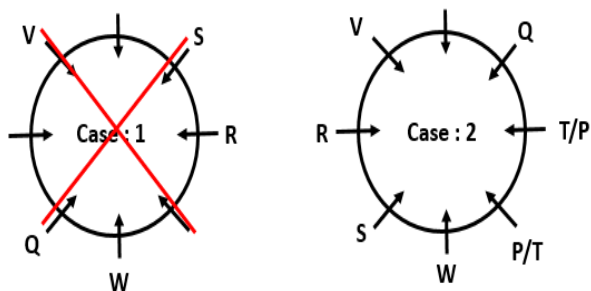

S and R sit adjacent to each other.

S does not sit opposite to V.

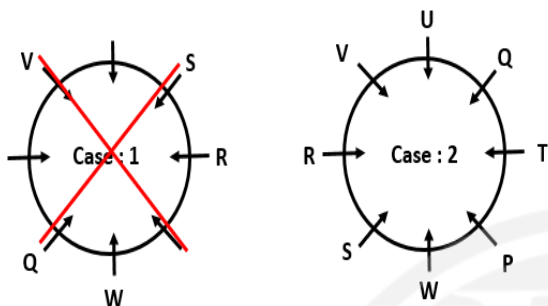

P is the immediate neighbor of T.

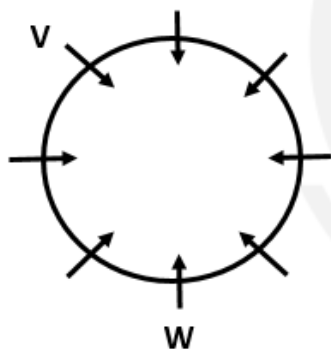

There are two people sitting between P and U.

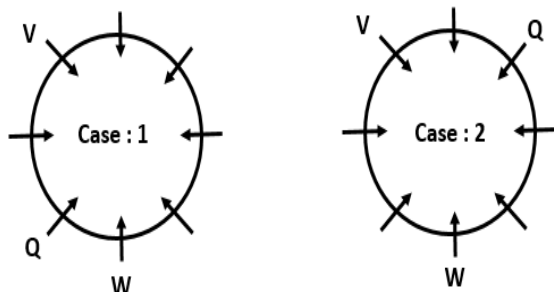

Q17 Text Solution:

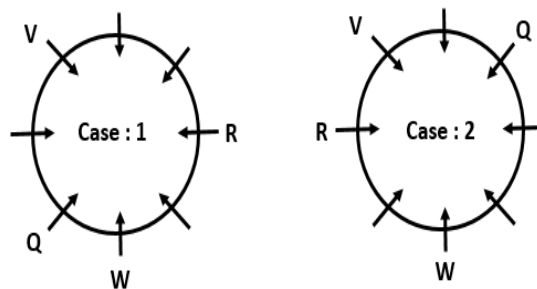

V sits third to the left of W.

There is only one person sitting between V and Q.

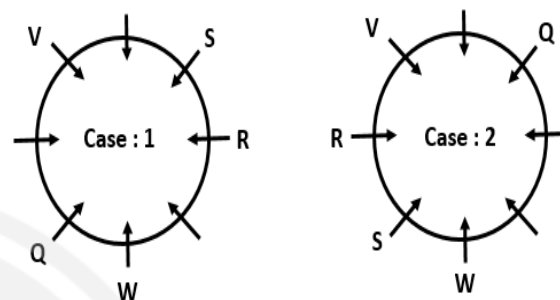

R sits third to the right of Q.

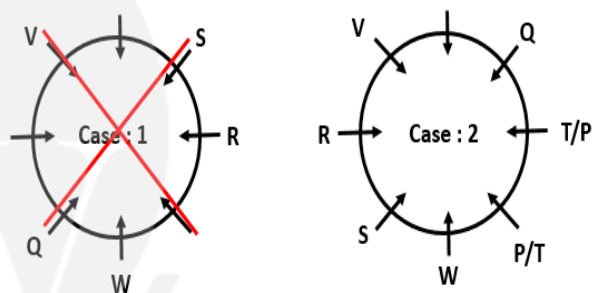

S and R sit adjacent to each other.

