Input Output

Level-1

Q1 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges numbers, is given a set of numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : 243 357 1296 876 1359 2271

Step 1 : 82 120 433 293 454 758

Step 2 : 652 22 176 512 179 5013

Step 3 : 60 04 42 10 63 00

Step 4 : 06 04 06 01 09 00

Step 5 : 00 01 04 06 06 09

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : 543 1971 2235 231 894 3234

What will be the outcome if we subtract the second number from the left end of step 1 from the third number from the right end of step 2?

- (A) 150 (B) -150
(C) 151 (D) 160
(E) -160

Q2 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges numbers, is given a set of numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : 243 357 1296 876 1359 2271

Step 1 : 82 120 433 293 454 758

Step 2 : 652 22 176 512 179 5013

Step 3 : 60 04 42 10 63 00

Step 4 : 06 04 06 01 09 00

Step 5 : 00 01 04 06 06 09

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : 543 1971 2235 231 894 3234

What will be the sum of the second number from the left end of step 2 and the third number from the right end of step 1?

- (A) 3793 (B) 3791
(C) 3795 (D) 3797
(E) 3799

Q3 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges numbers, is given a set of numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : 243 357 1296 876 1359 2271

Step 1 : 82 120 433 293 454 758

Step 2 : 652 22 176 512 179 5013

Step 3 : 60 04 42 10 63 00

Step 4 : 06 04 06 01 09 00

Step 5 : 00 01 04 06 06 09

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : 543 1971 2235 231 894 3234

Which number is second to the left of the first number from the right end in step 4?

- (A) 00
- (B) 04
- (C) 09
- (D) Either 00 or 04
- (E) None of these

Q4 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges numbers, is given a set of numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : 243 357 1296 876 1359 2271

Step 1 : 82 120 433 293 454 758

Step 2 : 652 22 176 512 179 5013

Step 3 : 60 04 42 10 63 00

Step 4 : 06 04 06 01 09 00

Step 5 : 00 01 04 06 06 09

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : 543 1971 2235 231 894 3234

Which of the following is the penultimate step?

- (A) 00 09 00 04 00 03
- (B) 09 00 00 00 04 03
- (C) 00 00 09 00 04 03
- (D) 00 09 00 00 04 03
- (E) 00 09 00 00 04 04

Q5 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges words and numbers, is given a set of words and numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : come 95 alone 23 75 shame tops 86 wild 15 hound 34

Step 1 : alone come 95 23 75 shame tops 86 wild hound 34 15

Step 2 : come alone 95 75 shame tops 86 wild hound 34 15 23

Step 3 : hound come alone 95 75 shame tops 86 wild 15 23 34

Step 4 : shame hound come alone 95 tops 86 wild 15 23 34 75

Step 5 : tops shame hound come alone 95 wild 15 23 34 75 86

Step 6 : wild tops shame hound come alone 15 23 34 75 86 95

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : broke 85 blame 82 bloke 83 bask 81 89 become 87 behold.

How many numbers are there in between broke and behold in step 2?

- (A) 6
- (B) 5
- (C) 4
- (D) 3

Q6 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges words and numbers, is given a set of words and numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : come 95 alone 23 75 shame tops 86 wild 15 hound 34

Step 1 : alone come 95 23 75 shame tops 86 wild hound 34 15

Step 2 : come alone 95 75 shame tops 86 wild hound 34 15 23

Step 3 : hound come alone 95 75 shame tops 86 wild 15 23 34

Step 4 : shame hound come alone 95 tops 86 wild 15 23 34 75

Step 5 : tops shame hound come alone 95 wild 15 23 34 75 86

Step 6 : wild tops shame hound come alone 15 23 34 75 86 95

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : broke 85 blame 82 bloke 83 bask 81 89 become 87 behold.

Which element is fifth to the right of behold in step 4?

- (A) 89 (B) broke
(C) bloke (D) 87
(E) 81

Q7 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges words and numbers, is given a set of words and numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : come 95 alone 23 75 shame tops 86 wild 15 hound 34

Step 1 : alone come 95 23 75 shame tops 86 wild hound 34 15

Step 2 : come alone 95 75 shame tops 86 wild hound 34 15 23

Step 3 : hound come alone 95 75 shame tops 86 wild 15 23 34

Step 4 : shame hound come alone 95 tops 86 wild 15 23 34 75

Step 5 : tops shame hound come alone 95 wild 15 23 34 75 86

Step 6 : wild tops shame hound come alone 15 23 34 75 86 95

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : broke 85 blame 82 bloke 83 bask 81 89 become 87 behold.

Which element is fourth to the left of the element which is second to the right of behold in the ultimate step?

- (A) blame (B) bask
(C) become (D) behold
(E) None of these

Q8 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges words and numbers, is given a set of words and numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : come 95 alone 23 75 shame tops 86 wild 15 hound 34

Step 1 : alone come 95 23 75 shame tops 86 wild hound 34 15

Step 2 : come alone 95 75 shame tops 86 wild hound 34 15 23

Step 3 : hound come alone 95 75 shame tops 86 wild 15 23 34

Step 4 : shame hound come alone 95 tops 86 wild 15 23 34 75

Step 5 : tops shame hound come alone 95 wild 15 23 34 75 86

Step 6 : wild tops shame hound come alone 15 23 34 75 86 95

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : broke 85 blame 82 bloke 83 bask 81 89 become 87 behold.

Which of the following represents the penultimate step?

