

Reasoning

Rectangle Arrangements

Level-1

Q1 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a rectangular table in such a way three persons are sitting on the each longer side of the table and one person is sitting on the each shorter side of the table. All of them are facing outside the table. All the information is not necessarily in the same order.

D sits third to the left of H and sits opposite to A. A and C sit near to each other. C does not sit on the shorter side of the table. There are two people sitting between C and G. The number of people sitting between G and H is the same number of people sitting between G and B. F sits third to the left of E.

Four of the following five are alike in a certain way and so form a group. Which one does not belong to that group?

- (A) D-B (B) H-F
(C) E-D (D) G-F
(E) None of these

Q2 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a rectangular table in such a way three persons are sitting on the each longer side of the table and one person is sitting on the each shorter side of the table. All of them are facing outside the table. All the information is not necessarily in the same order.

D sits third to the left of H and sits opposite to A. A and C sit near to each other. C does not sit on the shorter side of the table. There are two people sitting between C and G. The number of people sitting between G and H is the same

number of people sitting between G and B. F sits third to the left of E.

How many people sit between F and E ?

- (A) Three
(B) Two
(C) Five
(D) Either (a) or (c)
(E) None of these

Q3 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a rectangular table in such a way three persons are sitting on the each longer side of the table and one person is sitting on the each shorter side of the table. All of them are facing outside the table. All the information is not necessarily in the same order.

D sits third to the left of H and sits opposite to A. A and C sit near to each other. C does not sit on the shorter side of the table. There are two people sitting between C and G. The number of people sitting between G and H is the same number of people sitting between G and B. F sits third to the left of E.

What is the position of D with respect to E ?

- (A) Third right
(B) Second left
(C) Second right
(D) Five to the right
(E) None of these

Q4 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a rectangular table in such a way three persons are sitting on the each longer side of the table and one person is sitting on the each

shorter side of the table. All of them are facing outside the table. All the information is not necessarily in the same order.

D sits third to the left of H and sits opposite to A. A and C sit near to each other. C does not sit on the shorter side of the table. There are two people sitting between C and G. The number of people sitting between G and H is the same number of people sitting between G and B. F sits third to the left of E.

Which of the following sit second to the left of F ?

- (A) G (B) A
(C) H (D) C
(E) None of these

Q5 Directions: Study the following data carefully and answer the questions accordingly.

Eight people A, B, C, D, E, F, G and H are sitting around a rectangular table in such a way three persons are sitting on the each longer side of the table and one person is sitting on the each shorter side of the table. All of them are facing outside the table. All the information is not necessarily in the same order.

D sits third to the left of H and sits opposite to A. A and C sit near to each other. C does not sit on the shorter side of the table. There are two people sitting between C and G. The number of people sitting between G and H is the same number of people sitting between G and B. F sits third to the left of E.

Which of the following statements is true ?

- (A) E sits second to the right of C
(B) F sit near to D
(C) One person sit between E and F
(D) G sits on shorter side of the rectangular table
(E) None of these

Q6 Directions : Study the following information carefully and answer the questions given below:

Eight persons A, B, C, D, E, F, G and H are sitting around a rectangular table and facing the centre.

They are sitting like that four of them on corners and four of them middle on the edges. B is facing G. G is on the middle of the edge. E is 3rd to the right of A. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). E is not neighbor of G or B. D is immediate right of H. C is not neighbor of B.

How many persons sit between E and G if starts counting from the left of E?

- (A) None (B) 1
(C) 2 (D) 3
(E) 4

Q7 Directions : Study the following information carefully and answer the questions given below:

Eight persons A, B, C, D, E, F, G and H are sitting around a rectangular table and facing the centre. They are sitting like that four of them on corners and four of them middle on the edges. B is facing G. G is on the middle of the edge. E is 3rd to the right of A. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). E is not neighbor of G or B. D is immediate right of H. C is not neighbor of B.

Which of the following pair is sitting opposite to each other?

- (A) E-A (B) F-C
(C) A-F (D) H-B
(E) B-D

Q8 Directions : Study the following information carefully and answer the questions given below:

Eight persons A, B, C, D, E, F, G and H are sitting around a rectangular table and facing the centre. They are sitting like that four of them on corners and four of them middle on the edges. B is facing G. G is on the middle of the edge. E is 3rd to the right of A. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). E is

not neighbor of G or B. D is immediate right of H. C is not neighbor of B.

Who among the following is 2nd to the left of F?

- (A) A (B) D
(C) E (D) C
(E) G

Q9 Directions : Study the following information carefully and answer the questions given below:

Eight persons A, B, C, D, E, F, G and H are sitting around a rectangular table and facing the centre. They are sitting like that four of them on corners and four of them middle on the edges. B is facing G. G is on the middle of the edge. E is 3rd to the right of A. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). E is not neighbor of G or B. D is immediate right of H. C is not neighbor of B.

Who among the following is 3rd to the right of B?

- (A) A (B) D
(C) E (D) C
(E) G

Q10 Directions : Study the following information carefully and answer the questions given below:

Eight persons A, B, C, D, E, F, G and H are sitting around a rectangular table and facing the centre. They are sitting like that four of them on corners and four of them middle on the edges. B is facing G. G is on the middle of the edge. E is 3rd to the right of A. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). E is not neighbor of G or B. D is immediate right of H. C is not neighbor of B.

Who among the following is one of the neighbors of G?

- (A) A (B) D
(C) E (D) B
(E) H

Q11

Study the following information carefully and answer the questions accordingly.

Eight persons P, Q, R, S, T, U, V, and W are arranged in a rectangular field so that two persons sit on each side of the table, but not necessarily in the same sequence. They are all facing the inside. W sits third to the left of U, who is sitting on the longer side. S is at W's immediate right. R sitting immediate left of P, who is not facing Q. T sitting second to the left of S and third to the right of V, who is not opposite T.

How many persons, counting from the right of U, are there between R and U?

- (A) One (B) Two
(C) Three (D) Four
(E) None of these

Q12 Study the following information carefully and answer the questions accordingly.

Eight persons P, Q, R, S, T, U, V, and W are arranged in a rectangular field so that two persons sit on each side of the table, but not necessarily in the same sequence. They are all facing the inside. W sits third to the left of U, who is sitting on the longer side. S is at W's immediate right. R sitting immediate left of P, who is not facing Q. T sitting second to the left of S and third to the right of V, who is not opposite T.

What is the position of V with respect to Q?

- (A) Second to the right
(B) Third to the right
(C) Immediate right
(D) Fourth to the left
(E) None of these

Q13 Study the following information carefully and answer the questions accordingly.

Eight persons P, Q, R, S, T, U, V, and W are arranged in a rectangular field so that two

persons sit on each side of the table, but not necessarily in the same sequence. They are all facing the inside. W sits third to the left of U, who is sitting on the longer side. S is at W's immediate right. R sitting immediate left of P, who is not facing Q. T sitting second to the left of S and third to the right of V, who is not opposite T.

Who among the following is facing T?

- (A) U (B) V
(C) Q (D) S
(E) None of these

Q14 Study the following information carefully and answer the questions accordingly.

Eight persons P, Q, R, S, T, U, V, and W are arranged in a rectangular field so that two persons sit on each side of the table, but not necessarily in the same sequence. They are all facing the inside. W sits third to the left of U, who is sitting on the longer side. S is at W's immediate right. R sitting immediate left of P, who is not facing Q. T sitting second to the left of S and third to the right of V, who is not opposite T.

Who among the following is sitting immediately to the U's left?

- (A) V (B) W
(C) Q (D) R
(E) P

Q15 Study the following information carefully and answer the questions accordingly.

Eight persons P, Q, R, S, T, U, V, and W are arranged in a rectangular field so that two persons sit on each side of the table, but not necessarily in the same sequence. They are all facing the inside. W sits third to the left of U, who is sitting on the longer side. S is at W's immediate right. R sitting immediate left of P, who is not facing Q. T sitting second to the left of S and third to the right of V, who is not opposite T.

Who among the following person seated on the longer side of the table?

- (A) R (B) W
(C) P (D) V
(E) S

Q16 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. Only three persons sit between V and R. W sits immediate left of S. S sits second to the left of V, who is not sitting at the corner of the table. The number of persons sitting between S and Q is the same as the number of persons sitting between T and S. The one who sits opposite V is immediate right of Q. P sits second to the right of W. U sits immediate right of T but do not sit on the longer side of the table.

How many persons sit between S and R when counted to the right of R?

- (A) One (B) Two
(C) Three (D) Four
(E) None of these

Q17 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. Only three persons sit between V and R. W sits immediate left of S. S sits second to the left of V, who is not sitting at the corner of the table. The number of persons

sitting between S and Q is the same as the number of persons sitting between T and S. The one who sits opposite V is immediate right of Q. P sits second to the right of W. U sits immediate right of T but do not sit on the longer side of the table.

What is the position of Q with respect to U?

- (A) Second to the right
- (B) Third to the right
- (C) Immediate right
- (D) Fourth to the left
- (E) None of these

Q18 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. Only three persons sit between V and R. W sits immediate left of S. S sits second to the left of V, who is not sitting at the corner of the table. The number of persons sitting between S and Q is the same as the number of persons sitting between T and S. The one who sits opposite V is immediate right of Q. P sits second to the right of W. U sits immediate right of T but do not sit on the longer side of the table.

Who among the following person seated at the corner of the table?

- (A) S
- (B) V
- (C) W
- (D) U
- (E) None of these

Q19 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of

them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. Only three persons sit between V and R. W sits immediate left of S. S sits second to the left of V, who is not sitting at the corner of the table. The number of persons sitting between S and Q is the same as the number of persons sitting between T and S. The one who sits opposite V is immediate right of Q. P sits second to the right of W. U sits immediate right of T but do not sit on the longer side of the table.

Who among the following person seated second to the right of the one who is immediate left of Q?

- (A) V
- (B) S
- (C) R
- (D) W
- (E) None of these

Q20 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. Only three persons sit between V and R. W sits immediate left of S. S sits second to the left of V, who is not sitting at the corner of the table. The number of persons sitting between S and Q is the same as the number of persons sitting between T and S. The one who sits opposite V is immediate right of Q. P sits second to the right of W. U sits immediate right of T but do not sit on the longer side of the table.

Who among the following person sits opposite to P?

- (A) R
- (B) W
- (C) Q
- (D) U

(E) None of these

Q21 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. T sits three places away from W, who sits in the corner of the table. Only one person sits between W and P, who is an immediate neighbour of T. The number of persons sitting between P and U is the same as the number of persons sitting between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T is not sitting second to the right of V. Q sits immediate right of W.

Four of the next five are similar in some way and thus form a group. Find the student who does not belong to that group.

- (A) S (B) P
(C) Q (D) W
(E) U

Q22 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. T sits three places away from W, who sits in the corner of the table. Only one person sits between W and P, who is an immediate neighbour of T. The number of persons sitting between P and U is the same as the number of persons sitting between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T is

not sitting second to the right of V. Q sits immediate right of W.

How many persons sit between V and S, when counted from right of S?

- (A) 1 (B) 3
(C) 2 (D) 4
(E) 5

Q23 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. T sits three places away from W, who sits in the corner of the table. Only one person sits between W and P, who is an immediate neighbour of T. The number of persons sitting between P and U is the same as the number of persons sitting between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T is not sitting second to the right of V. Q sits immediate right of W.

Who among the following friends sits immediately left of P?

- (A) R (B) S
(C) Q (D) V
(E) T

Q24 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. T sits three places away from W, who sits in the corner of the table. Only one

person sits between W and P, who is an immediate neighbour of T. The number of persons sitting between P and U is the same as the number of persons sitting between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T is not sitting second to the right of V. Q sits immediate right of W.

Who among the following is adjacent to T?

- (A) R (B) V
(C) P (D) Q
(E) U

Q25 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle of the side of the table. All the information is not necessarily in the same order. T sits three places away from W, who sits in the corner of the table. Only one person sits between W and P, who is an immediate neighbour of T. The number of persons sitting between P and U is the same as the number of persons sitting between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T is not sitting second to the right of V. Q sits immediate right of W.

Who among the following sits opposite to R?

- (A) S (B) P
(C) Q (D) W
(E) T

Q26 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and

four of them are seated in the middle side of the table. All the information is not necessarily in the same order. Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left of T. Q is not an immediate neighbour of T. R sits opposite U. S sits second to the left of P. The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. W sits second to the right of T. V is not an immediate neighbour of W.

How many persons sit between P and Q when counted to the right of Q?

- (A) 1 (B) 2
(C) 3 (D) 4
(E) 5

Q27 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle side of the table. All the information is not necessarily in the same order. Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left of T. Q is not an immediate neighbour of T. R sits opposite U. S sits second to the left of P. The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. W sits second to the right of T. V is not an immediate neighbour of W.

What is the position of V with respect to Q?

- (A) Second to the right
(B) Third to the right
(C) Immediate right
(D) Fourth to the left
(E) Fourth to the right

Q28

Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle side of the table. All the information is not necessarily in the same order. Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left of T. Q is not an immediate neighbour of T. R sits opposite U. S sits second to the left of P. The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. W sits second to the right of T. V is not an immediate neighbour of W.

Who among the following person seated at the corner of the table?

- (A) V (B) S
(C) R (D) U
(E) Q

Q29 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle side of the table. All the information is not necessarily in the same order. Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left of T. Q is not an immediate neighbour of T. R sits opposite U. S sits second to the left of P. The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. W sits second to the right of T. V is not an immediate neighbour of W.

Who among the following person seated second to the right of the one who is

immediate left of R?

- (A) U (B) P
(C) Q (D) W
(E) T

Q30 Study the following information and answer the given questions.

Twelve people are sitting around a rectangular-shaped table facing inwards. One person is sitting at one corner each and two people are sitting along each side. No one among Q, U, or Z is sitting at the corner of the table. Only one person is sitting between P and S. O is sitting third to the right of N and is sitting second to the left of V. The number of people sitting between U and Q when counted from the left of Q is not more than three. Only three people are sitting between P and Y, who is not sitting along the longer side of the table. Five people are sitting between S and R, who is sitting third to the right of T. Only one person is sitting between Y and N, who is not sitting along the longer side of the table. X is sitting in one of the corners of the table and is sitting immediately to the left of R. The number of people sitting between Z and Q is one more than the number of people sitting between X and O.

Which of the following statements is correct?

- (A) Five people are sitting between T and Q.
(B) Z and R are sitting adjacent to each other.
(C) S is sitting third to the left of Q.
(D) Four people are sitting between P and O.
(E) Both (a) and (d)

Q31 Study the following information and answer the given questions.