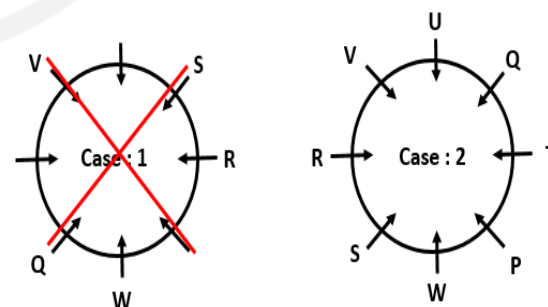

S does not sit opposite to V.

P is the immediate neighbor of T.

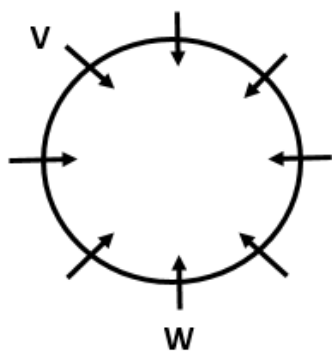

There are two people sitting between P and U.

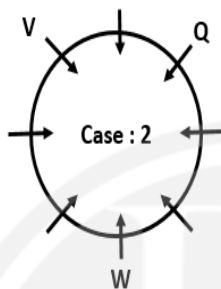

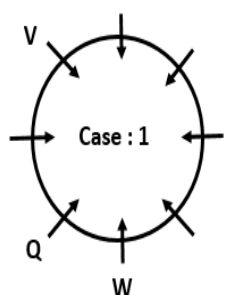

Q18 Text Solution:

V sits third to the left of W.

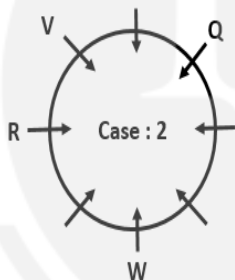

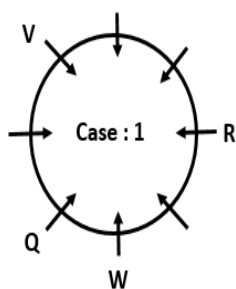

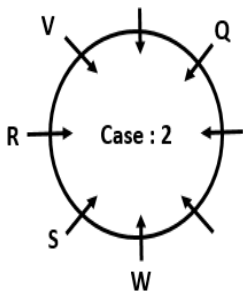

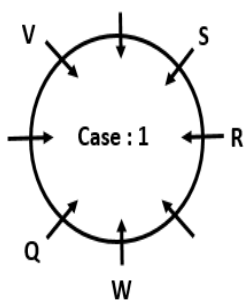

There is only one person sitting between V and Q.

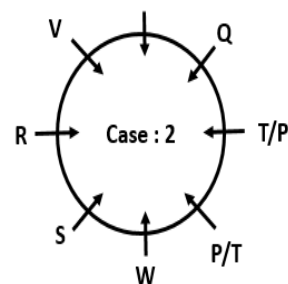

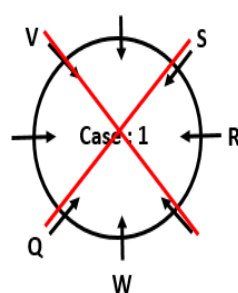

R sits third to the right of Q.

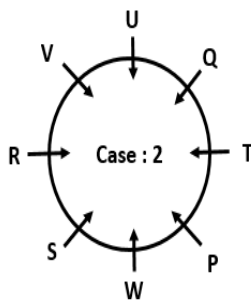

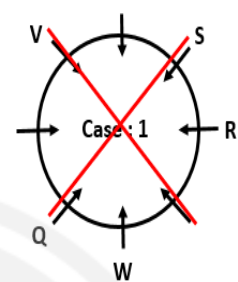

S and R sit adjacent to each other.
S does not sit opposite to V.

P is the immediate neighbor of T.