- (A) bloke blame behold become bask broke 89 81
82 83 87 85
- (B) bloke blame behold become bask broke 89 81
83 82 85 87
- (C) bloke blame become behold bask broke 89 81
82 83 85 87
- (D) bloke blame behold become broke bask 89 81
82 83 85 87
- (E) None of these

Q9 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges words and numbers, is given a set of words and numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : come 95 alone 23 75 shame tops 86 wild 15 hound 34

Step 1 : alone come 95 23 75 shame tops 86 wild hound 34 15

Step 2 : come alone 95 75 shame tops 86 wild hound 34 15 23

Step 3 : hound come alone 95 75 shame tops 86 wild 15 23 34

Step 4 : shame hound come alone 95 tops 86 wild 15 23 34 75

Step 5 : tops shame hound come alone 95 wild 15 23 34 75 86

Step 6 : wild tops shame hound come alone 15 23 34 75 86 95

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : broke 85 blame 82 bloke 83 bask 81 89 become 87 behold.

Which word is second to the left of 87 in step 4?

- (A) blame (B) bloke
(C) broke (D) behold
(E) bask

Q10 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges words and numbers, is given a set of words and numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : shade 29 52 white 98 blue color 45 33 zebra

Step 1 : blue shade 52 white 98 color 45 33 zebra 29

Step 2 : color blue shade 52 white 98 45 zebra 29 33

Step 3 : shade color blue 52 white 98 zebra 29 33 45

Step 4 : white shade color blue 98 zebra 29 33 45 52

Step 5 : zebra white shade color blue 29 33 45 52 98

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : 25 night 88 jump prank 66 34 glue alone 28

How many elements are there in between 88 and 25 in step 1?

- (A) 6 (B) 5
(C) 4 (D) 3
(E) 2

Q11 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges words and numbers, is given a set of words and numbers to

arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : shade 29 52 white 98 blue color 45 33 zebra

Step 1 : blue shade 52 white 98 color 45 33 zebra 29

Step 2 : color blue shade 52 white 98 45 zebra 29 33

Step 3 : shade color blue 52 white 98 zebra 29 33 45

Step 4 : white shade color blue 98 zebra 29 33 45 52

Step 5 : zebra white shade color blue 29 33 45 52 98

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : 25 night 88 jump prank 66 34 glue alone 28

In step two, which word is third to the left of 25?

- (A) night (B) jump
(C) glue (D) alone
(E) None of these

Q12 Directions: A machine rearrangement given an input line having numbers in a particular set of rules in step by step. The following is an illustration of input and its rearrangement:

INPUT: 5496 2893 1798 2384 7631 4825

STEP I: 4569 2389 1789 2348 1367 2458

STEP II: 5946 3928 1798 3248 1376 5248

STEP III: 54 32 19 34 17 54

STEP IV: 20 6 9 12 7 20

Step IV is the last step of the above input. As per rules followed in the given steps, find appropriate step for given Input.

INPUT: 1523 4139 9871 6329 8514 2793

How many even numbers are there in step III?

- (A) 0 (B) 1
(C) 2 (D) 3
(E) 4

Q13 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges words and numbers, is given a set of words and numbers to arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : shade 29 52 white 98 blue color 45 33 zebra

Step 1 : blue shade 52 white 98 color 45 33 zebra 29

Step 2 : color blue shade 52 white 98 45 zebra 29 33

Step 3 : shade color blue 52 white 98 zebra 29 33 45

Step 4 : white shade color blue 98 zebra 29 33 45 52

Step 5 : zebra white shade color blue 29 33 45 52 98

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : 25 night 88 jump prank 66 34 glue alone 28

What will be the outcome if we add the second number from the left end of step 2 and the third number from the right end of step 4?

- (A) 96 (B) 94
(C) 92 (D) 88
(E) 86

Q14 Directions: Study the following data carefully and answer the questions accordingly.

When a machine, which arranges words and numbers, is given a set of words and numbers to

arrange, it rearranges them in a particular way. The following set is a manifestation of the arrangement made by the machine.

Input : shade 29 52 white 98 blue color 45 33 zebra

Step 1 : blue shade 52 white 98 color 45 33 zebra 29

Step 2 : color blue shade 52 white 98 45 zebra 29 33

Step 3 : shade color blue 52 white 98 zebra 29 33 45

Step 4 : white shade color blue 98 zebra 29 33 45 52

Step 5 : zebra white shade color blue 29 33 45 52 98

The following set will follow the same arrangement pattern. Find out the steps and answer the following questions accordingly.

Input : 25 night 88 jump prank 66 34 glue alone 28

Which is the second element from the left in step 3?

- (A) Jump (B) night
(C) prank (D) alone
(E) None of these

Q15 Directions: A machine rearrangement given an input line having numbers in a particular set of rules in step by step. The following is an illustration of input and its rearrangement:

INPUT: 5496 2893 1798 2384 7631 4825

STEP I: 4569 2389 1789 2348 1367 2458

STEP II: 5946 3928 1798 3248 1376 5248

STEP III: 54 32 19 34 17 54

STEP IV: 20 6 9 12 7 20

Step IV is the last step of the above input. As per rules followed in the given steps, find appropriate step for given Input.

INPUT:1523 4139 9871 6329 8514 2793

What is the difference of the fourth number from left end in step I and 1st number from left end in step II?

- (A) 1893 (B) 1017
(C) 987 (D) 3413
(E) None of these

Q16 Directions: A machine rearrangement given an input line having numbers in a particular set of rules in step by step. The following is an illustration of input and its rearrangement:

INPUT: 5496 2893 1798 2384 7631 4825

STEP I: 4569 2389 1789 2348 1367 2458

STEP II: 5946 3928 1798 3248 1376 5248

STEP III: 54 32 19 34 17 54

STEP IV: 20 6 9 12 7 20

Step IV is the last step of the above input. As per rules followed in the given steps, find appropriate step for given Input.