Twelve people are sitting around a rectangular-shaped table facing inwards. One person is sitting at one corner each and two people are sitting along each side. No one among Q, U, or Z is sitting at the corner of the table. Only one

person is sitting between P and S. O is sitting third to the right of N and is sitting second to the left of V. The number of people sitting between U and Q when counted from the left of Q is not more than three. Only three people are sitting between P and Y, who is not sitting along the longer side of the table. Five people are sitting between S and R, who is sitting third to the right of T. Only one person is sitting between Y and N, who is not sitting along the longer side of the table. X is sitting in one of the corners of the table and is sitting immediately to the left of R. The number of people sitting between Z and Q is one more than the number of people sitting between X and O.

Who among the following is not sitting in the corner of the table?

- (A) P (B) N
(C) X (D) O
(E) T

Q32 Study the following information and answer the given questions.

Twelve people are sitting around a rectangular-shaped table facing inwards. One person is sitting at one corner each and two people are sitting along each side. No one among Q, U, or Z is sitting at the corner of the table. Only one person is sitting between P and S. O is sitting third to the right of N and is sitting second to the left of V. The number of people sitting between U and Q when counted from the left of Q is not more than three. Only three people are sitting between P and Y, who is not sitting along the longer side of the table. Five people are sitting between S and R, who is sitting third to the right of T. Only one person is sitting between Y and N, who is not sitting along the longer side of the table. X is sitting in one of the corners of the table and is sitting immediately to the left of R. The number of people sitting between Z and Q is

one more than the number of people sitting between X and O.

Who among the following is related to N in the same way as P is related to R?

- (A) T (B) Z
(C) R (D) U
(E) X

Q33 Study the following information and answer the given questions.

Twelve people are sitting around a rectangular-shaped table facing inwards. One person is sitting at one corner each and two people are sitting along each side. No one among Q, U, or Z is sitting at the corner of the table. Only one person is sitting between P and S. O is sitting third to the right of N and is sitting second to the left of V. The number of people sitting between U and Q when counted from the left of Q is not more than three. Only three people are sitting between P and Y, who is not sitting along the longer side of the table. Five people are sitting between S and R, who is sitting third to the right of T. Only one person is sitting between Y and N, who is not sitting along the longer side of the table. X is sitting in one of the corners of the table and is sitting immediately to the left of R. The number of people sitting between Z and Q is one more than the number of people sitting between X and O.

Who among the following is/are sitting along the longer side of the table?

- I. U
II. Q
III. P
(A) Only I (B) Only II
(C) Only III (D) Only I and III
(E) Only I and II

Q34 Study the following information and answer the given questions.

Twelve people are sitting around a rectangular-shaped table facing inwards. One person is sitting at one corner each and two people are sitting along each side. No one among Q, U, or Z is sitting at the corner of the table. Only one person is sitting between P and S. O is sitting third to the right of N and is sitting second to the left of V. The number of people sitting between U and Q when counted from the left of Q is not more than three. Only three people are sitting between P and Y, who is not sitting along the longer side of the table. Five people are sitting between S and R, who is sitting third to the right of T. Only one person is sitting between Y and N, who is not sitting along the longer side of the table. X is sitting in one of the corners of the table and is sitting immediately to the left of R. The number of people sitting between Z and Q is one more than the number of people sitting between X and O.

_____ is sitting fourth to the right of _____.

- (A) S, X
- (B) Z, N
- (C) O, U
- (D) Y, T
- (E) Cannot be determined

Q35 Study the following information carefully and answer the questions accordingly.

Eight persons- P, Q, R, S, T, U, V, and W are sitting at the rectangular table facing the center. Four of them are seated at the corner of the table and four of them are seated in the middle side of the table. All the information is not necessarily in the same order. Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left of T. Q is not an immediate neighbour of T. R sits opposite U. S sits second to the left of P. The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. W sits second

to the right of T. V is not an immediate neighbour of W.

Who among the following person sits opposite P?

- (A) R
- (B) T
- (C) W
- (D) Q
- (E) S

Q36 Study the following information carefully and answer the questions accordingly.

Eight persons - A, B, C, D, E, F, G and H are sitting on a rectangular table such that all of them are facing towards the centre, but not necessarily in the same order. Four of them sit in the corners and four of them sit in the middle of the sides of the table. D is neither adjacent to B nor C. A sits on one of the sides of the table. One person sits between A and C. B sits third to the left of C. D sits second to the right of E. G sits third to the right of F. H neither sits adjacent to D nor E.

How many persons sit between A and G, when counted from the right of G?

- (A) Three
- (B) Two
- (C) None
- (D) One
- (E) Four

Q37 Study the following information carefully and answer the questions accordingly.

Eight persons - A, B, C, D, E, F, G and H are sitting on a rectangular table such that all of them are facing towards the centre, but not necessarily in the same order. Four of them sit in the corners and four of them sit in the middle of the sides of the table. D is neither adjacent to B nor C. A sits on one of the sides of the table. One person sits between A and C. B sits third to the left of C. D sits second to the right of E. G sits third to the right of F. H neither sits adjacent to D nor E.

What is the position of B with respect to D?

- (A) Second to the left
- (B) Third to the left
- (C) Second to the right
- (D) Immediate right
- (E) Second to the left

Q38 Study the following information carefully and answer the questions accordingly.

Eight persons - A, B, C, D, E, F, G and H are sitting on a rectangular table such that all of them are facing towards the centre, but not necessarily in the same order. Four of them sit in the corners and four of them sit in the middle of the sides of the table. D is neither adjacent to B nor C. A sits on one of the sides of the table. One person sits between A and C. B sits third to the left of C. D sits second to the right of E. G sits third to the right of F. H neither sits adjacent to D nor E.

Who among the following person sits exactly opposite to C?

- (A) E
- (B) D
- (C) H
- (D) F
- (E) A

Q39 Study the following information carefully and answer the questions accordingly.

Eight persons - A, B, C, D, E, F, G and H are sitting on a rectangular table such that all of them are facing towards the centre, but not necessarily in the same order. Four of them sit in the corners and four of them sit in the middle of the sides of the table. D is neither adjacent to B nor C. A sits on one of the sides of the table. One person sits between A and C. B sits third to the left of C. D sits second to the right of E. G sits third to the right of F. H neither sits adjacent to D nor E.

Who among the following person sits on the corner of the table?

- I) The one who sits to the immediate left of F
- II) B

- III) H
- (A) Only (I) and (II)
- (B) Only (I)
- (C) Only (I) and (III)
- (D) Only (II)
- (E) Only (III)

Q40 Study the following information carefully and answer the questions accordingly.

Eight persons - A, B, C, D, E, F, G and H are sitting on a rectangular table such that all of them are facing towards the centre, but not necessarily in the same order. Four of them sit in the corners and four of them sit in the middle of the sides of the table. D is neither adjacent to B nor C. A sits on one of the sides of the table. One person sits between A and C. B sits third to the left of C. D sits second to the right of E. G sits third to the right of F. H neither sits adjacent to D nor E.

Who among the following person sits third to the right of H?

- (A) C
- (B) A
- (C) F
- (D) E
- (E) B

Q41 Study the following information carefully and answer the questions accordingly.

Eight persons A, B, C, D, E, F, G and H are sitting on a rectangular table and all facing the centre such that two persons are sitting on each side of the rectangular table. The persons on opposite sides sit exactly opposite to each other. Only three persons sit between E and F. E sits adjacent to C who sits third to the left of H. C is not an immediate neighbor of B. Both G and B sit neither on the same side nor opposite sides of the table. F sits immediate right of D. Only two persons sit between G and A.

Four of the following five are alike in a certain way and thus form a group. Find the one that

doesn't belong to that group.

- (A) BG (B) HA
(C) FC (D) DH
(E) AE

Q42 Study the following information carefully and answer the questions accordingly.

Eight persons A, B, C, D, E, F, G and H are sitting on a rectangular table and all facing the centre such that two persons are sitting on each side of the rectangular table. The persons on opposite sides sit exactly opposite to each other. Only three persons sit between E and F. E sits adjacent to C who sits third to the left of H. C is not an immediate neighbor of B. Both G and B sit neither on the same side nor opposite sides of the table. F sits immediate right of D. Only two persons sit between G and A.

How many persons sit between E and D when counted from the left of E?

- (A) One
(B) Two
(C) Three
(D) More than three
(E) None of these

Q43 Study the following information carefully and answer the questions accordingly.

Eight persons A, B, C, D, E, F, G and H are sitting on a rectangular table and all facing the centre such that two persons are sitting on each side of the rectangular table. The persons on opposite sides sit exactly opposite to each other. Only three persons sit between E and F. E sits adjacent to C who sits third to the left of H. C is not an immediate neighbor of B. Both G and B sit neither on the same side nor opposite sides of the table. F sits immediate right of D. Only two persons sit between G and A.

In which of the following option, first person sits second to the right of the second person?

- (A) FA (B) BD
(C) GA (D) EC
(E) None of these

Q44 Study the following information carefully and answer the questions accordingly.

Eight persons A, B, C, D, E, F, G and H are sitting on a rectangular table and all facing the centre such that two persons are sitting on each side of the rectangular table. The persons on opposite sides sit exactly opposite to each other. Only three persons sit between E and F. E sits adjacent to C who sits third to the left of H. C is not an immediate neighbor of B. Both G and B sit neither on the same side nor opposite sides of the table. F sits immediate right of D. Only two persons sit between G and A.

What is the position of C with respect to B?

- (A) Second to the right
(B) Second to the left
(C) Third to the left
(D) Immediate right
(E) None of these

Q45 Study the following information carefully and answer the questions accordingly.

Eight persons A, B, C, D, E, F, G and H are sitting on a rectangular table and all facing the centre such that two persons are sitting on each side of the rectangular table. The persons on opposite sides sit exactly opposite to each other. Only three persons sit between E and F. E sits adjacent to C who sits third to the left of H. C is not an immediate neighbor of B. Both G and B sit neither on the same side nor opposite sides of the table. F sits immediate right of D. Only two persons sit between G and A.

Who among the following person sits opposite to the one who sits third to the right of F?

- (A) The one who sits immediate left of G
- (B) A

- (C) The one who sits opposite to D
- (D) H
- (E) None of these

Hints & Solutions

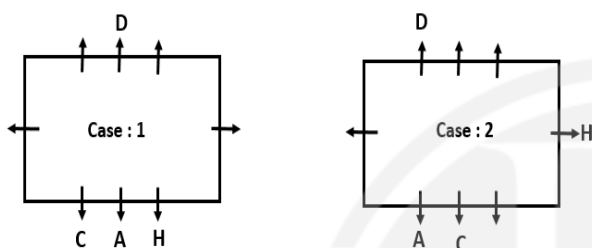

Q1 Text Solution:

D sits third to the left of H and sits opposite to A.

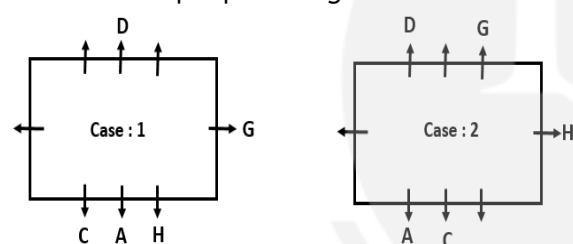

A and C sit near to each other.

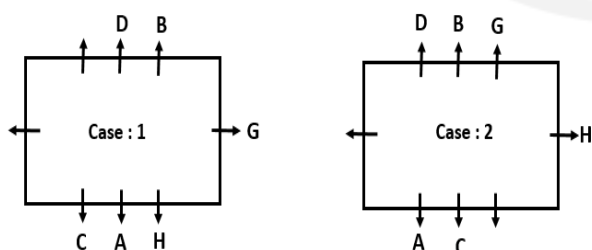

C does not sit on the shorter side of the table.

There are two people sitting between C and G.

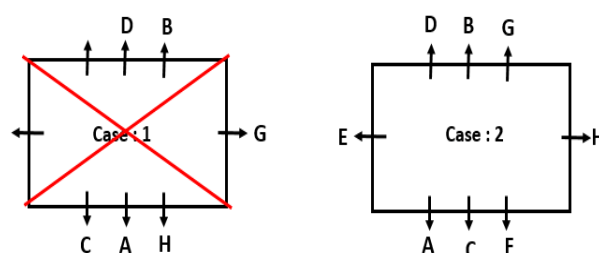

The number of people sitting between G and H is the same number of people sitting between G and B.

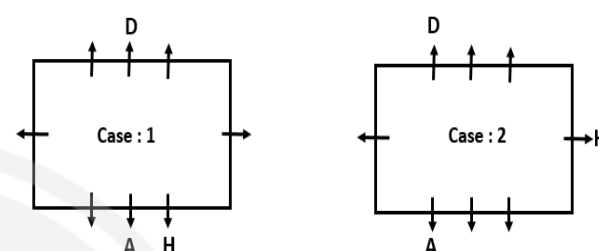

F sits third to the left of E.

Case 1: is eliminated.

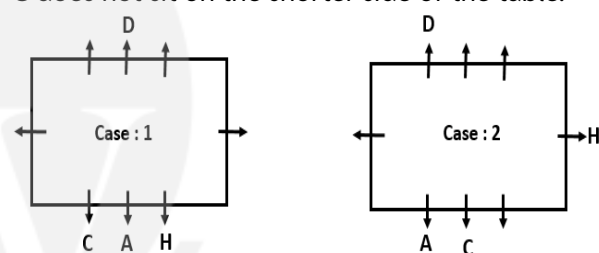

Q2 Text Solution:

D sits third to the left of H and sits opposite to A.

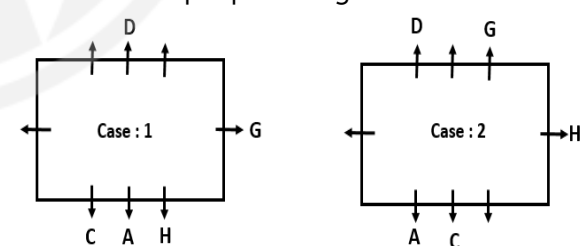

A and C sit near to each other.

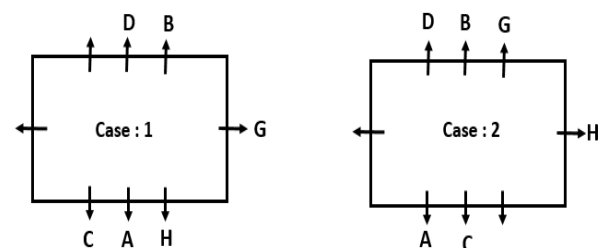

C does not sit on the shorter side of the table.

There are two people sitting between C and G.

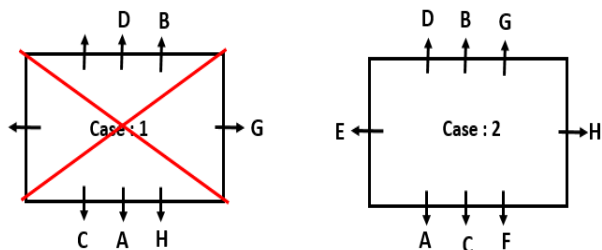

The number of people sitting between G and H is the same number of people sitting between G and B.