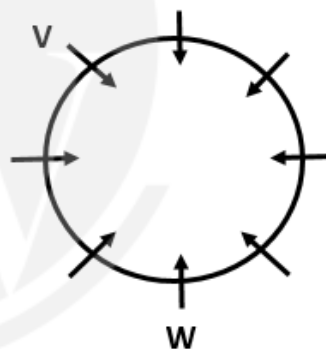

There are two people sitting between P and U.

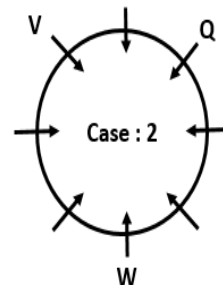

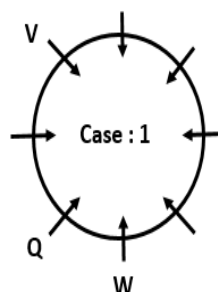

Q19 Text Solution:

V sits third to the left of W.

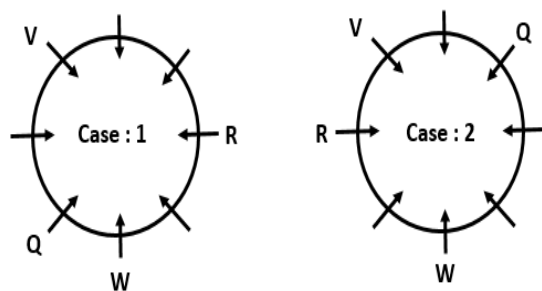

There is only one person sitting between V and Q.

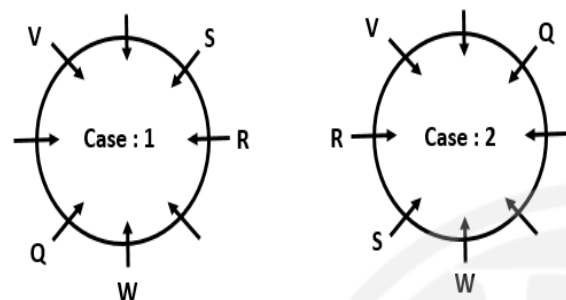

R sits third to the right of Q.

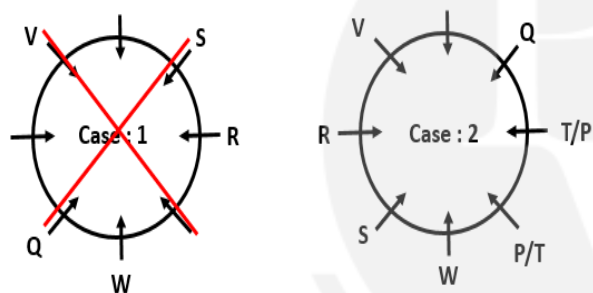

S and R sit adjacent to each other.

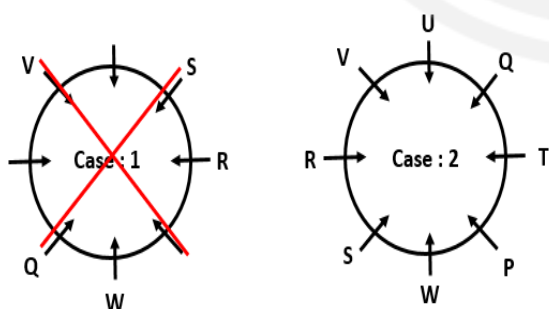

S does not sit opposite to V.

P is the immediate neighbor of T.

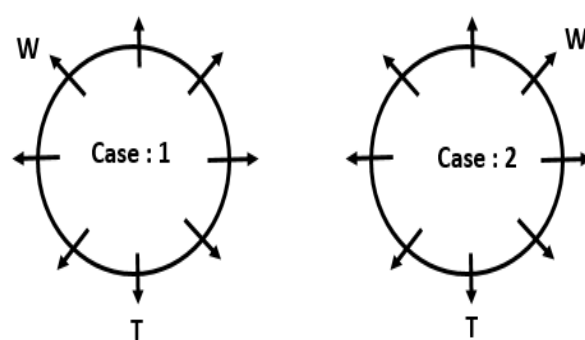

There are two people sitting between P and U.