INPUT:1523 4139 9871 6329 8514 2793

What is the digit sum of the number which is second from the right end in step II?

- (A) 17 (B) 12
(C) 11 (D) 18
(E) None of these

Q17 Directions: A machine rearrangement given an input line having numbers in a particular set of rules in step by step. The following is an illustration of input and its rearrangement:

INPUT: 5496 2893 1798 2384 7631 4825

STEP I: 4569 2389 1789 2348 1367 2458

STEP II: 5946 3928 1798 3248 1376 5248

STEP III: 54 32 19 34 17 54

STEP IV: 20 6 9 12 7 20

Step IV is the last step of the above input. As per rules followed in the given steps, find appropriate step for given Input.

INPUT:1523 4139 9871 6329 8514 2793

What is the sum of the numbers at even places (counted from the left end) in last step?

- (A) 42 (B) 38
(C) 24 (D) 25
(E) 15

Q18 A number arrangement machine when given an input line of numbers rearranges them following a particular pattern in each step. The following is an illustration of an input and rearrangement.

Input: 725824 399423 885341 537642 718354 414792 492543

Step I: 399423 414792 492543 537642 718354 725824 885341

Step II: 9 4 9 4 16 16 1

Step III: 399432 414796 492552 537646 718370 725840 885342

Step IV: 399438 414820 492560 537676 718370 725840 885358

Step V: 834993 012484 025694 636775 013787 024587 835588

Step VI: 36 19 26 34 26 26 37

As per the pattern followed in the above steps, find the output for the given input:

Input: 294435 576493 978876 252349 747962 918125 453264

How many number(s) which is/are divisible by 10 in the fourth step?

- (A) 2 (B) 3
(C) 5 (D) 1
(E) 4

Q19 A number arrangement machine when given an input line of numbers rearranges them following a particular pattern in each step. The following is an illustration of an input and rearrangement.

Input: 725824 399423 885341 537642 718354 414792 492543

Step I: 399423 414792 492543 537642 718354 725824 885341

Step II: 9 4 9 4 16 16 1

Step III: 399432 414796 492552 537646 718370 725840 885342

Step IV: 399438 414820 492560 537676 718370 725840 885358

Step V: 834993 012484 025694 636775 013787 024587 835588

Step VI: 36 19 26 34 26 26 37

As per the pattern followed in the above steps, find the output for the given input:

Input: 294435 576493 978876 252349 747962 918125 453264

What is the square of sum of the numbers at the leftmost end and the rightmost end in Step VI?

- (A) 2401 (B) 4225
(C) 3249 (D) 2704
(E) 4761

Q20 A number arrangement machine when given an input line of numbers rearranges them following a particular pattern in each step. The following is an illustration of an input and rearrangement.

Input: 725824 399423 885341 537642 718354 414792 492543

Step I: 399423 414792 492543 537642 718354 725824 885341

Step II: 9 4 9 4 16 16 1

Step III: 399432 414796 492552 537646 718370 725840 885342

Step IV: 399438 414820 492560 537676 718370 725840 885358

Step V: 834993 012484 025694 636775 013787
024587 835588

Step VI: 36 19 26 34 26 26 37

As per the pattern followed in the above steps,
find the output for the given input:

**Input: 294435 576493 978876 252349 747962
918125 453264**

What is the sum of all the elements of the step II?

- (A) 203 (B) 218
(C) 196 (D) 184
(E) 220

Q21 A number arrangement machine when given an input line of numbers rearranges them following a particular pattern in each step. The following is an illustration of an input and rearrangement.

**Input: 725824 399423 885341 537642 718354
414792 492543**

Step I: 399423 414792 492543 537642 718354
725824 885341

Step II: 9 4 9 4 16 16 1

Step III: 399432 414796 492552 537646 718370
725840 885342

Step IV: 399438 414820 492560 537676 718370
725840 885358

Step V: 834993 012484 025694 636775 013787
024587 835588

Step VI: 36 19 26 34 26 26 37

As per the pattern followed in the above steps,
find the output for the given input:

**Input: 294435 576493 978876 252349 747962
918125 453264**

What is the sum of first number from right of
step IV and third element from the left of the

step III?

- (A) 1432210 (B) 1432164
(C) 1437135 (D) 1632135
(E) 1432538

Q22 A number arrangement machine when given an input line of numbers rearranges them following a particular pattern in each step. The following is an illustration of an input and rearrangement.

**Input: 725824 399423 885341 537642 718354
414792 492543**

Step I: 399423 414792 492543 537642 718354
725824 885341

Step II: 9 4 9 4 16 16 1

Step III: 399432 414796 492552 537646 718370
725840 885342

Step IV: 399438 414820 492560 537676 718370
725840 885358

Step V: 834993 012484 025694 636775 013787
024587 835588

Step VI: 36 19 26 34 26 26 37

As per the pattern followed in the above steps,
find the output for the given input:

**Input: 294435 576493 978876 252349 747962
918125 453264**

Which of the following steps has the smallest
number?

- (A) Step IV (B) Step V
(C) Step I (D) Step III
(E) None of these

Q23 Directions: A number arrangement machine when given an input line of numbers rearranges them following a particular rule in each step. The following is an illustration of an input & its rearrangement.

Input : 168 787 231 425 528 359

Step 1 : 168 231 359 425 528 787

Step 2 : 168 123 359 245 258 778

Step 3 : 123 168 245 258 359 778

Step 4 : 146 207 252 309 569

Step 5 : 11 9 9 12 20

Step 5 is the last step of the rearrangements,
Based on the following logic rearrange the given
input.

Input : 529 317 111 815 314

How many even numbers are there in Step 3 and
Step 4 combined ?