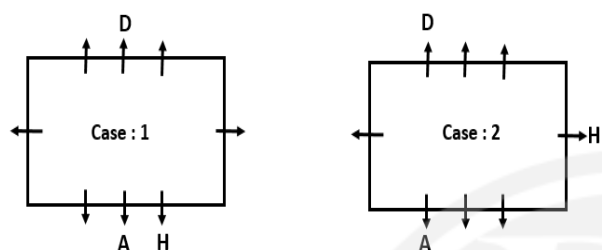

F sits third to the left of E.

Case 1: is eliminated.

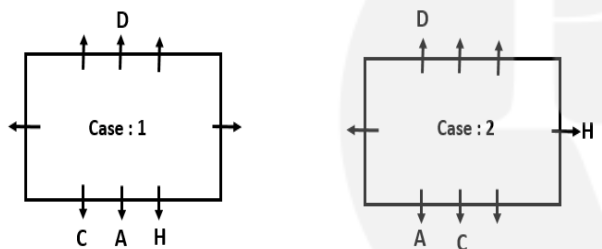

Q3 Text Solution:

D sits third to the left of H and sits opposite to A.

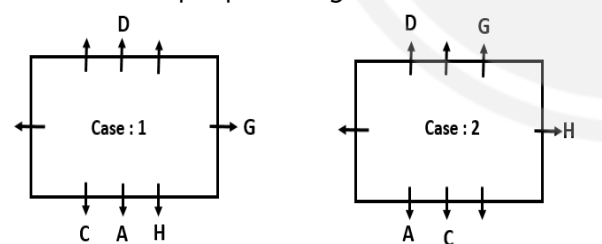

A and C sit near to each other.

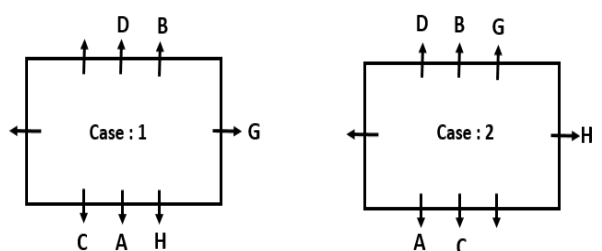

C does not sit on the shorter side of the table.

There are two people sitting between C and G.

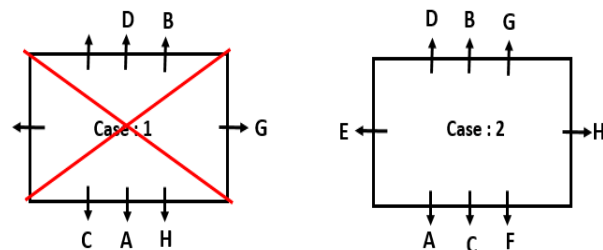

The number of people sitting between G and H is the same number of people sitting between G and B.

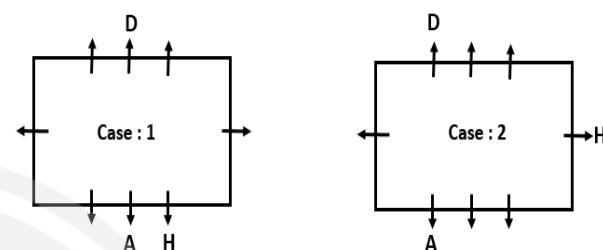

F sits third to the left of E.

Case 1: is eliminated.

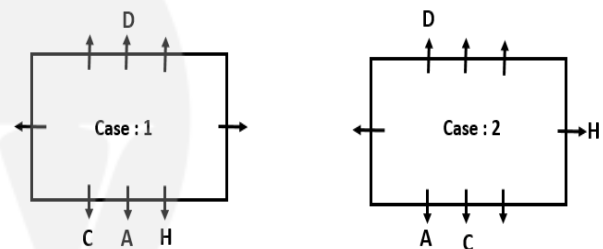

Q4 Text Solution:

D sits third to the left of H and sits opposite to A.

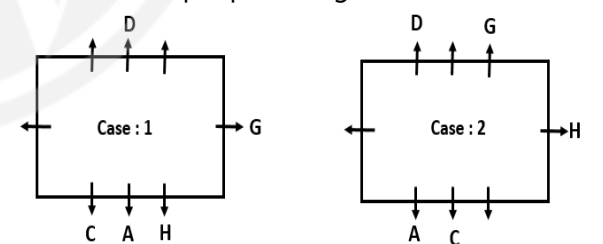

A and C sit near to each other.

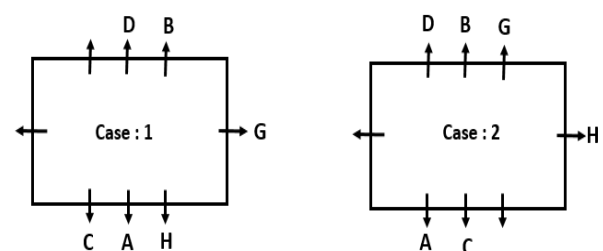

C does not sit on the shorter side of the table.

There are two people sitting between C and G.

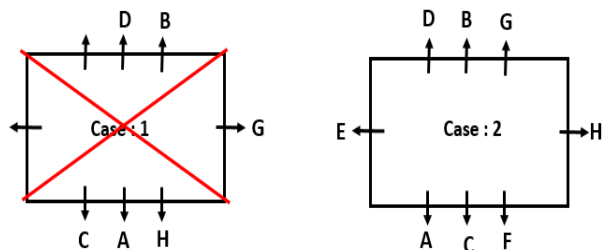

The number of people sitting between G and H is the same number of people sitting between G and B.

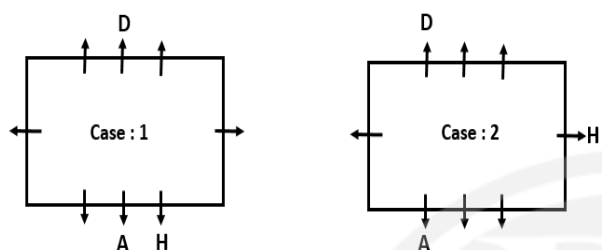

F sits third to the left of E.

Case 1: is eliminated.

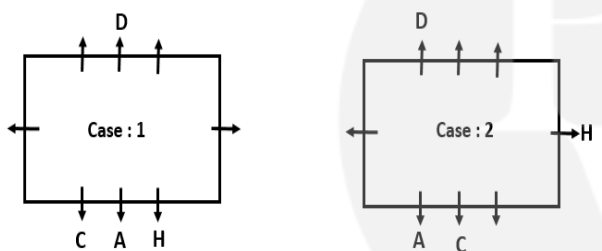

Q5 Text Solution:

D sits third to the left of H and sits opposite to A.

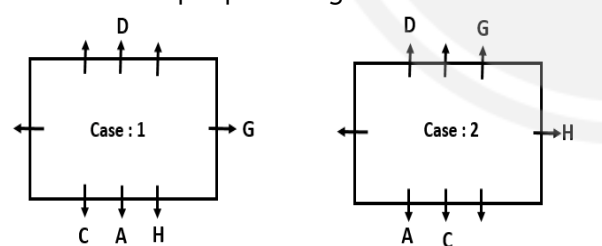

A and C sit near to each other.

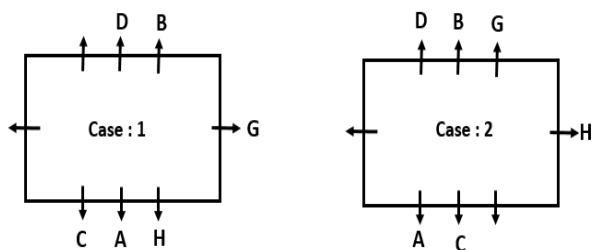

C does not sit on the shorter side of the table.

There are two people sitting between C and G.

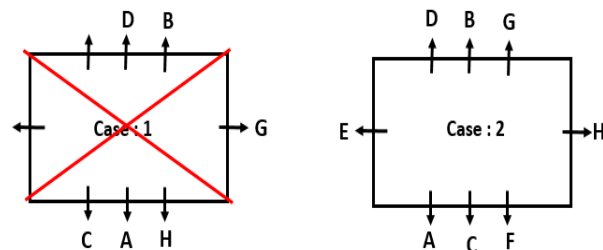

The number of people sitting between G and H is the same number of people sitting between G and B.

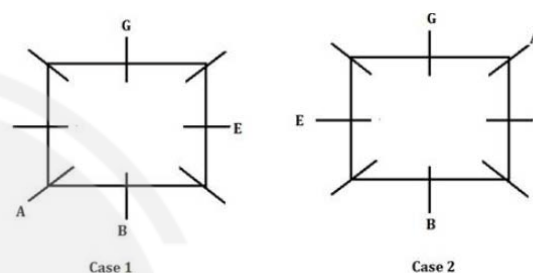

F sits third to the left of E.

Case 1: is eliminated.

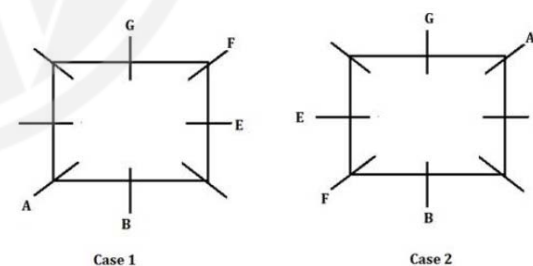

Q6 Text Solution:

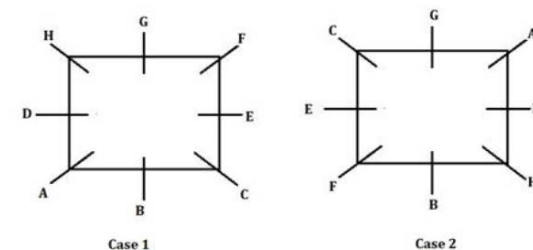

1. B is facing G. E is 3rd to the right of A. E is not neighbor of G or B. G is on the middle of the edge.

2. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). In case 1, 6 persons are between A and B and in Case 2, 2 persons are sitting between A and B.

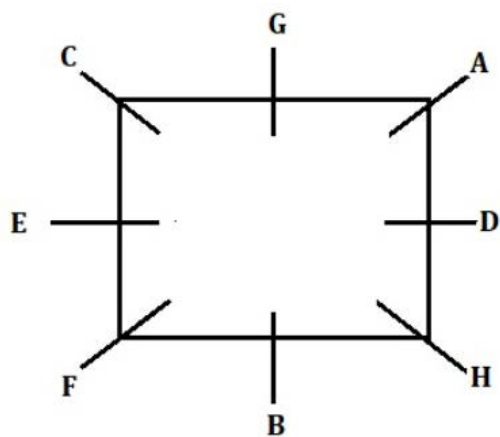

3. D is immediate right of H. C is not neighbor of B so case 1 is rejected.

Here is the final arrangement:

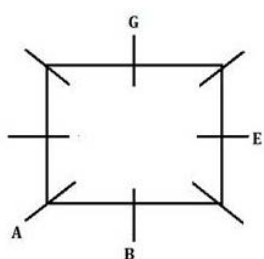

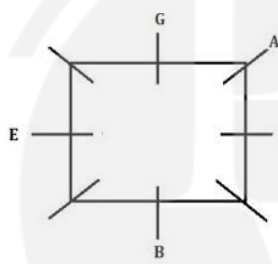

Only 1 person sitting between E and G so option B is correct

Q7 Text Solution:

1. B is facing G. E is 3rd to the right of A. E is not neighbor of G or B. G is on the middle of the edge.

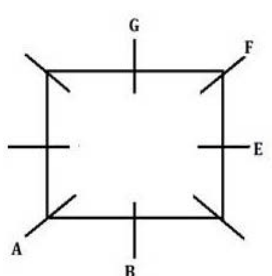

Case 1

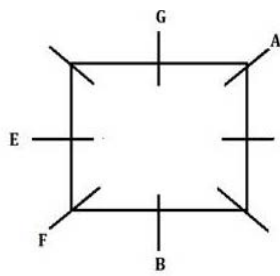

Case 2

2. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). In case 1, 6 persons are between A and B and in Case 2, 2 persons are sitting between A and B.

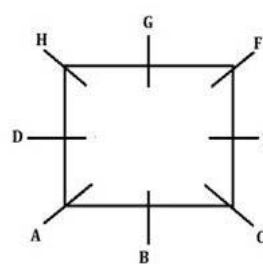

Case 1

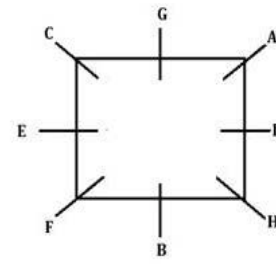

Case 2

3. D is immediate right of H. C is not neighbor of B so case 1 is rejected.

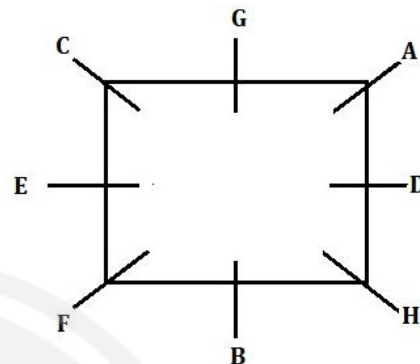

Case 1

Case 2

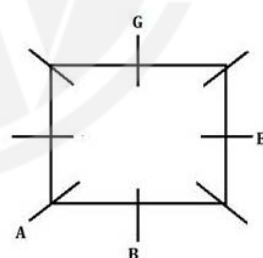

Here is the final arrangement:

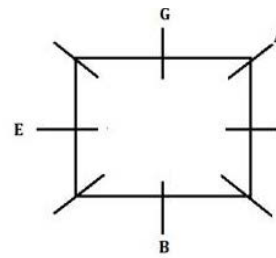

A and F is the only pair which is sitting opposite to each other so the option C is correct

Q8 Text Solution:

1. B is facing G. E is 3rd to the right of A. E is not neighbor of G or B. G is on the middle of the edge.

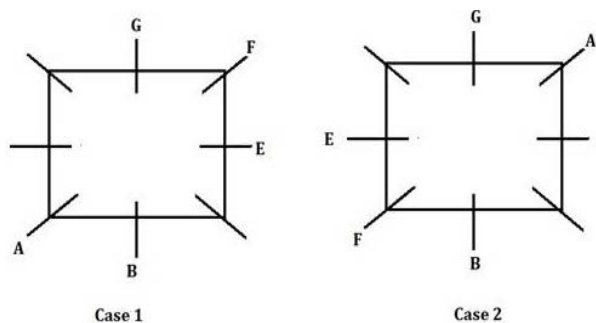

Case 1

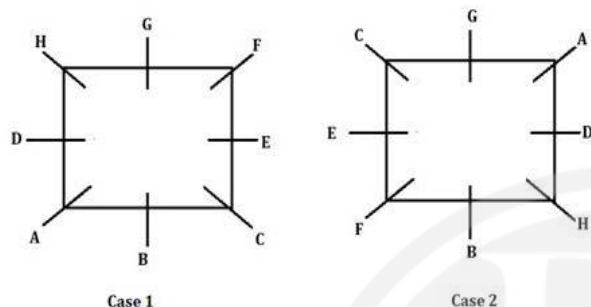

Case 2

2. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). In case 1, 6 persons are between A and B and in Case 2, 2 persons are sitting between A and B.

