

Reasoning

Number Series

Level-1

Q1 Directions: Answer the questions based on the information given below.

749 438 817 637 295

Each of the digits of the given numbers are arranged in increasing order from left to right then what is the sum of the unit digit and tenth digit of the lowest number obtained after rearrangement?

- (A) 12 (B) 15
(C) 16 (D) 13
(E) None of these

Q2 Directions: Answer the questions based on the information given below.

749 438 817 637 295

If all the even digits in all the numbers are added of each of the given numbers then what is the 3rd highest value obtained?

- (A) 6 (B) 8
(C) 7 (D) 12
(E) None of these

Q3 Directions: Answer the questions based on the information given below.

749 438 817 637 295

Which among the following numbers (given in the arrangement) obtains the highest number if the sum of the highest and the lowest digits in each of the given numbers is considered?

- (A) 749 (B) 438
(C) 637 (D) 295
(E) None of these

Q4

As given below, there are five 3-digit numbers. Using these numbers as a basis, answer the following questions.

126 235 365 484 728

Which of the following numbers is the second highest if we sum all the digits within each number?

- (A) 235 (B) 126
(C) 484 (D) 365
(E) 728

Q5 As given below, there are five 3-digit numbers. Using these numbers as a basis, answer the following questions.

126 235 365 484 728

Which of the following numbers is the second lowest if the first and third digits of each number are interchanged?

- (A) 484 (B) 126
(C) 728 (D) 235
(E) 365

Q6 As given below, there are five 3-digit numbers. Using these numbers as a basis, answer the following questions.

126 235 365 484 728

Which of the following numbers is the third lowest if we multiply all of the digits in the number?

- (A) 365 (B) 728
(C) 484 (D) 126
(E) 235

Q7 Directions: Study the following data carefully and answer the questions accordingly.

8 5 7 3 5 3 2 0 4 3 8 5 9 5 3 4 9 2 1 0 3 5

Which number will be the 12th to the left of the 18th from your left?

- (A) 1
(B) 3
(C) 7
(D) 5
(E) Cannot be determined

Q8 Directions: Study the following data carefully and answer the questions accordingly.

8 5 7 3 5 3 2 0 4 3 8 5 9 5 3 4 9 2 1 0 3 5

Which number will be the 5th to the right of the 10th from your left?

- (A) 1
(B) 3
(C) 7
(D) 5
(E) Cannot be determined

Q9 Directions: Study the following data carefully and answer the questions accordingly.

8 5 7 3 5 3 2 0 4 3 8 5 9 5 3 4 9 2 1 0 3 5

Which number will be the 6th to the right of the 18th from your right?

- (A) 1
(B) 8

- (C) 7
(D) 5
(E) Cannot be determined

Q10 Directions: Study the following data carefully and answer the questions accordingly.

8 5 7 3 5 3 2 0 4 3 8 5 9 5 3 4 9 2 1 0 3 5

Which number will be the 7th to the left of the 15th from your left?

- (A) 1
(B) 0
(C) 7
(D) 5
(E) Cannot be determined

Q11 Directions: Study the following data carefully and answer the questions accordingly.

8 5 7 3 5 ^ 3 2 0 4 # 3 8 5 * 9 5 3 4 & 9 2 ! 1 0 3 5

Which element will be the 5th to the right of the 10th from your right?

- (A) 1
(B) !
(C) 7
(D) &
(E) Cannot be determined

Q12 Directions: Study the following data carefully and answer the questions accordingly.

958 245 876 386 494

If all the digits are arranged continuously in the same order, to form a single series, then which of the following digit is third to the left of the sixth from the right end?

- (A) 8 (B) 7
(C) 6 (D) 5
(E) 4

Hints & Solutions

Q1 Text Solution:

Explanation:

Given numbers: 749 438 817 637 295

Digits of the given numbers are arranged in increasing order, so 479 348 178 367 259. Lowest number after rearrangement is 178.

Sum of the unit digit and tenth digits of 178 is 15.

Q2 Text Solution:

Explanation:

Given numbers: 749 438 817 637 295. If all the even digits in all the numbers are added for each of the given numbers,

we get 4 12 8 6 2

3rd highest value is 6.

Q3 Text Solution:

Correct Answer – A. 749

Explanation: Given numbers: 749 438 817 637 295

Sum of the highest and the lowest digits in each of the given numbers, 13 11 9 10 11

Q4 Text Solution:

We have,

126 235 365 484 728

If we sum all digits within each number, then we get,

9 10 14 16 17

Hence, 16 is the second highest number which belongs to 484.

Hence, the correct answer is option C.

Q5 Text Solution:

We have,

126 235 365 484 728

When the first and third digits are interchanged:

621 532 563 484 827

Hence, 532 is the second lowest which belongs to 235.

Hence, the correct answer is option D.

Q6 Text Solution:

We have,

126 235 365 484 728

After multiplying

12 30 90 128 112

Thus, 90 is the third-lowest number which belongs to 365.

Hence, the correct answer is option A.

Q7 Text Solution:

In this question,

We have,

12th letter from the left = 5

$L(18) - L(12) = L(6)$ { L = left and R = right }

6th letter to the left = 3

Q8 Text Solution:

In this question,

We have,

10th letter from the left = 3

$R(5) + L(10) = L(15)$ { L = left and R = right }

15th letter to the left = 3

Q9 Text Solution:

In this question,

We have,

12th letter from the left = 5

$R(6) - R(18) = R(12)$ { L = left and R = right }

12th letter to the right = 8

Q10 Text Solution:

In this question,

We have,

15th letter from the left = 3

$L(7) - L(15) = L(8)$ { L = left and R = right }

8th letter to the left = 0

Q11 Text Solution:

In this question,

We have,

10th letter from the right = 5

$R(5) - R(10) = R(5)$ { L = left and R = right }

5th letter to the right = !

Q12 Text Solution:

Given series 958 245 876 386 494 - 9 5 8 2 4 5 8

7 6 3 8 6 4 9 4