- (A) 1 (B) 4
(C) 2 (D) 7
(E) None of these

Q24 **Directions:** A number arrangement machine when given an input line of numbers rearranges them following a particular rule in each step. The following is an illustration of an input & its rearrangement.

Input : 168 787 231 425 528 359

Step 1 : 168 231 359 425 528 787

Step 2 : 168 123 359 245 258 778

Step 3 : 123 168 245 258 359 778

Step 4 : 146 207 252 309 569

Step 5 : 11 9 9 12 20

Step 5 is the last step of the rearrangements,
Based on the following logic rearrange the given
input.

Input : 529 317 111 815 314

How many numbers are there to right of 134 in
Step 2 ?

- (A) 0 (B) 2
(C) 4 (D) 1
(E) None of these

Q25 **Directions:** A number arrangement machine when given an input line of numbers rearranges them following a particular rule in each step.

The following is an illustration of an input & its rearrangement.

Input : 168 787 231 425 528 359

Step 1 : 168 231 359 425 528 787

Step 2 : 168 123 359 245 258 778

Step 3 : 123 168 245 258 359 778

Step 4 : 146 207 252 309 569

Step 5 : 11 9 9 12 20

Step 5 is the last step of the rearrangements,
Based on the following logic rearrange the given
input.

Input : 529 317 111 815 314

What is the result if the first number from the left
end is multiplied with the second number from
the right end from Step5 ?

- (A) 110 (B) 66
(C) 78 (D) 60
(E) None of these

Q26 **Directions:** A number arrangement machine when given an input line of numbers rearranges them following a particular rule in each step. The following is an illustration of an input & its rearrangement.

Input : 168 787 231 425 528 359

Step 1 : 168 231 359 425 528 787

Step 2 : 168 123 359 245 258 778

Step 3 : 123 168 245 258 359 778

Step 4 : 146 207 252 309 569

Step 5 : 11 9 9 12 20

Step 5 is the last step of the rearrangements,
Based on the following logic rearrange the given
input.

Input : 529 317 111 815 314

What is the sum of all the numbers in Step 5 ?

- (A) 29 (B) 39
(C) 40 (D) 30
(E) None of these

Q27

Directions: A number arrangement machine when given an input line of numbers rearranges them following a particular rule in each step. The following is an illustration of an input & its rearrangement.

Input : 168 787 231 425 528 359

Step 1 : 168 231 359 425 528 787

Step 2 : 168 123 359 245 258 778

Step 3 : 123 168 245 258 359 778

Step 4 : 146 207 252 309 569

Step 5 : 11 9 9 12 20

Step 5 is the last step of the rearrangements, Based on the following logic rearrange the given input.

Input : 529 317 111 815 314

What is the sum of the first number from right in Step 3 and Step 4 ?

- (A) 468 (B) 358
(C) 234 (D) 324
(E) None of these

Hints & Solutions

Q1 Text Solution:

Arrangement Logic :

1. In step one, each number is divided by 3 and 1 is added to the resultant.
2. In step two, the first digit from left of each number is squared and 1 is added to the resultant. And then the rest of the digits of each number are added within the number.
3. In step three, all the digits of each number are multiplied within the number.
4. In step four, all the digits of each number are added within the number.
5. In step five, all the numbers are arranged in increasing order from left to right.

Input : 543 1971 2235 231 894 3234

Step 1 : 182 **658** 746 78 299 1079

Step 2 : 210 3713 5010 **508** 518 216

Step 3 : 00 63 00 00 40 12

Step 4 : 00 09 00 00 04 03

Step 5 : 00 00 00 03 04 09

The second number from the left end of step 1 is **658**.

The third number from the right end of step 2 is **508**.

Subtraction : $508 - 658 = -150$.

Q2 Text Solution:

Arrangement Logic :

1. In step one, each number is divided by 3 and 1 is added to the resultant.
2. In step two, the first digit from left of each number is squared and 1 is added to the resultant. And then the rest of the digits of each number are added within the number.
3. In step three, all the digits of each number are multiplied within the number.

4. In step four, all the digits of each number are added within the number.

5. In step five, all the numbers are arranged in increasing order from left to right.

Input : 543 1971 2235 231 894 3234

Step 1 : 182 658 746 **78** 299 1079

Step 2 : 210 **3713** 5010 508 518 216

Step 3 : 00 63 00 00 40 12

Step 4 : 00 09 00 00 04 03

Step 5 : 00 00 00 03 04 09

The second number from the left end of step 2 is **3713**.

The third number from the right end of step 1 is **78**.

Addition : $3713 + 78 = 3791$.

Q3 Text Solution:

Arrangement Logic :

1. In step one, each number is divided by 3 and 1 is added to the resultant.
2. In step two, the first digit from left of each number is squared and 1 is added to the resultant. And then the rest of the digits of each number are added within the number.
3. In step three, all the digits of each number are multiplied within the number.
4. In step four, all the digits of each number are added within the number.
5. In step five, all the numbers are arranged in increasing order from left to right.

Input : 543 1971 2235 231 894 3234

Step 1 : 182 658 746 78 299 1079

Step 2 : 210 3713 5010 508 518 216

Step 3 : 00 63 00 00 40 12

Step 4 : 00 09 00 00 04 03

Step 5 : 00 00 00 03 04 09

Q4 Text Solution:

Arrangement Logic :

1. In step one, each number is divided by 3 and 1 is added to the resultant.
2. In step two, the first digit from left of each number is squared and 1 is added to the resultant. And then the rest of the digits of each number are added within the number.
3. In step three, all the digits of each number are multiplied within the number.
4. In step four, all the digits of each number are added within the number.
5. In step five, all the numbers are arranged in increasing order from left to right.