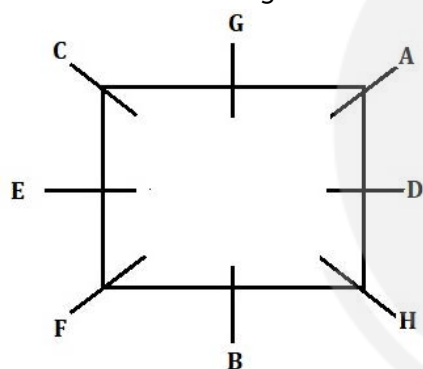

3. D is immediate right of H. C is not neighbor of B so case 1 is rejected.

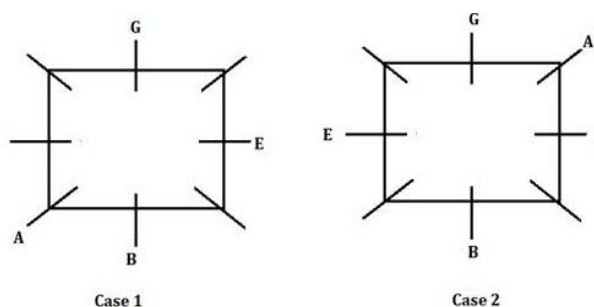

Here is the final arrangement:

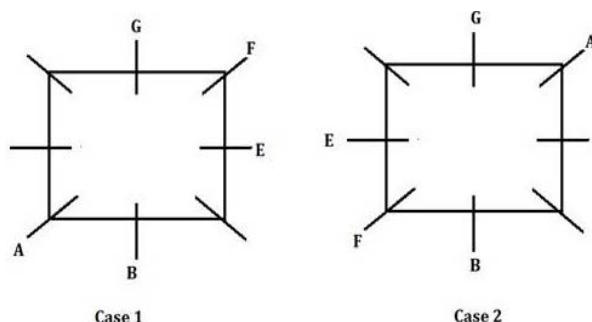

C is sitting 2nd to the left of F so, D is the correct option

Q9 Text Solution:

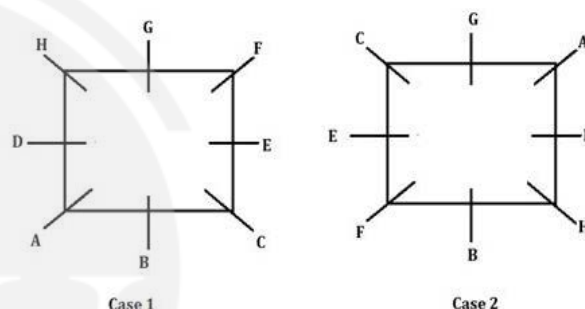

1. B is facing G. E is 3rd to the right of A. E is not neighbor of G or B. G is on the middle of the edge

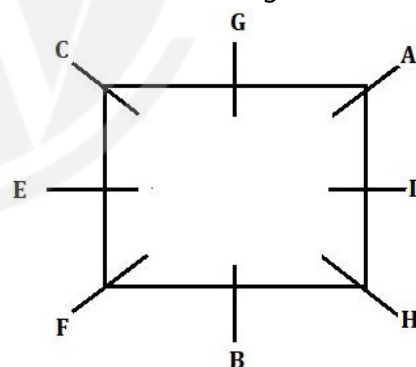

2. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). In case 1, 6 persons are between A and B and in Case 2, 2 persons are sitting between A and B.

3. D is immediate right of H. C is not neighbor of B so case 1 is rejected.

Here is the final arrangement:

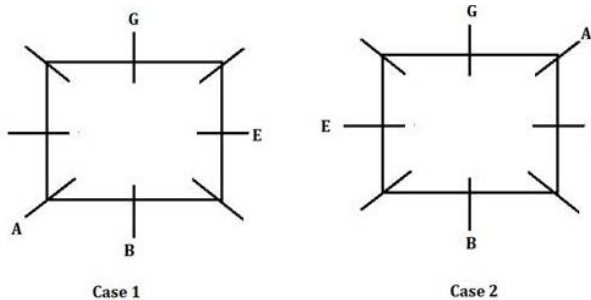

A is sitting 3rd to the right of B so Option A is correct

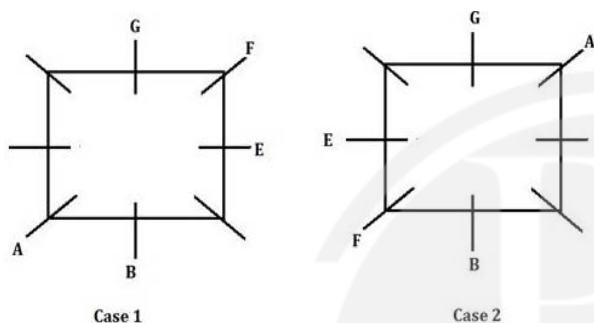

Q10 Text Solution:

1. B is facing G. E is 3rd to the right of A. E is not neighbor of G or B. G is on the middle of the edge

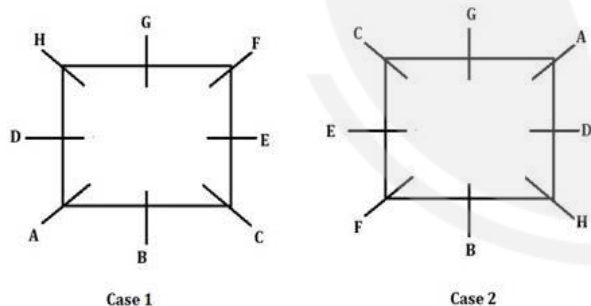

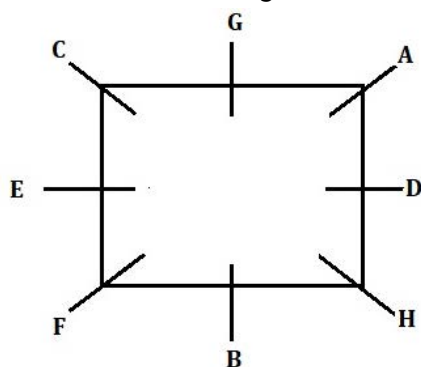

2. The number of person between A and B (if starts counting from the left of A) is same as F and G (if starts counting from the left of F). In case 1, 6 persons are between A and B and in Case 2, 2 persons are sitting between A and B.

3. D is immediate right of H. C is not neighbor of B so case 1 is rejected.

Here is the final arrangement:

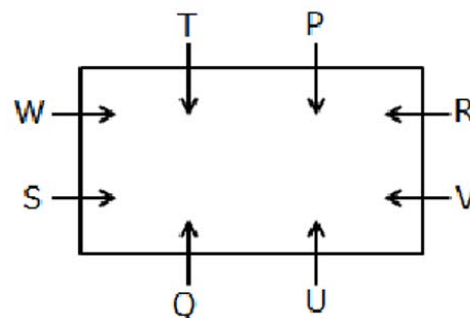

A and C are the neighbour of G out of these options A is the correct one

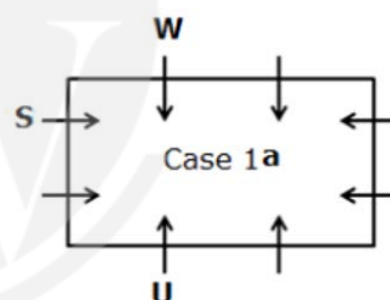

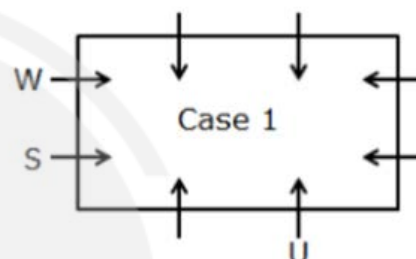

so Option A is the answer

Q11 Text Solution:

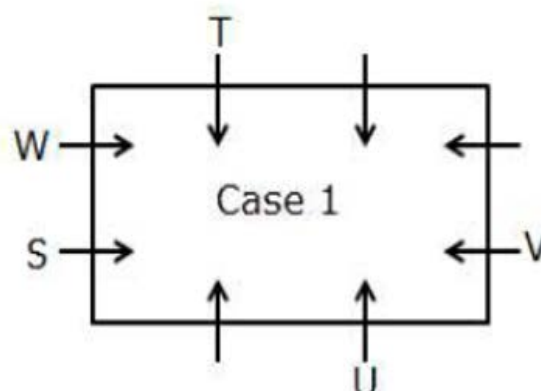

Final answer:

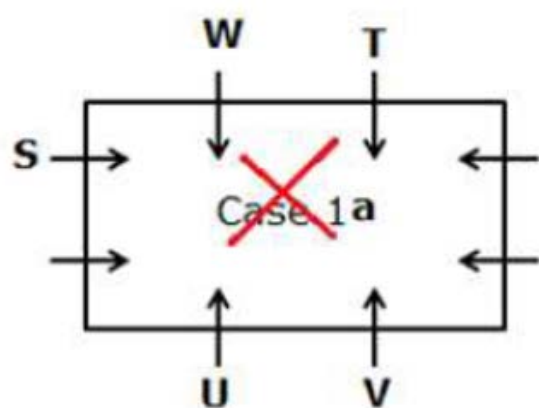

W sits third to the left of U, who is standing on the longer side. S is at W's immediate right. From these conditions, we get,

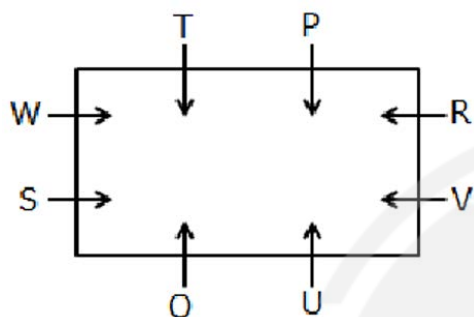

T sitting second to the left of S and third to the right of V, who is not opposite T. From this condition Case 1a gets rejected, and we get

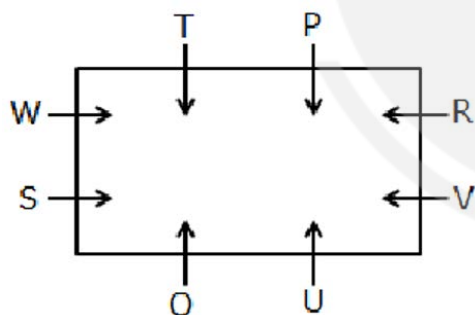

R sitting immediate left of P, who is not facing Q.

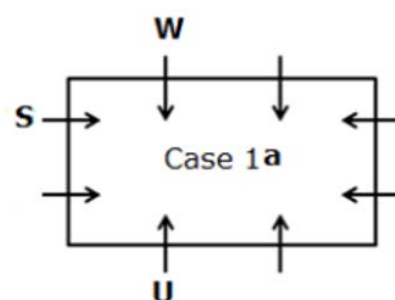

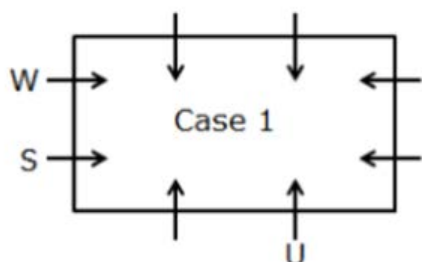

Hence, **one person, counting from the right of U, are there between R and U.**

Q12 Text Solution:

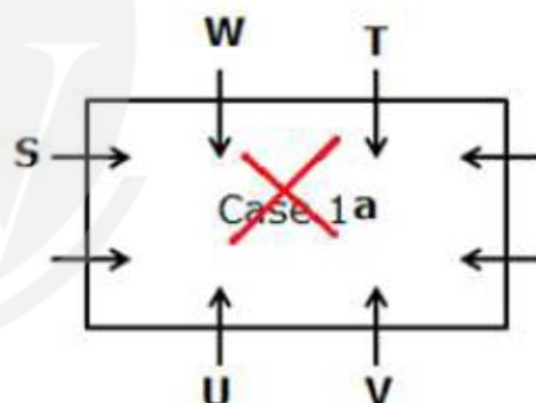

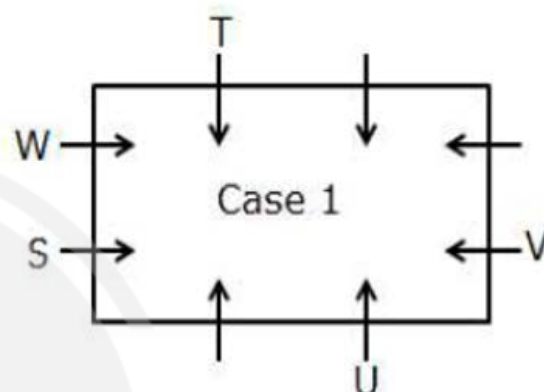

Final answer:

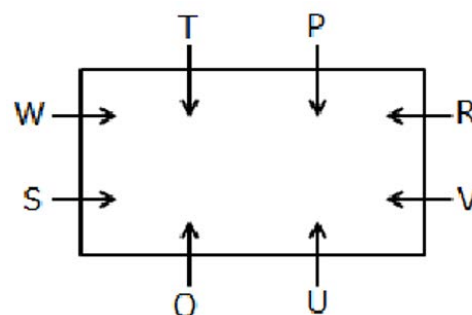

W sits third to the left of U, who is standing on the longer side. S is at W's immediate right. From these conditions, we get,

T sitting second to the left of S and third to the right of V, who is not opposite T. From this condition Case 1a gets rejected, and we get

R sitting immediate left of P, who is not facing Q.