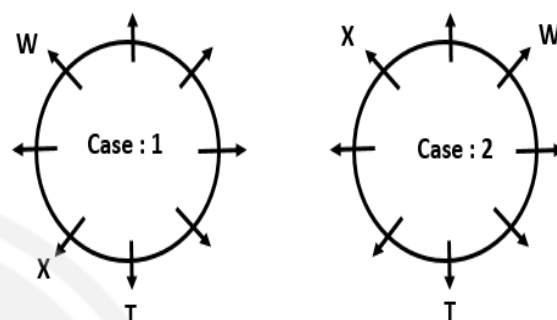

Q20 Text Solution:

W sits three places away from the T.

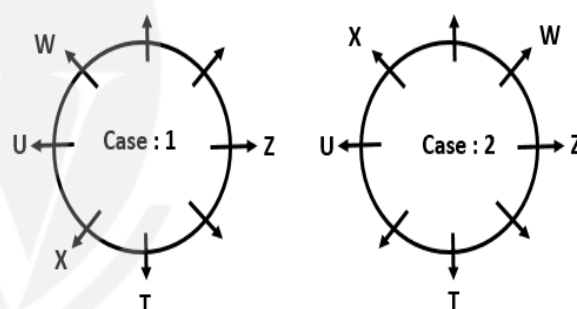

X sits second to the left of W.

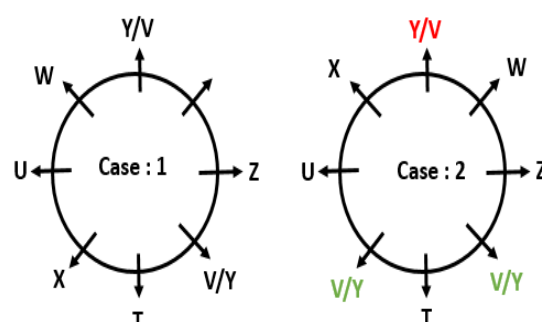

There are two people sitting between X and Z.

Z sits opposite to U.

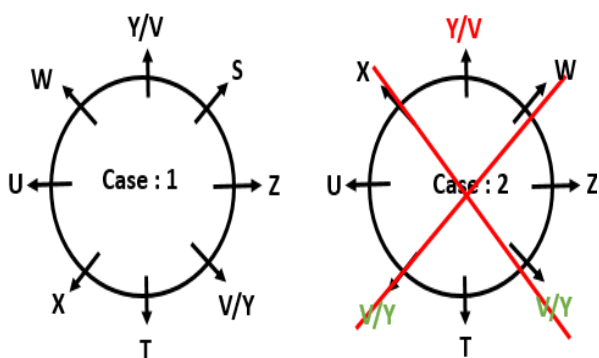

There are two people sitting between Y and V.

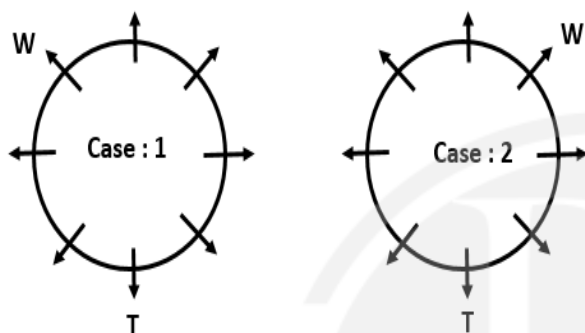

Both V and Y does not sit near to X.

Case 2: is eliminated.

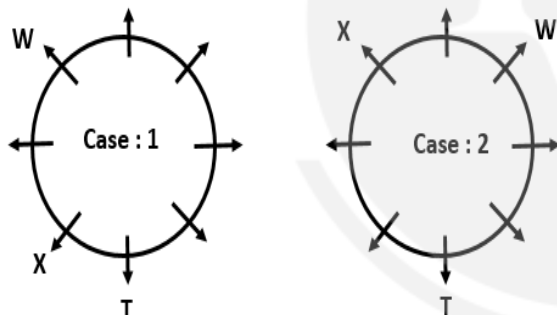

**Q21 Text Solution:**

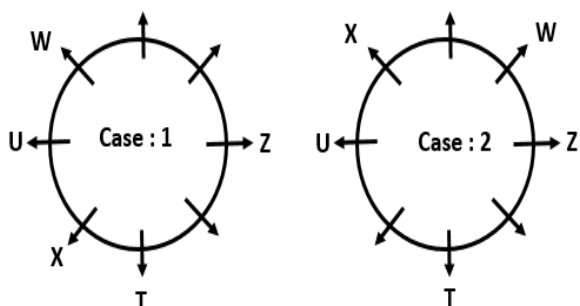

W sits three places away from the T.