Input : 543 1971 2235 231 894 3234

Step 1 : 182 658 746 78 299 1079

Step 2 : 210 3713 5010 508 518 216

Step 3 : 00 63 00 00 40 12

Step 4 : 00 09 00 00 04 03

Step 5 : 00 00 00 03 04 09

The penultimate step is the step before the last step. The last step is step 5.

- Therefore, the penultimate step is **Step 4**, which is **00 09 00 00 04 03**

Hence, **00 09 00 00 04 03** is the correct answer.

Q5 Text Solution:

Arrangement Logic :

1. One word and one number change their positions in each step
2. In the first step, the word which comes first in the dictionary is placed at the beginning of the arrangement and the lowest number is placed at the end of the arrangement.
3. In the second step, the word which comes second in the dictionary is placed at the beginning of the arrangement and the word which comes first in the dictionary is

immediately to its right. Rest of the words will follow the same order in the remaining steps.

4. In the second step, the second lowest number is placed at the end of the arrangement and the lowest number is immediately to its left. Rest of the numbers will follow the same order in the remaining steps.

Input : broke 85 blame 82 bloke 83 bask 81 89 become 87 behold.

Step 1 : bask broke 85 blame 82 bloke 83 89 become 87 behold 81

Step 2 : become bask broke 85 blame bloke 83 89 87 behold 81 82

Step 3 : behold become bask broke 85 blame bloke 89 87 81 82 83

Step 4 : blame behold become bask broke bloke 89 87 81 82 83 85

Step 5 : bloke blame behold become bask broke 89 81 82 83 85 87

Step 6 : broke bloke blame behold become bask 81 82 83 85 87 89

- So, there are 4 numbers in between broke and behold in step 2.

Hence, 4 is the correct answer.

Q6 Text Solution:

Arrangement Logic :

1. One word and one number change their positions in each step
2. In the first step, the word which comes first in the dictionary is placed at the beginning of the arrangement and the lowest number is placed at the end of the arrangement.
3. In the second step, the word which comes second in the dictionary is placed at the beginning of the arrangement and the word which comes first in the dictionary is immediately to its right. Rest of the words will follow the same order in the remaining steps.

4. In the second step, the second lowest number is placed at the end of the arrangement and the lowest number is immediately to its left. Rest of the numbers will follow the same order in the remaining steps.

Input : broke 85 blame 82 bloke 83 bask 81 89
become 87 behold.

Step 1 : bask broke 85 blame 82 bloke 83 89
become 87 behold 81

Step 2 : become bask broke 85 blame bloke 83
89 87 behold 81 82

Step 3 : behold become bask broke 85 blame
bloke 89 87 81 82 83

Step 4 : blame behold become bask broke bloke
89 87 81 82 83 85

Step 5 : bloke blame behold become bask broke
89 81 82 83 85 87

Step 6 : broke bloke blame behold become bask
81 82 83 85 87 89

Step 4 : blame **behold** become bask broke bloke
89 87 81 82 83 85

89 is **fifth** to the **right** of **behold** in step 4.

Q7 Text Solution:

Arrangement Logic :

1. One word and one number change their positions in each step.
2. In the first step, the word which comes first in the dictionary is placed at the beginning of the arrangement and the lowest number is placed at the end of the arrangement.
3. In the second step, the word which comes second in the dictionary is placed at the beginning of the arrangement and the word which comes first in the dictionary is immediately to its right. Rest of the words will follow the same order in the remaining steps.
4. In the second step, the second lowest number is placed at the end of the arrangement and

the lowest number is immediately to its left. Rest of the numbers will follow the same order in the remaining steps.

Input : broke 85 blame 82 bloke 83 bask 81 89
become 87 behold.

Step 1 : bask broke 85 blame 82 bloke 83 89
become 87 behold 81

Step 2 : become bask broke 85 blame bloke 83
89 87 behold 81 82

Step 3 : behold become bask broke 85 blame
bloke 89 87 81 82 83

Step 4 : blame behold become bask broke bloke
89 87 81 82 83 85

Step 5 : bloke blame behold become bask broke
89 81 82 83 85 87

Step 6 : broke bloke blame behold become bask
81 82 83 85 87 89

The ultimate step is step 6, which is
broke **bloke** blame **behold** become **bask** 81 82
83 85 87 89

Bask is **second** to the **right** of **Behold**.

Bloke is **fourth** to the **left** of **Bask**.

Q8 Text Solution:

Arrangement Logic :

1. One word and one number change their positions in each step
2. In the first step, the word which comes first in the dictionary is placed at the beginning of the arrangement and the lowest number is placed at the end of the arrangement.
3. In the second step, the word which comes second in the dictionary is placed at the beginning of the arrangement and the word which comes first in the dictionary is immediately to its right. Rest of the words will follow the same order in the remaining steps.
4. In the second step, the second lowest number is placed at the end of the arrangement and

the lowest number is immediately to its left.
Rest of the numbers will follow the same order
in the remaining steps.

Input : broke 85 blame 82 bloke 83 bask 81 89
become 87 behold.

Step 1 : bask broke 85 blame 82 bloke 83 89
become 87 behold 81

Step 2 : become bask broke 85 blame bloke 83
89 87 behold 81 82

Step 3 : behold become bask broke 85 blame
bloke 89 87 81 82 83

Step 4 : blame behold become bask broke bloke
89 87 81 82 83 85

Step 5 : bloke blame behold become bask broke
89 81 82 83 85 87

Step 6 : broke bloke blame behold become bask
81 82 83 85 87 89

The **penultimate step** is **Step 5**, which is
**broke blame behold become bask broke 89 81
82 83 85 87**

Q9 Text Solution:

Arrangement Logic :

1. One word and one number change their positions in each step
2. In the first step, the word which comes first in the dictionary is placed at the beginning of the arrangement and the lowest number is placed at the end of the arrangement.
3. In the second step, the word which comes second in the dictionary is placed at the beginning of the arrangement and the word which comes first in the dictionary is immediately to its right. Rest of the words will follow the same order in the remaining steps.
4. In the second step, the second lowest number is placed at the end of the arrangement and the lowest number is immediately to its left.