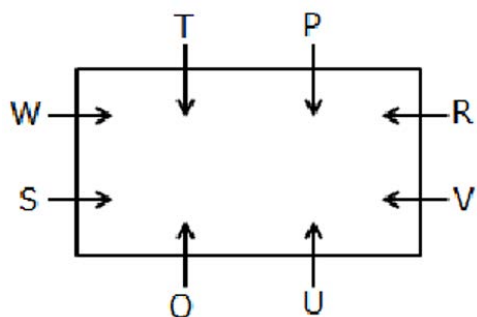

Hence, **the position of V with respect to Q is second to the right.**

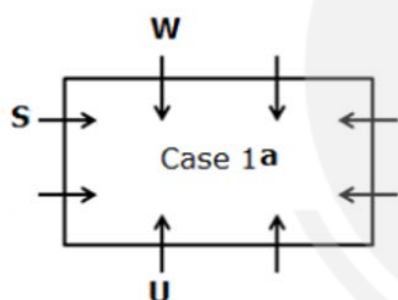

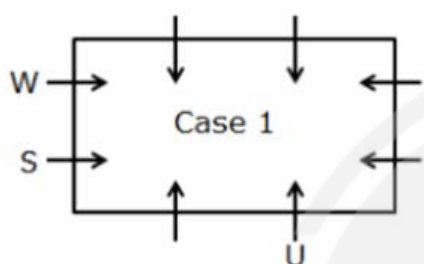

Q13 Text Solution:

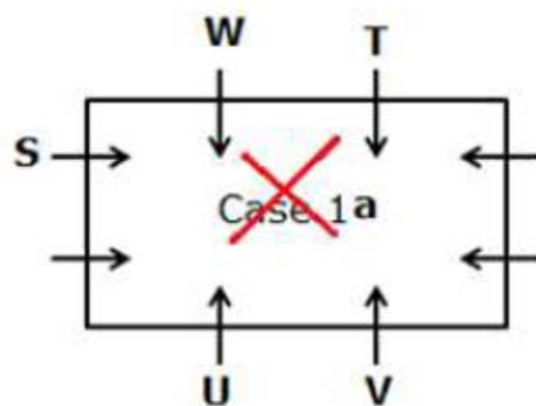

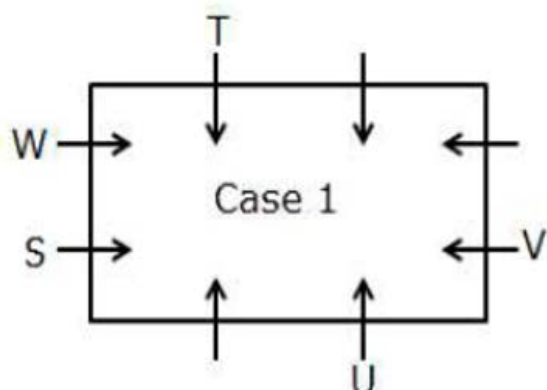

Final answer:

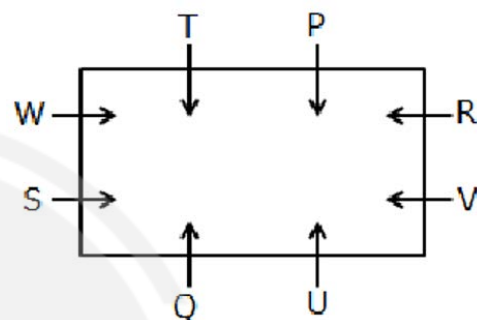

W sits third to the left of U, who is standing on the longer side. S is at W's immediate right. From these conditions, we get,

T sitting second to the left of S and third to the right of V, who is not opposite T. From this condition Case 1a gets rejected, and we get

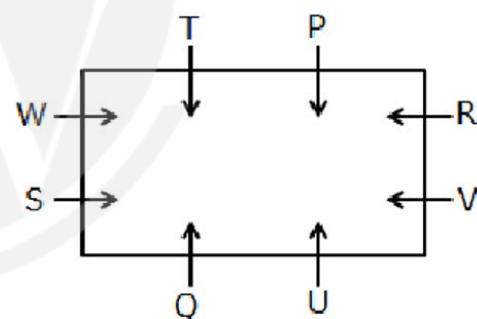

R sitting immediate left of P, who is not facing Q.

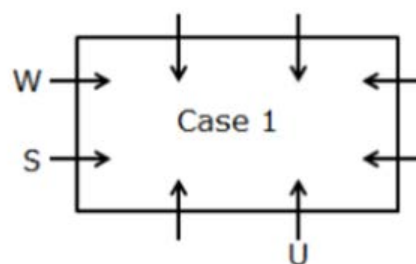

Hence, Q is facing T.

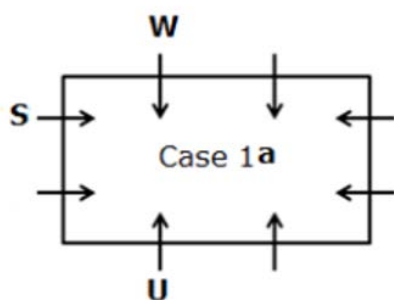

Q14 Text Solution:

Final answer:

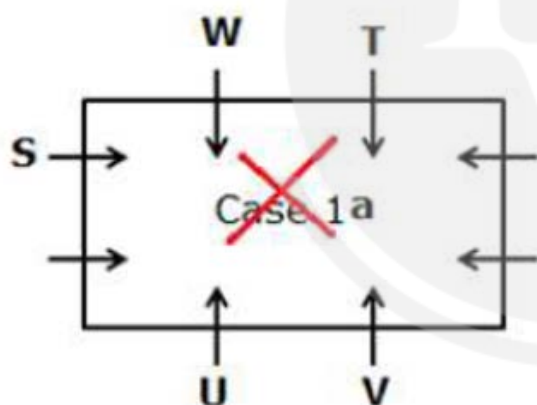

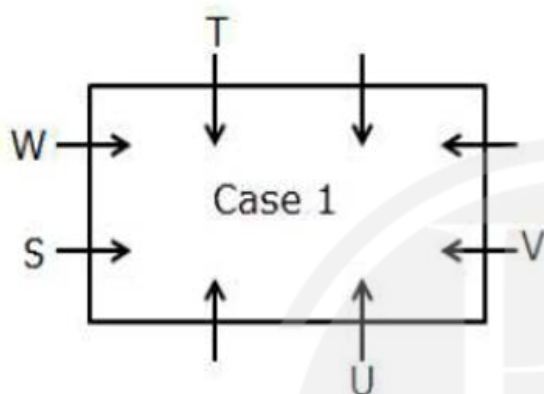

W sits third to the left of U, who is standing on the longer side. S is at W's immediate right. From these conditions, we get,

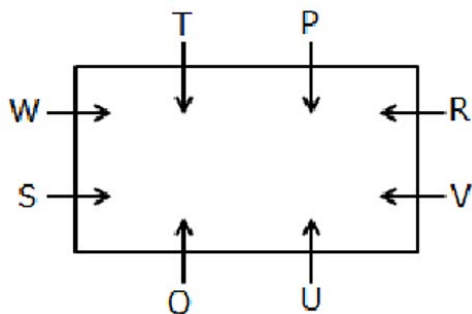

T sitting second to the left of S and third to the right of V, who is not opposite T. From this condition Case 1a gets rejected, and we get

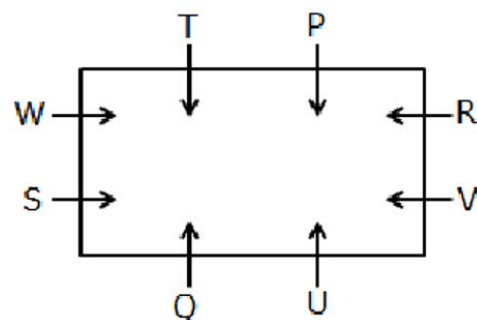

R sitting immediate left of P, who is not facing Q.

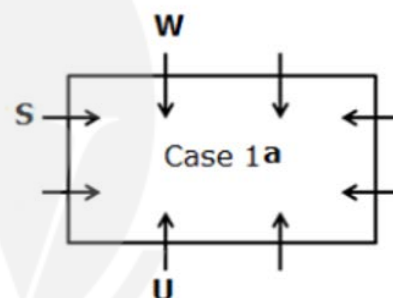

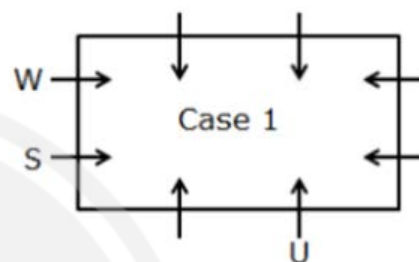

Hence, **Q is sitting immediately to the U's left.**

Q15 Text Solution:

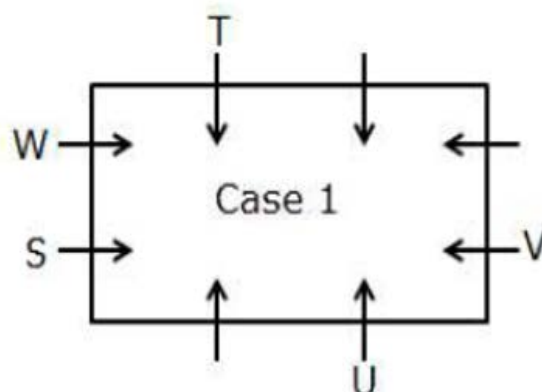

Final answer:

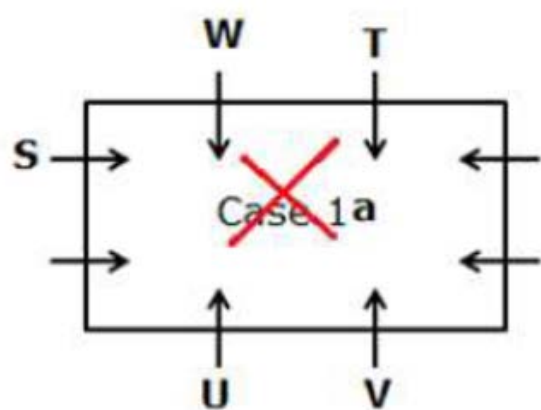

W sits third to the left of U, who is standing on the longer side. S is at W's immediate right. From these conditions, we get,

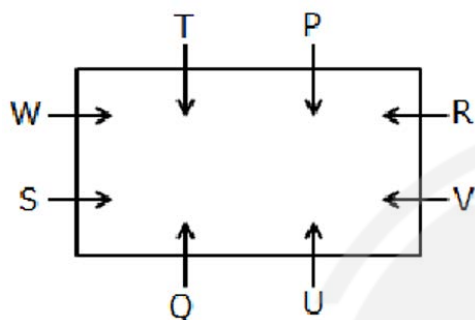

T sitting second to the left of S and third to the right of V, who is not opposite T. From this condition Case 1a gets rejected, and we get

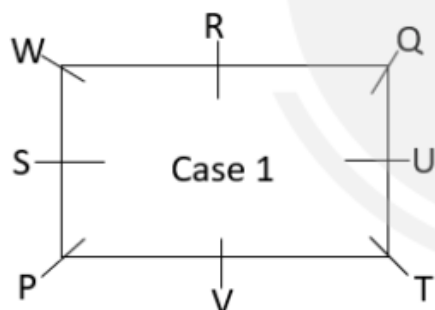

R sitting immediate left of P, who is not facing Q.

Hence, **P seated on the longer side of the table.**

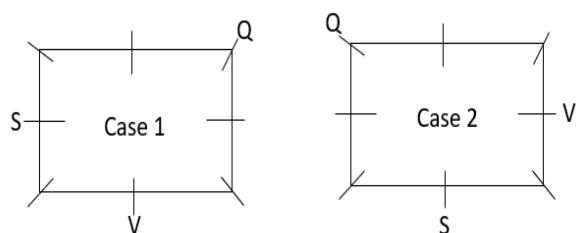

Q16 Text Solution:

Final answer:

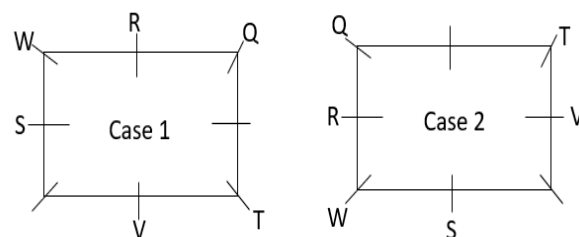

S sits second to the left of V, who is not sitting at the corner of the table. The one who sits opposite V is immediate right of Q.

From these conditions, we get,

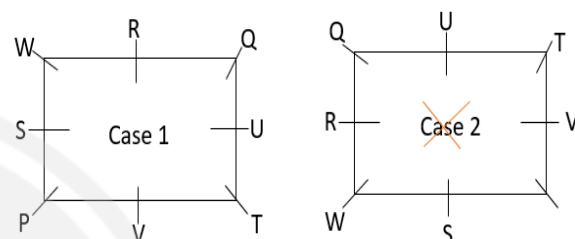

The number of persons sitting between S and Q is the same as the number of persons sitting

between T and S. Only three persons sit between V and R. W sits immediate left of S.

P sits second to the right of W.

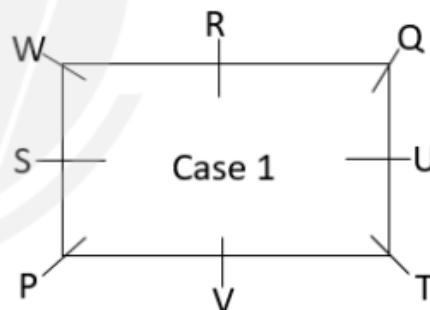

U sits immediate right of T but do not sit on the longer side of the table. From this condition Case 2 gets rejected, and we get

Hence, **One person sit between S and R when counted to the right of R.**

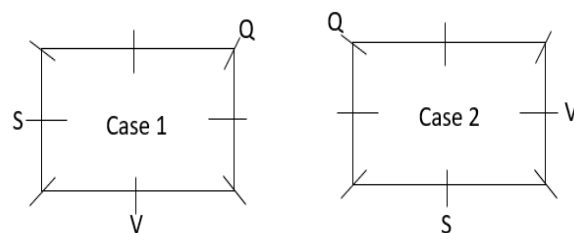

Q17 Text Solution:

Final answer:

S sits second to the left of V, who is not sitting at the corner of the table. The one who sits opposite V is immediate right of Q.

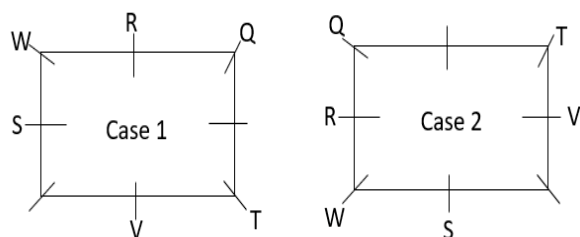

From these conditions, we get,

The number of persons sitting between S and Q is the same as the number of persons sitting

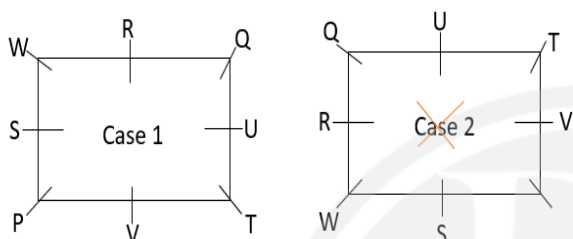

between T and S. Only three persons sit between V and R. W sits immediate left of S.

P sits second to the right of W.