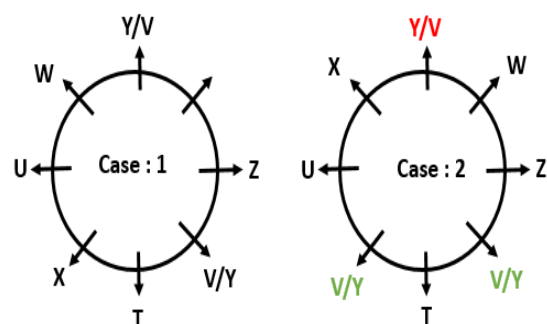

X sits second to the left of W.

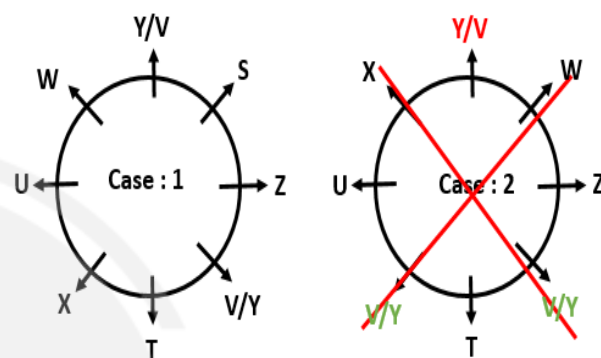

There are two people sitting between X and Z.
Z sits opposite to U.

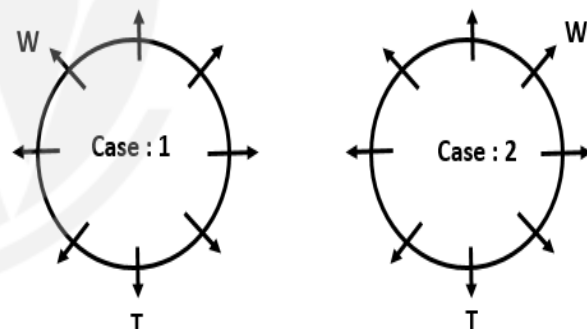

There are two people sitting between Y and V.

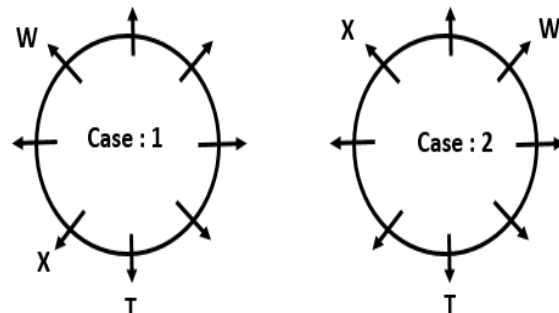

Both V and Y does not sit near to X.
Case 2: is eliminated.

**Q22 Text Solution:**

W sits three places away from the T.

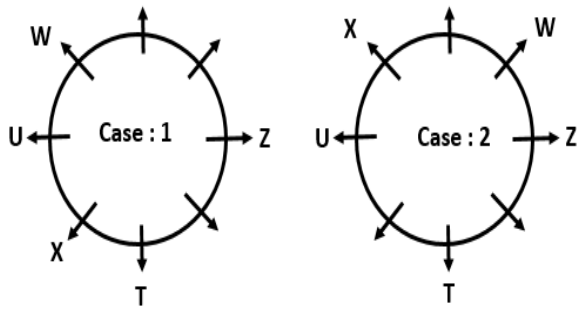

X sits second to the left of W.