Rest of the numbers will follow the same order
in the remaining steps.

Input : broke 85 blame 82 bloke 83 bask 81 89
become 87 behold.

Step 1 : bask broke 85 blame 82 bloke 83 89
become 87 behold 81

Step 2 : become bask broke 85 blame bloke 83
89 87 behold 81 82

Step 3 : behold become bask broke 85 blame
bloke 89 87 81 82 83

Step 4 : blame behold become bask broke bloke
89 87 81 82 83 85

Step 5 : bloke blame behold become bask broke
89 81 82 83 85 87

Step 6 : broke bloke blame behold become bask
81 82 83 85 87 89

- Step 4 : blame behold become bask broke
broke 89 87 81 82 83 85

The word **Broke** is **second to the left** of **87** in
step 4.

Hence, "**Broke**" is the correct answer.

Q10 Text Solution:

Arrangement Logic :

1. One word and one number change their positions in each step
2. In the first step, the word which comes first in the dictionary is placed at the beginning of the arrangement and the lowest number is placed at the end of the arrangement.
3. In the second step, the word which comes second in the dictionary is placed at the beginning of the arrangement and the word which comes first in the dictionary is immediately to its right. Rest of the words will follow the same order in the remaining steps.
4. In the second step, the second lowest number is placed at the end of the arrangement and the lowest number is immediately to its left.

Rest of the numbers will follow the same order in the remaining steps.

Input : 25 night 88 jump prank 66 34 glue alone 28

Step 1 : alone night 88 jump prank 66 34 glue 28 25

Step 2 : glue alone night 88 jump prank 66 34 25 28

Step 3 : jump glue alone night 88 prank 66 25 28 34

Step 4 : night jump glue alone 88 prank 25 28 34 66

Step 5 : prank night jump glue alone 25 28 34 66 88

Step 1 : alone night **88** jump prank 66 34 glue 28 25

- We can see here that 88 is the third element from the left end and 25 is the first element from the right end and there are 6 elements between them.

Hence, 6 is the correct answer.

Q11 Text Solution:

Arrangement Logic :

1. One word and one number change their positions in each step
2. In the first step, the word which comes first in the dictionary is placed at the beginning of the arrangement and the lowest number is placed at the end of the arrangement.
3. In the second step, the word which comes second in the dictionary is placed at the beginning of the arrangement and the word which comes first in the dictionary is immediately to its right. Rest of the words will follow the same order in the remaining steps.
4. In the second step, the second lowest number is placed at the end of the arrangement and the lowest number is immediately to its left.

Rest of the numbers will follow the same order in the remaining steps.

Input : 25 night 88 jump prank 66 34 glue alone 28

Step 1 : alone night 88 jump prank 66 34 glue 28 25

Step 2 : glue alone night 88 jump prank 66 34 25 28

Step 3 : jump glue alone night 88 prank 66 25 28 34

Step 4 : night jump glue alone 88 prank 25 28 34 66

Step 5 : prank night jump glue alone 25 28 34 66 88

Q12 Text Solution:

INPUT: 1523 4139 9871 6329 8514 2793

In the first step, the digits in each number are arranged in increasing order.

STEP I: 1235 1349 1789 2369 1458 2379

In the second step, the odd digits in each number are arranged in increasing order followed by the even number in increasing order. e.g. 1523= 1352.

STEP II: 1352 1394 1798 3926 1548 3792

In the third step, the 1st and the 3rd digit of the number are taken, and rest are omitted.

STEP III: 15 19 19 32 14 39

In the final step, the digit product of each number is taken.

STEP IV: 5 9 9 6 4 27

2 even numbers are there in step III.

Q13 Text Solution:

Arrangement Logic :

1. One word and one number change their positions in each step
2. In the first step, the word which comes first in the dictionary is placed at the beginning of the arrangement and the lowest number is placed at the end of the arrangement.

3. In the second step, the word which comes second in the dictionary is placed at the beginning of the arrangement and the word which comes first in the dictionary is immediately to its right. Rest of the words will follow the same order in the remaining steps.
4. In the second step, the second lowest number is placed at the end of the arrangement and the lowest number is immediately to its left. Rest of the numbers will follow the same order in the remaining steps.

Input : 25 night 88 jump prank 66 34 glue alone 28

Step 1 : alone night 88 jump prank 66 34 glue 28 25

Step 2 : glue alone night 88 jump prank 66 34 25 28

Step 3 : jump glue alone night 88 prank 66 25 28 34

Step 4 : night jump glue alone 88 prank 25 28 34 66

Step 5 : prank night jump glue alone 25 28 34 66 88

Required answer = $66 + 28 = 94$

Q14 Text Solution:

Arrangement Logic :

1. One word and one number change their positions in each step
2. In the first step, the word which comes first in the dictionary is placed at the beginning of the arrangement and the lowest number is placed at the end of the arrangement.
3. In the second step, the word which comes second in the dictionary is placed at the beginning of the arrangement and the word which comes first in the dictionary is

immediately to its right. Rest of the words will follow the same order in the remaining steps.

4. In the second step, the second lowest number is placed at the end of the arrangement and the lowest number is immediately to its left. Rest of the numbers will follow the same order in the remaining steps.