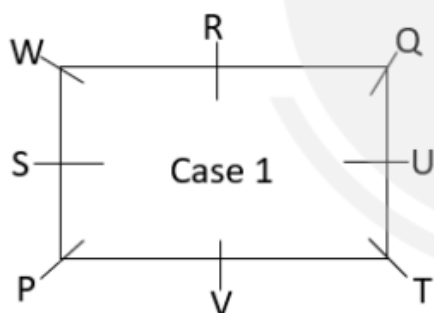

U sits immediate right of T but do not sit on the longer side of the table. From this condition Case 2 gets rejected, and we get

Hence, the position of Q with respect to U is Immediate right

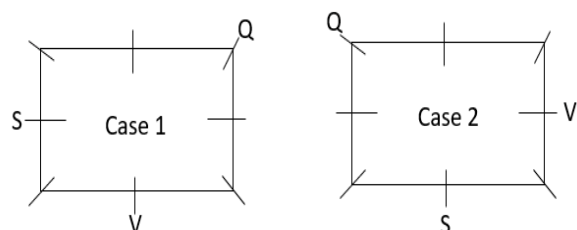

Q18 Text Solution:

Final answer:

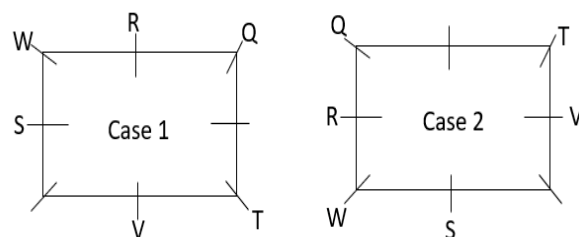

S sits second to the left of V, who is not sitting at the corner of the table. The one who sits opposite V is immediate right of Q.

From these conditions, we get,

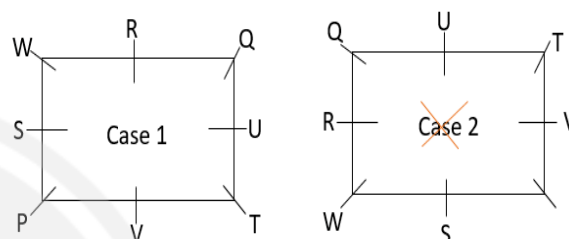

The number of persons sitting between S and Q is the same as the number of persons sitting

between T and S. Only three persons sit between V and R. W sits immediate left of S.

P sits second to the right of W.

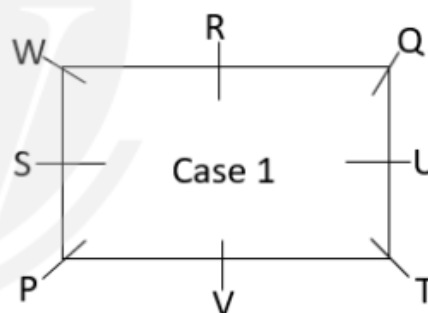

U sits immediate right of T but do not sit on the longer side of the table. From this condition Case 2 gets rejected, and we get

Hence, W seated at the corner of the table.

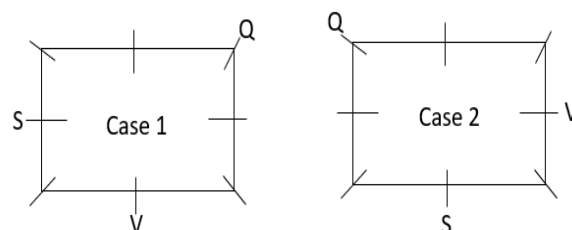

Q19 Text Solution:

Final answer:

S sits second to the left of V, who is not sitting at the corner of the table. The one who sits opposite V is immediate right of Q.

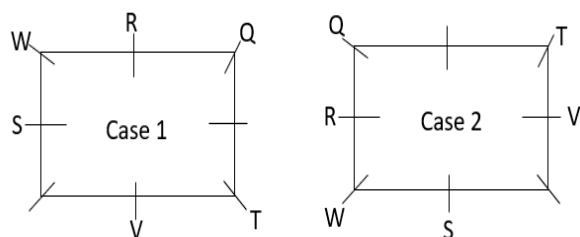

From these conditions, we get,

The number of persons sitting between S and Q is the same as the number of persons sitting

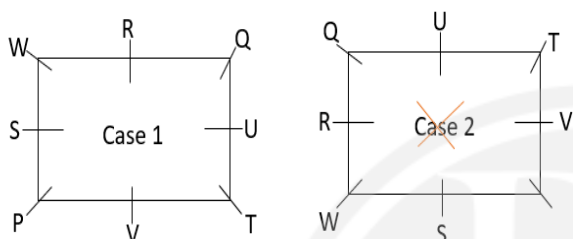

between T and S. Only three persons sit between V and R. W sits immediate left of S.

P sits second to the right of W.

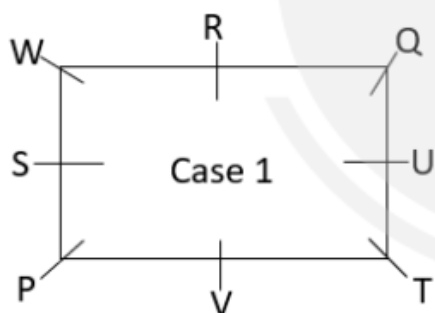

U sits immediate right of T but do not sit on the longer side of the table. From this condition Case 2 gets rejected, and we get

Hence, **R seated second to the right of the one who is immediate left of Q.**

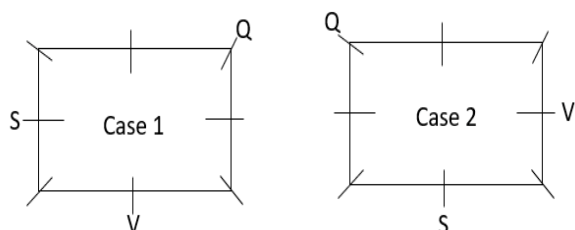

Q20 Text Solution:

Final answer:

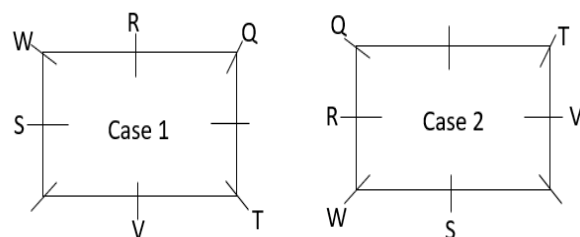

S sits second to the left of V, who is not sitting at the corner of the table. The one who sits opposite V is immediate right of Q.

From these conditions, we get,

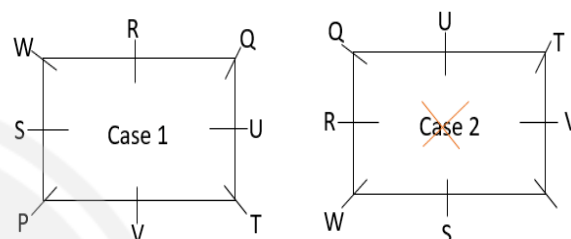

The number of persons sitting between S and Q is the same as the number of persons sitting

between T and S. Only three persons sit between V and R. W sits immediate left of S.

P sits second to the right of W.

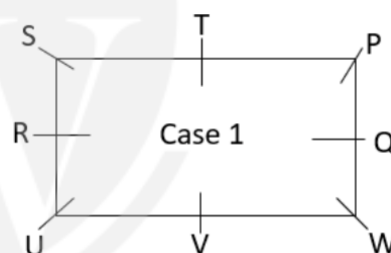

U sits immediate right of T but do not sit on the longer side of the table. From this condition Case 2 gets rejected, and we get

Hence, **Q sits opposite to P.**

Q21 Text Solution:

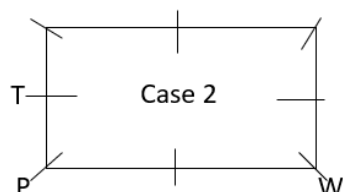

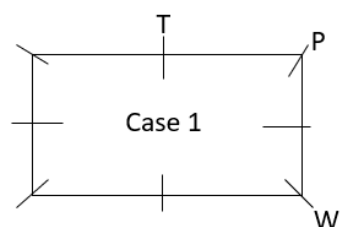

Final answer:

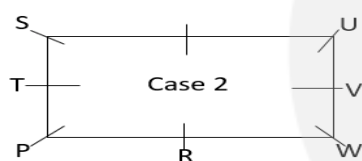

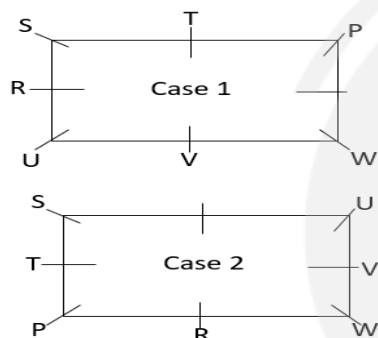

T sits three places away from W, who sits in corner of the table. Only one person sits between W and P, who is an immediate neighbour of T.

From these conditions, we get,

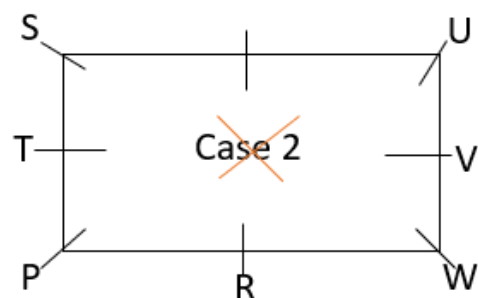

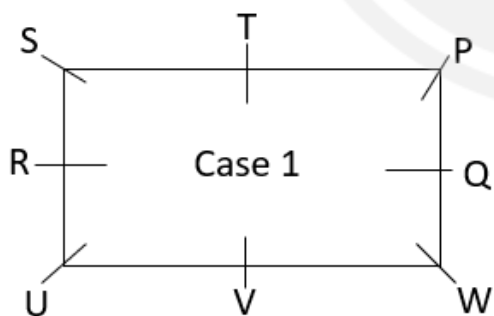

The number of persons sit between P and U is the same as the number of persons sit between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T does not sit second to the right of V.

Q sits immediate right of W. From this condition Case 2 gets rejected, and we get

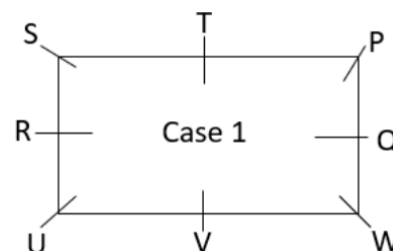

Logic - In all options, all persons sit in the corners of the table except option C

Hence, option C is the correct answer.

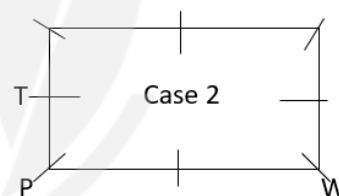

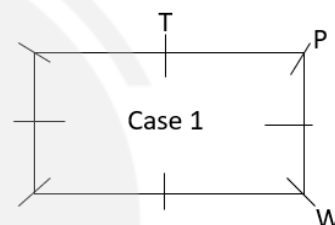

Q22 Text Solution:

Final answer:

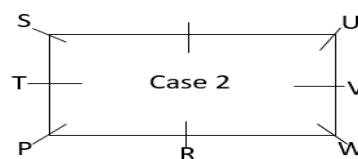

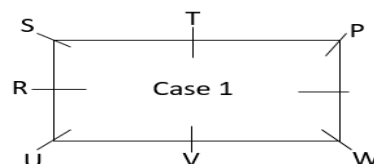

T sits three places away from W, who sits in corner of the table. Only one person sits between W and P, who is an immediate neighbour of T.

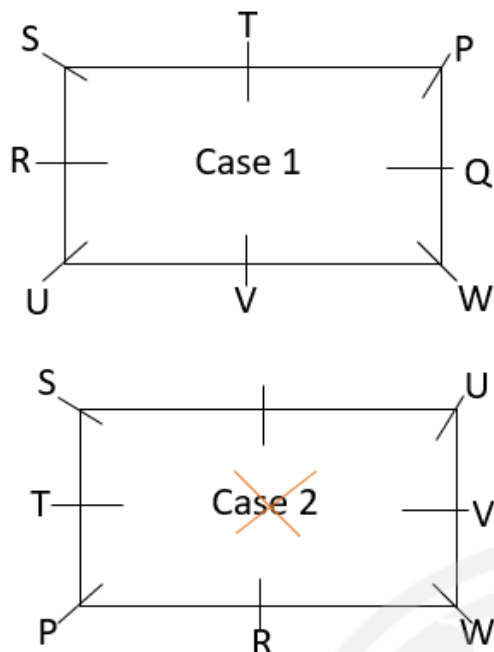

From these conditions, we get,

The number of persons sit between P and U is the same as the number of persons sit between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T does not sit second to the right of V.

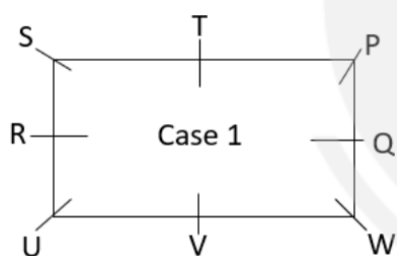

Q sits immediate right of W. From this condition Case, 2 gets rejected, and we get

Hence, two persons sit between V and S, when counted from right of S

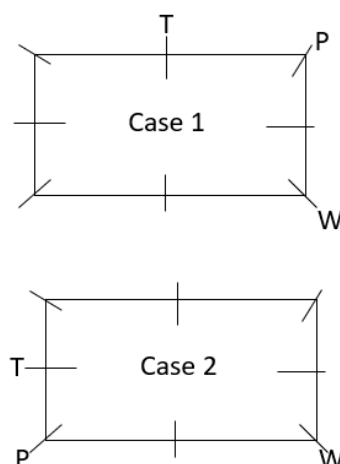

Q23 Text Solution:

Final answer:

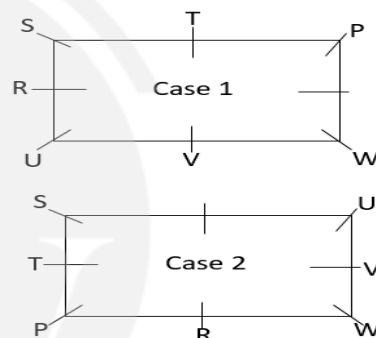

T sits three places away from W, who sits in corner of the table. Only one person sits between W and P, who is an immediate neighbour of T.

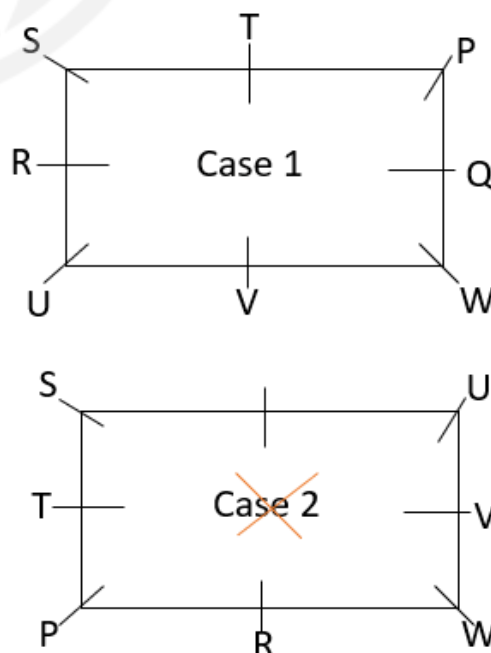

From these conditions, we get,

The number of persons sit between P and U is the same as the number of persons sit between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T does not sit second to the right of V.