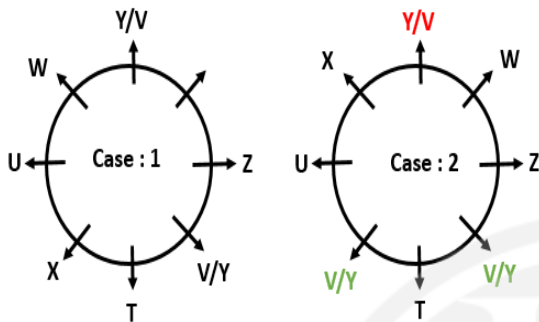

There are two people sitting between X and Z.
Z sits opposite to U.

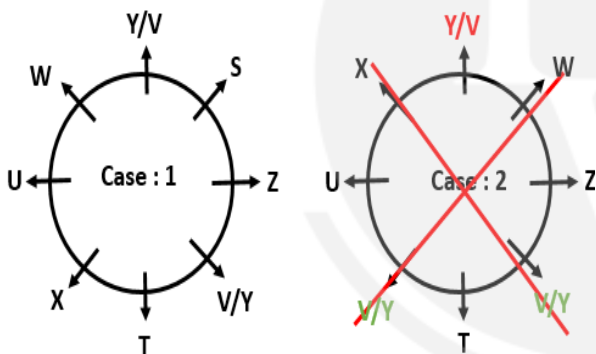

There are two people sitting between Y and V.

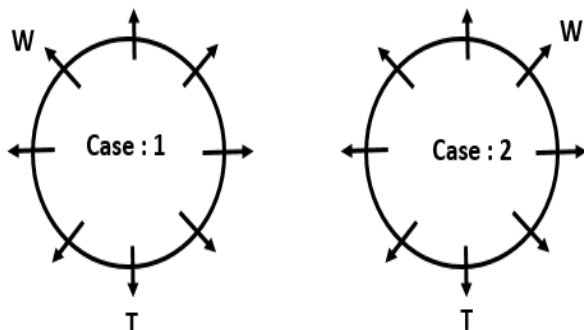

Both V and Y does not sit near to X.
Case 2: is eliminated.

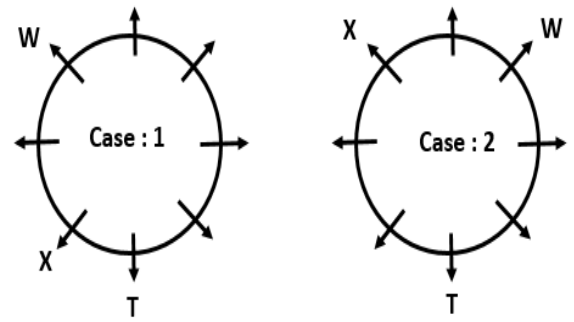

Q23 Text Solution:

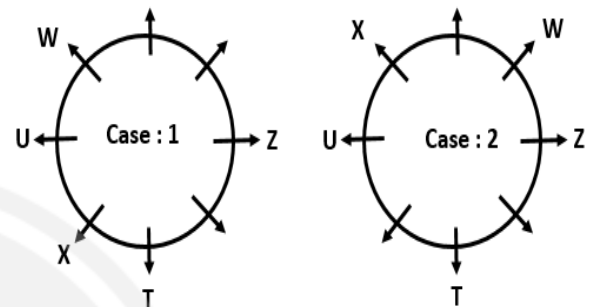

W sits three places away from the T.

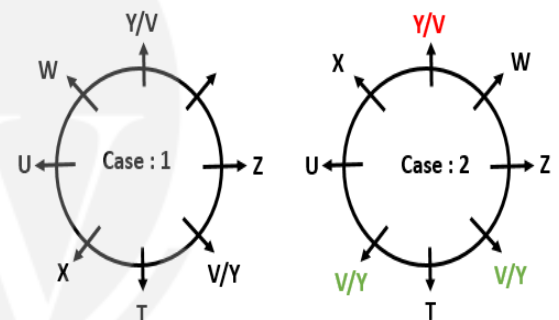

X sits second to the left of W.