Input : 25 night 88 jump prank 66 34 glue alone 28

Step 1 : alone night 88 jump prank 66 34 glue 28 25

Step 2 : glue alone night 88 jump prank 66 34 25 28

Step 3 : jump glue alone night 88 prank 66 25 28 34

Step 4 : night jump glue alone 88 prank 25 28 34 66

Step 5 : prank night jump glue alone 25 28 34 66 88

Step 3 : jump **glue** alone night 88 prank 66 25 28 34.

glue is the **second element from the left** in step 3.

Q15 Text Solution:

INPUT: 1523 4139 9871 6329 8514 2793

In the first step, the digits in each number are arranged in increasing order.

STEP I: 1235 1349 1789 2369 1458 2379

In the second step, the odd digits in each number are arranged in increasing order followed by the even number in increasing order. e.g. 1523= 1352.

STEP II: 1352 1394 1798 3926 1548 3792

In the third step, the 1st and the 3rd digit of the number are taken, and rest are omitted.

STEP III: 15 19 19 32 14 39

In the final step, the digit product of each number is taken.

STEP IV: 5 9 9 6 4 27

The fourth number from left end in step I = 2369
 1st number from left end in step II = 1352
 Difference = 1017

Q16 Text Solution:

INPUT: 1523 4139 9871 6329 8514 2793

In the first step, the digits in each number are arranged in increasing order.

STEP I: 1235 1349 1789 2369 1458 2379

In the second step, the odd digits in each number are arranged in increasing order followed by the even number in increasing order. e.g. 1523 = 1352.

STEP II: 1352 1394 1798 3926 1548 3792

In the third step, the 1st and the 3rd digit of the number are taken, and rest are omitted.

STEP III: 15 19 19 32 14 39

In the final step, the digit product of each number is taken.

STEP IV: 5 9 9 6 4 27

The number which is second from the right end in step II = 1548. digit sum = 18.

Q17 Text Solution:

INPUT: 1523 4139 9871 6329 8514 2793

In the first step, the digits in each number are arranged in increasing order.

STEP I: 1235 1349 1789 2369 1458 2379

In the second step, the odd digits in each number are arranged in increasing order followed by the even number in increasing order. e.g. 1523 = 1352.

STEP II: 1352 1394 1798 3926 1548 3792

In the third step, the 1st and the 3rd digit of the number are taken, and rest are omitted.

STEP III: 15 19 19 32 14 39

In the final step, the digit product of each number is taken.

STEP IV: 5 9 9 6 4 27

2nd number = 9

4th number = 6

6th number = 27

sum = 42

Q18 Text Solution:

By observing the given input and the steps, we can say that:

In step I:

The numbers are arranged in increasing order.

In step II:

The numbers are replaced by the square of the last digit of the numbers.

In step III:

Numbers in step I and II are added.

In step IV:

The numbers increased by the multiplication of the first and the last digits of the numbers.

In step V:

The first and the last digits of the numbers are exchanged and the rest of the digits are arranged in the increasing order.

In step VI:

The numbers are replaced by their digital sums.

By following the same logical pattern we get,

Input: 294435 576493 978876 252349 747962 918125 453264

Step I: 252349 294435 453264 576493 747962 918125 978876

Step II: 81 25 16 9 4 25 36

Step III: 252430 294460 453280 576502 747966 918150 978912

Step IV: **252430 294460 453280 576512 748008 918150 978930**

Step V: 023452 044692 023584 215675 800487 011589 037899

Step VI: 16 25 22 26 27 24 36

Step IV: 252430 294460 453280 576512 748008 918150 978930

- 5 numbers are divisible by 10 in the fourth step.

Hence, "5" is the correct answer.

Q19 Text Solution:

By observing the given input and the steps, we can say that:

In step I:

The numbers are arranged in increasing order.

In step II:

The numbers are replaced by the square of the last digit of the numbers.

In step III:

Numbers in step I and II are added.

In step IV:

The numbers increased by the multiplication of the first and the last digits of the numbers.

In step V:

The first and the last digits of the numbers are exchanged and the rest of the digits are arranged in the increasing order.

In step VI:

The numbers are replaced by their digital sums.

By following the same logical pattern we get,

Input: 294435 576493 978876 252349 747962 918125 453264

Step I: 252349 294435 453264 576493 747962 918125 978876

Step II: 81 25 16 9 4 25 36

Step III: 252430 294460 453280 576502 747966 918150 978912

Step IV: 252430 294460 453280 576512 748008 918150 978930

Step V: 023452 044692 023584 215675 800487 011589 037899

Step VI: 16 25 22 26 27 24 36

$16 + 36 = 52$; $52 \times 52 = 2704$

Q20 Text Solution:

By observing the given input and the steps, we can say that:

In step I:

The numbers are arranged in increasing order.

In step II:

The numbers are replaced by the square of the last digit of the numbers.

In step III:

Numbers in step I and II are added.

In step IV:

The numbers increased by the multiplication of the first and the last digits of the numbers.

In step V:

The first and the last digits of the numbers are exchanged and the rest of the digits are arranged in the increasing order.

In step VI:

The numbers are replaced by their digital sums.

By following the same logical pattern we get,

Input: 294435 576493 978876 252349 747962 918125 453264

Step I: 252349 294435 453264 576493 747962 918125 978876

Step II: 81 25 16 9 4 25 36

Step III: 252430 294460 453280 576502 747966 918150 978912

Step IV: 252430 294460 453280 576512 748008 918150 978930

Step V: 023452 044692 023584 215675 800487 011589 037899

Step VI: 16 25 22 26 27 24 36

Step II: 81 25 16 9 4 25 36

$81 + 25 + 16 + 9 + 4 + 25 + 36 = 196$

Q21 Text Solution:

By observing the given input and the steps, we can say that:

In step I:

The numbers are arranged in increasing order.