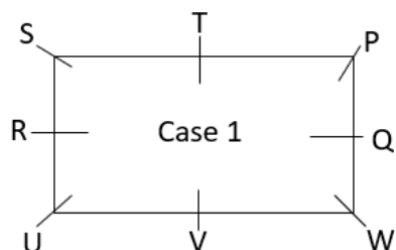

Q sits immediate right of W. From this condition Case, 2 gets rejected, and we get

Hence, Q sits immediately left of P

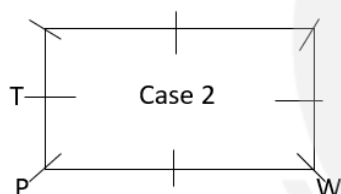

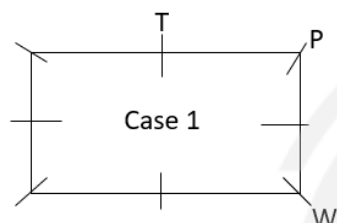

Q24 Text Solution:

Final answer:

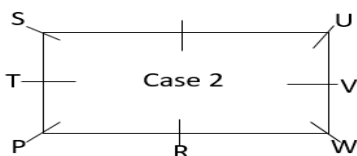

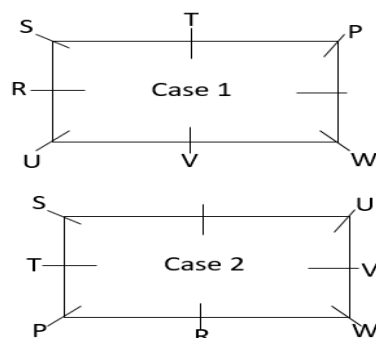

T sits three places away from W, who sits in corner of the table. Only one person sits between W and P, who is an immediate neighbour of T.

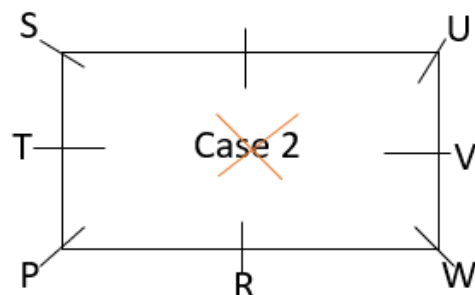

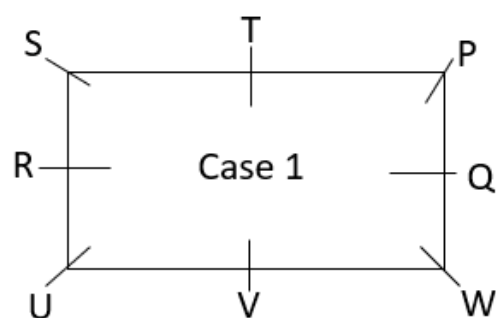

From these conditions, we get,

The number of persons sit between P and U is the same as the number of persons sit between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T does not sit second to the right of V.

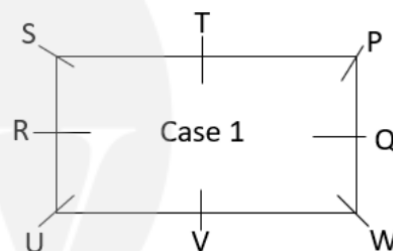

Q sits immediate right of W. From this condition Case, 2 gets rejected, and we get

Hence, P is adjacent to T

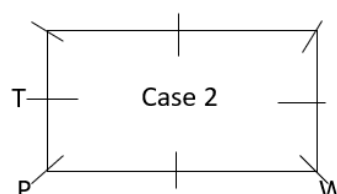

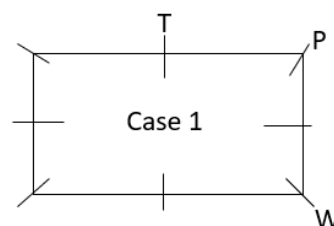

Q25 Text Solution:

Final answer:

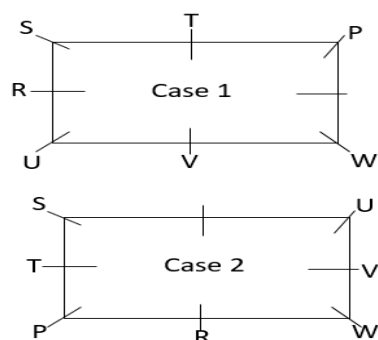

T sits three places away from W, who sits in corner of the table. Only one person sits between W and P, who is an immediate neighbour of T.

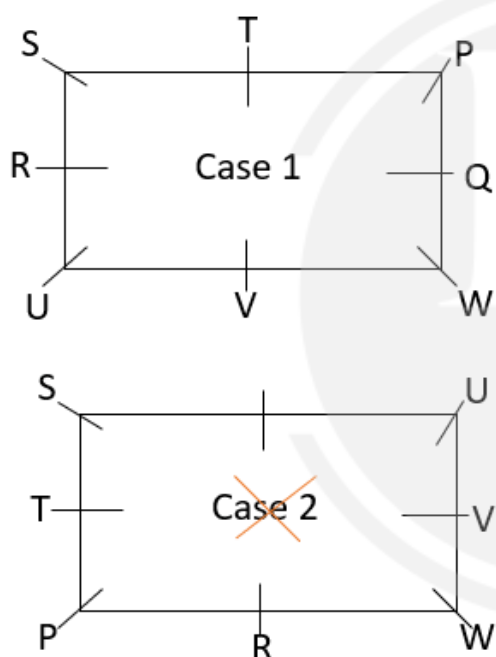

From these conditions, we get,

The number of persons sit between P and U is the same as the number of persons sit between W and S, who sit adjacent to T. R sits second to the left of V, who is not an immediate neighbour of S. T does not sit second to the right of V.

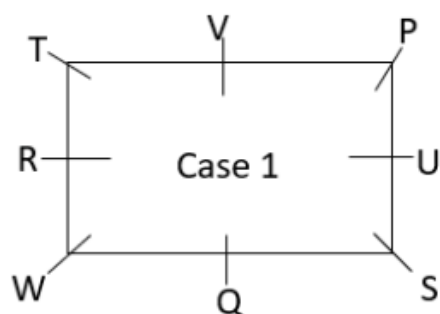

Q sits immediate right of W. From this condition Case, 2 gets rejected, and we get

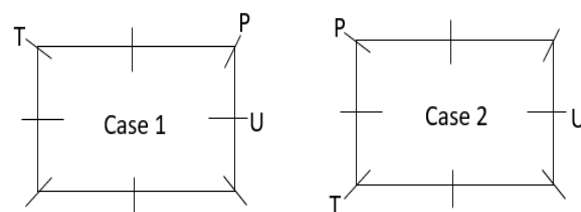

Hence, Q sits opposite to R

Q26 Text Solution:

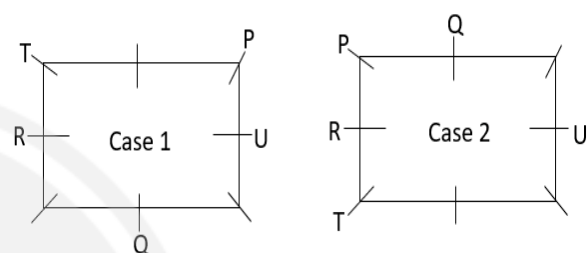

Final answer:

Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left of T. From these conditions, we get,

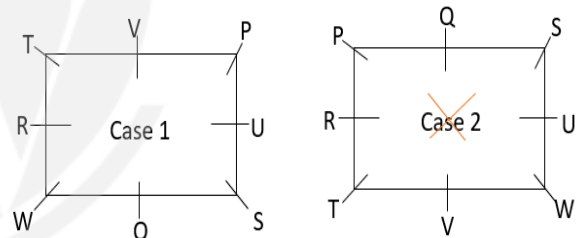

The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. Q is not an immediate neighbour of T. R sits opposite U.

S sits second to the left of P. W sits second to the right of T.

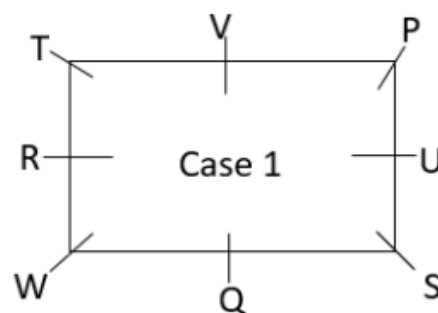

V is not an immediate neighbour of W. From this condition Case 2 gets rejected, and we get

Hence, two persons sit between P and Q when counted to the right of Q.

Q27 Text Solution:

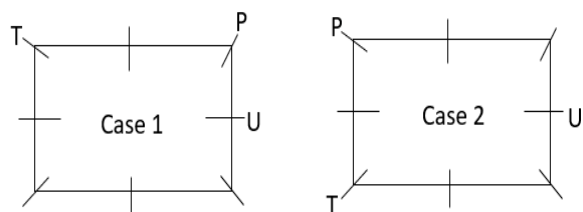

Final answer:

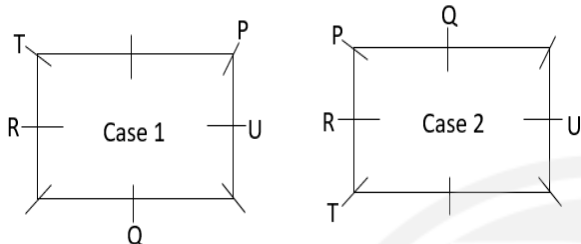

Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left

of T. From these conditions, we get,

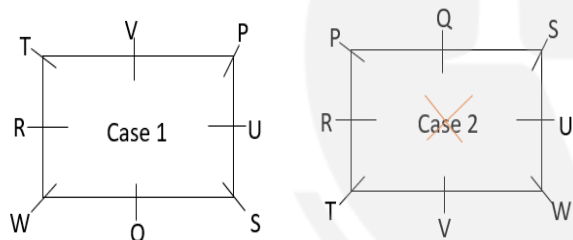

The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. Q is not an immediate neighbour of T. R sits opposite U.

S sits second to the left of P. W sits second to the right of T.

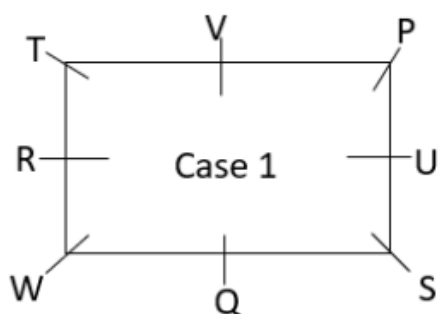

V is not an immediate neighbour of W. From this condition Case 2 gets rejected, and we get

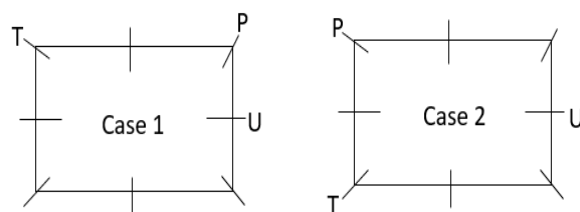

Hence, the position of V with respect to Q is **Fourth to the left**

Q28 Text Solution:

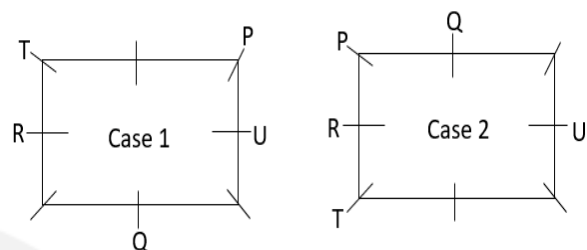

Final answer:

Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left of T. From these conditions, we get,

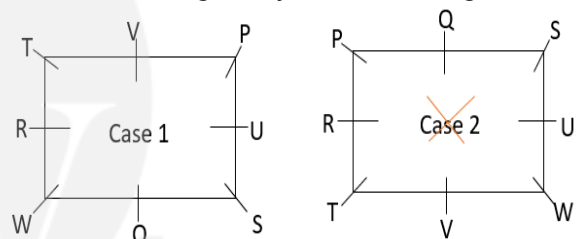

The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. Q is not an immediate neighbour of T. R sits opposite U.

S sits second to the left of P. W sits second to the right of T.

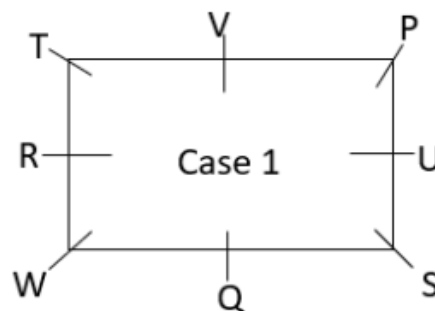

V is not an immediate neighbour of W. From this condition Case 2 gets rejected, and we get

Hence, **S seated at the corner of the table**

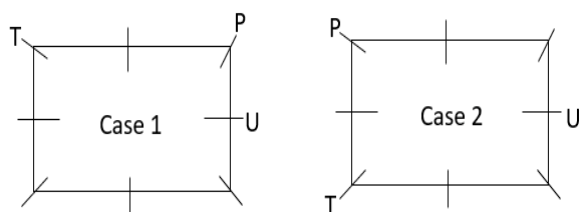

Q29 Text Solution:

Final answer:

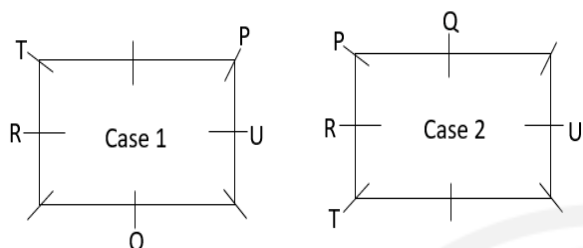

Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left of T. From these conditions, we get,

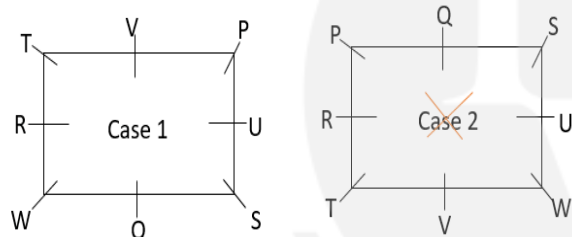

The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. Q is not an immediate neighbour of T. R sits opposite U.