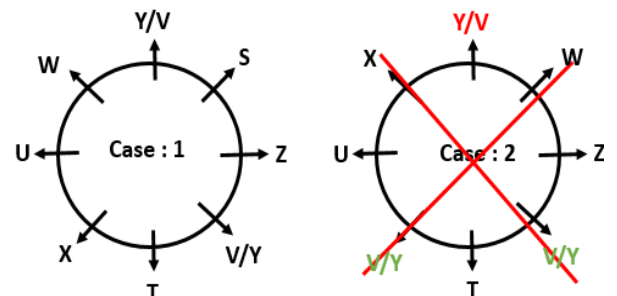

There are two people sitting between X and Z.
Z sits opposite to U.

There are two people sitting between Y and V.

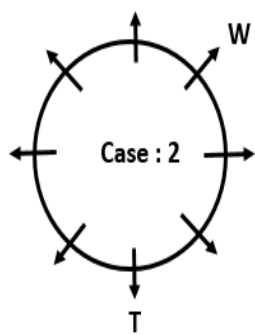

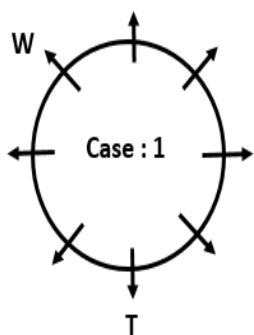

Both V and Y does not sit near to X.
Case 2: is eliminated.

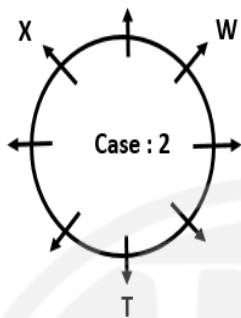

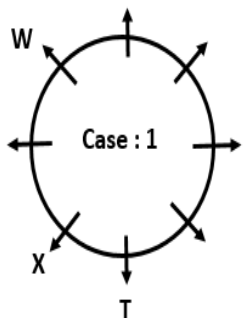

Q24 Text Solution:

W sits three places away from the T.

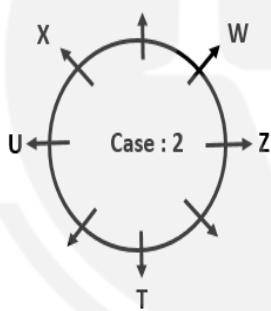

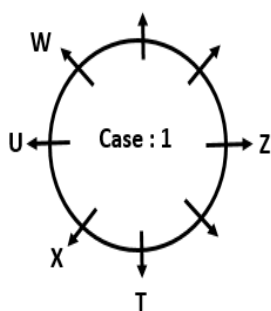

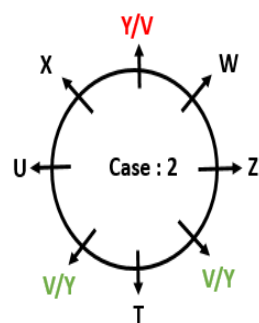

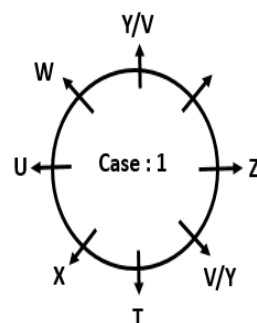

X sits second to the left of W.

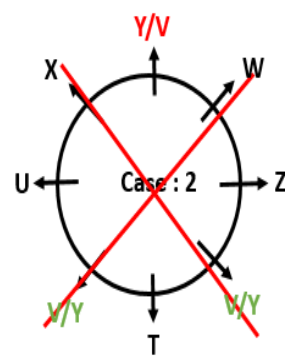

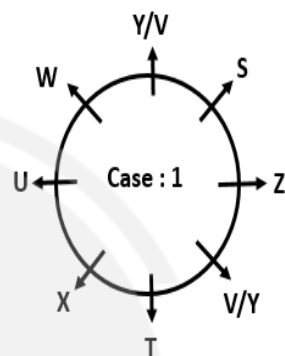

There are two people sitting between X and Z.
Z sits opposite to U.

There are two people sitting between Y and V.

Both V and Y does not sit near to X.
Case 2: is eliminated.