In step II:

The numbers are replaced by the square of the last digit of the numbers.

In step III:

Numbers in step I and II are added.

In step IV:

The numbers increased by the multiplication of the first and the last digits of the numbers.

In step V:

The first and the last digits of the numbers are exchanged and the rest of the digits are arranged in the increasing order.

In step VI:

The numbers are replaced by their digital sums.

By following the same logical pattern we get,

Input: 294435 576493 978876 252349 747962 918125 453264

Step I: 252349 294435 453264 576493 747962 918125 978876

Step II: 81 25 16 9 4 25 36

Step III: 252430 294460 453280 576502 747966 918150 978912

Step IV: 252430 294460 453280 576512 748008 918150 978930

Step V: 023452 044692 023584 215675 800487 011589 037899

Step VI: 16 25 22 26 27 24 36

Step III: 252430 294460 **453280** 576502 747966 918150 978912

Step IV: 252430 294460 453280 576512 748008 918150 **978930**

$978930 + 453280 = 1432210$

Q22 Text Solution:

By observing the given input and the steps, we can say that:

In step I:

The numbers are arranged in increasing order.

In step II:

The numbers are replaced by the square of the last digit of the numbers.

In step III:

Numbers in step I and II are added.

In step IV:

The numbers increased by the multiplication of the first and the last digits of the numbers.

In step V:

The first and the last digits of the numbers are exchanged and the rest of the digits are arranged in the increasing order.

In step VI:

The numbers are replaced by their digital sums.

By following the same logical pattern we get,

Input: 294435 576493 978876 252349 747962 918125 453264

Step I: 252349 294435 453264 576493 747962 918125 978876

Step II: 81 25 16 9 4 25 36

Step III: 252430 294460 453280 576502 747966 918150 978912

Step IV: 252430 294460 453280 576512 748008 918150 978930

Step V: 023452 044692 023584 215675 800487 011589 037899

Step VI: 16 25 22 26 27 24 36

Q23 Text Solution:

Input : 529 317 111 815 314

Step 1: 111 314 317 529 815

Arranged in Increasing order

Step 2 : 111 134 137 259 158

Every number is rearranged according to increasing order of figures.

Step 3 : 111 134 137 158 259

Arranged in Increasing order

Step 4 : 123 136 148 209

$(\text{First number} + \text{Second Number} + 1)/2$

$(111+134+1)/2 = 123$

$(134+137+1)/2 = 136$

$(137+158+1)/2 = 148$

$(158+259+1)/2 = 209$

Step 5 : 6 10 13 11

Added sum to figures in a number.

$1+2+3 = 6$

$1+3+6 = 10$

$1+4+8 = 13$

$$2+0+9 = 11$$

Q24 Text Solution:

Input : 529 317 111 815 314

Step 1 : 111 314 317 529 815

Arranged in Increasing order

Step 2 : 111 134 137 259 158

Every number is rearranged according to increasing order of figures.

Step 3 : 111 134 137 158 259

Arranged in Increasing order

Step 4 : 123 136 148 209

(First number + Second Number + 1)/2

$$(111+134+1)/2 = 123$$

$$(134+137+1)/2 = 136$$

$$(137+158+1)/2 = 148$$

$$(158+259+1)/2 = 209$$

Step 5 : 6 10 13 11

Added sum to figures in a number.

$$1+2+3 = 6$$

$$1+3+6 = 10$$

$$1+4+8 = 13$$

$$2+0+9 = 11$$

Q25 Text Solution:

Input : 529 317 111 815 314

Step 1 : 111 314 317 529 815

Arranged in Increasing order

Step 2 : 111 134 137 259 158

Every number is rearranged according to increasing order of figures.

Step 3 : 111 134 137 158 259

Arranged in Increasing order

Step 4 : 123 136 148 209

(First number + Second Number + 1)/2

$$(111+134+1)/2 = 123$$

$$(134+137+1)/2 = 136$$

$$(137+158+1)/2 = 148$$

$$(158+259+1)/2 = 209$$

Step 5 : 6 10 13 11

Added sum to figures in a number.

$$1+2+3 = 6$$

$$1+3+6 = 10$$

$$1+4+8 = 13$$

$$2+0+9 = 11$$

Q26 Text Solution:

Input : 529 317 111 815 314

Step 1 : 111 314 317 529 815

Arranged in Increasing order

Step 2 : 111 134 137 259 158

Every number is rearranged according to increasing order of figures.

Step 3 : 111 134 137 158 259

Arranged in Increasing order

Step 4 : 123 136 148 209

(First number + Second Number + 1)/2

$$(111+134+1)/2 = 123$$

$$(134+137+1)/2 = 136$$

$$(137+158+1)/2 = 148$$

$$(158+259+1)/2 = 209$$

Step 5 : 6 10 13 11

Added sum to figures in a number.

$$1+2+3 = 6$$

$$1+3+6 = 10$$

$$1+4+8 = 13$$

$$2+0+9 = 11$$

Q27 Text Solution:

Input : 529 317 111 815 314

Step 1 : 111 314 317 529 815

Arranged in Increasing order

Step 2 : 111 134 137 259 158

Every number is rearranged according to increasing order of figures.

Step 3 : 111 134 137 158 259

Arranged in Increasing order

Step 4 : 123 136 148 209

(First number + Second Number + 1)/2

$$(111+134+1)/2 = 123$$

$$(134+137+1)/2 = 136$$

$$(137+158+1)/2 = 148$$

$$(158+259+1)/2 = 209$$

Step 5 : 6 10 13 11

Added sum to figures in a number.

$$1+2+3 = 6$$

$$1+3+6 = 10$$

$$1+4+8 = 13$$

$$2+0+9 = 11$$