S sits second to the left of P. W sits second to the right of T.

V is not an immediate neighbour of W. From this condition Case 2 gets rejected, and we get

Hence, **W seated second to the right of the one who is immediate left of R.**

Q30 Text Solution:

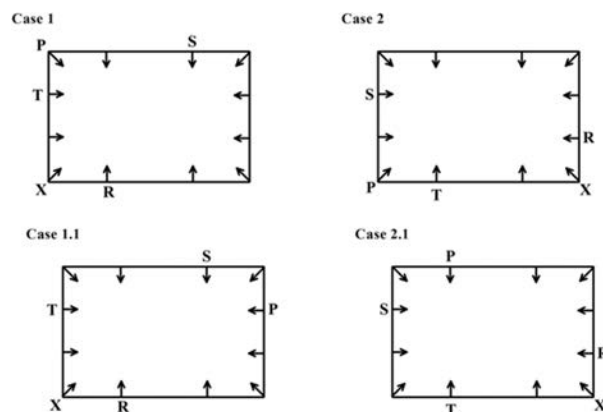

It is given that,

The twelve people are O, P, Q, R, S, T, U, V, W, X, Y and Z.

X is sitting in one of the corners of the table and is sitting immediately to the left of R.

Five people are sitting between S and R, who is sitting third to the right of T.

Only one person is sitting between P and S.

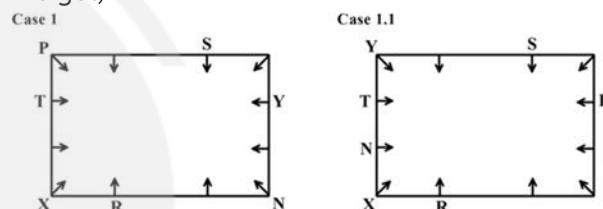

Only three people are sitting between P and Y, who is not sitting along the longer side of the table.

Here, case 2 is invalid.

Only one person is sitting between Y and N, who is not sitting along the longer side of the table.

Here, case 2.1 is invalid.

We get,

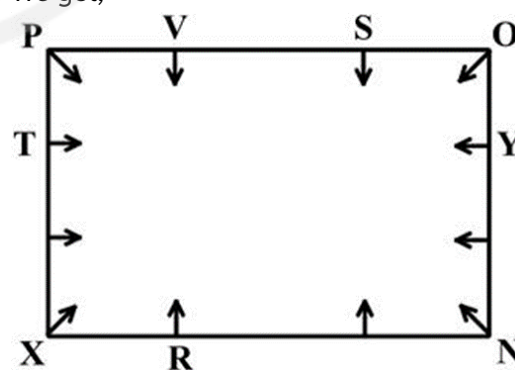

O is sitting third to the right of N and is sitting second to the left of V.

No one among Q, U, or Z is sitting at the corner of the table.

Here, case 1.1 is invalid.

We get,

The number of people sitting between Z and Q is one more than the number of people sitting between X and O.

Hence, six people are sitting between Z and Q.

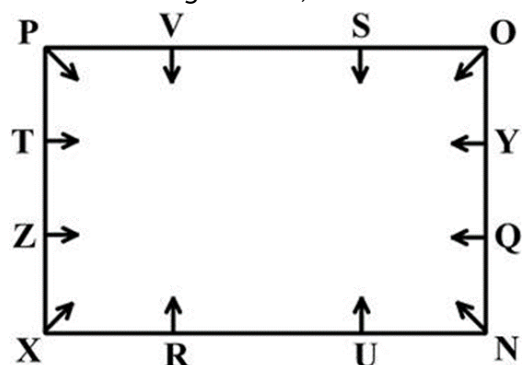

The number of people sitting between U and Q when counted from the left of Q is not more than

three.

Hence, U is sitting second to the left of Q.

The final arrangement is,

Here, option (a) is the correct answer.

Q31 Text Solution:

It is given that,

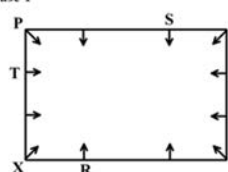

The twelve people are O, P, Q, R, S, T, U, V, W, X, Y and Z.

X is sitting in one of the corners of the table and is sitting immediately to the left of R.

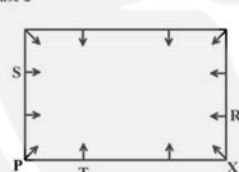

Five people are sitting between S and R, who is sitting third to the right of T.

Only one person is sitting between P and S.

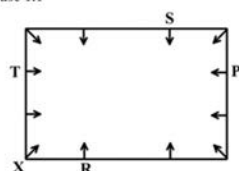

Case 1

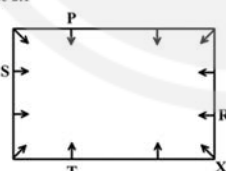

Case 2

Case 1.1

Case 2.1

Only three people are sitting between P and Y, who is not sitting along the longer side of the table.

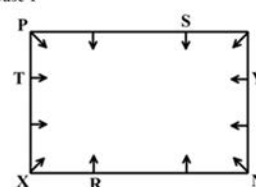

Here, case 2 is invalid.

Only one person is sitting between Y and N, who is not sitting along the longer side of the table.

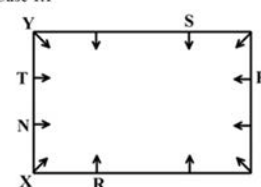

Here, case 2.1 is invalid.

We get,

Case 1

Case 1.1

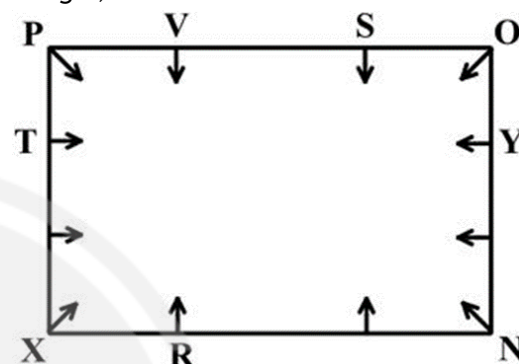

O is sitting third to the right of N and is sitting second to the left of V.

No one among Q, U, or Z is sitting at the corner of the table.

Here, case 1.1 is invalid.

We get,

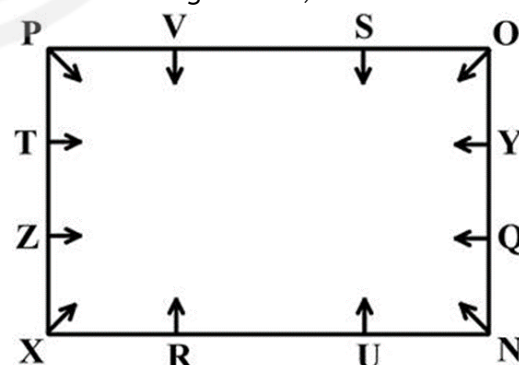

The number of people sitting between Z and Q is one more than the number of people sitting between X and O.

Hence, six people are sitting between Z and Q.

The number of people sitting between U and Q when counted from the left of Q is not more than three.

Hence, U is sitting second to the left of Q.

The final arrangement is,

Here, T is not sitting in the corner of the table.

Q32 Text Solution:

It is given that,

The twelve people are O, P, Q, R, S, T, U, V, W, X, Y and Z.

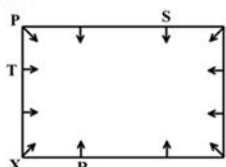

X is sitting in one of the corners of the table and is sitting immediately to the left of R.

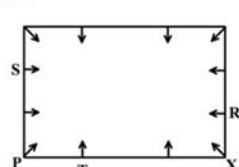

Five people are sitting between S and R, who is sitting third to the right of T.

Only one person is sitting between P and S.

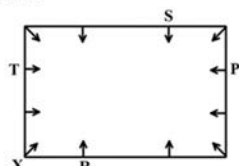

Case 1

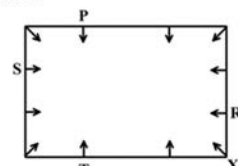

Case 2

Case 1.1

Case 2.1

Only three people are sitting between P and Y, who is not sitting along the longer side of the table.

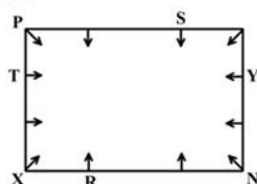

Here, case 2 is invalid.

Only one person is sitting between Y and N, who is not sitting along the longer side of the table.

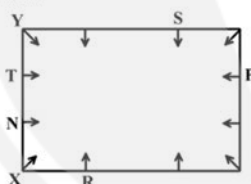

Here, case 2.1 is invalid.

We get,

Case 1

Case 1.1

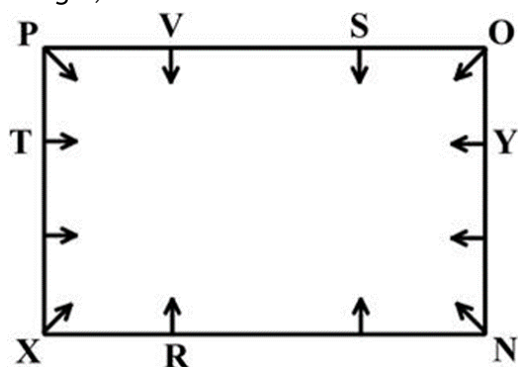

O is sitting third to the right of N and is sitting second to the left of V.

No one among Q, U, or Z is sitting at the corner of the table.

Here, case 1.1 is invalid.

We get,

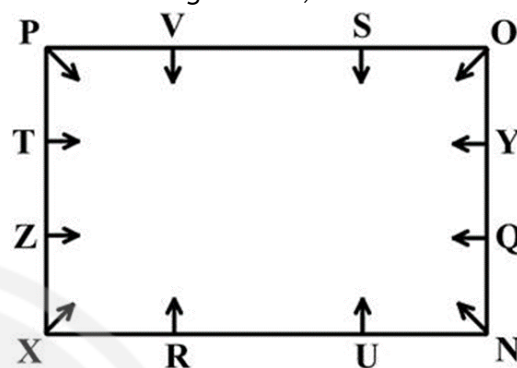

The number of people sitting between Z and Q is one more than the number of people sitting between X and O.

Hence, six people are sitting between Z and Q.

The number of people sitting between U and Q when counted from the left of Q is not more than three.

Hence, U is sitting second to the left of Q.

The final arrangement is,

Here, P is sitting fourth to the left of R and similarly, Z is sitting fourth to the left of N.

Q33 Text Solution:

It is given that,

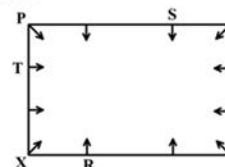

The twelve people are O, P, Q, R, S, T, U, V, W, X, Y and Z.

X is sitting in one of the corners of the table and is sitting immediately to the left of R.

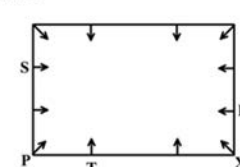

Five people are sitting between S and R, who is sitting third to the right of T.

Only one person is sitting between P and S.

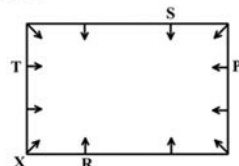

Case 1

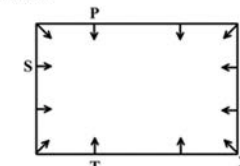

Case 2

Case 1.1

Case 2.1

Only three people are sitting between P and Y, who is not sitting along the longer side of the table.

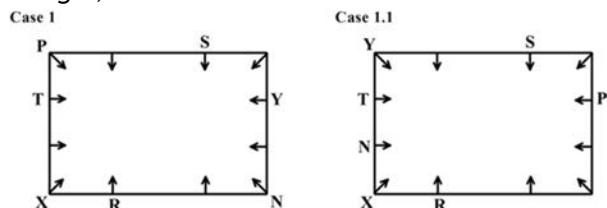

Here, case 2 is invalid.

Only one person is sitting between Y and N, who is not sitting along the longer side of the table.

Here, case 2.1 is invalid.

We get,

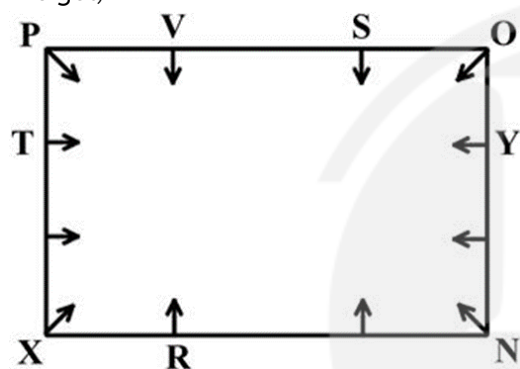

O is sitting third to the right of N and is sitting second to the left of V.

No one among Q, U, or Z is sitting at the corner of the table.

Here, case 1.1 is invalid.

We get,

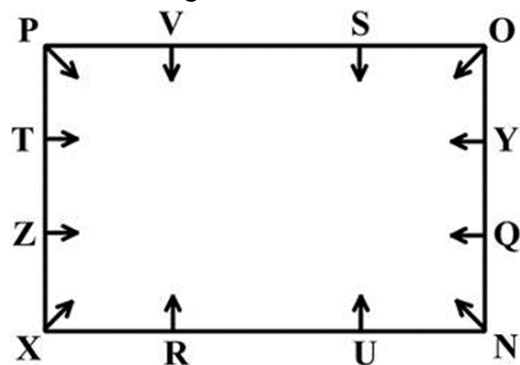

The number of people sitting between Z and Q is one more than the number of people sitting between X and O.

Hence, six people are sitting between Z and Q.

The number of people sitting between U and Q when counted from the left of Q is not more than three.

Hence, U is sitting second to the left of Q.

The final arrangement is,

Here, U is sitting along the longer side of the table.

Q34 Text Solution:

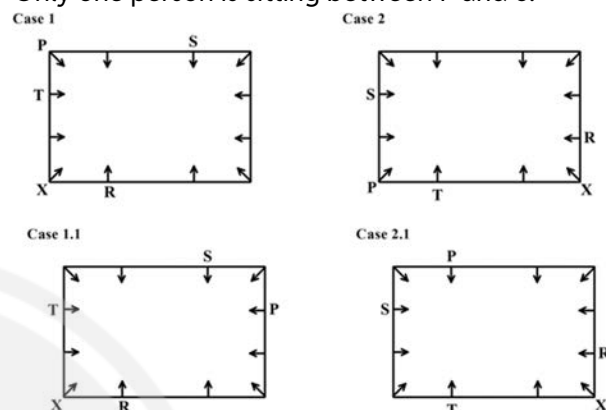

It is given that,

The twelve people are O, P, Q, R, S, T, U, V, W, X, Y and Z.

X is sitting in one of the corners of the table and is sitting immediately to the left of R.

Five people are sitting between S and R, who is sitting third to the right of T.

Only one person is sitting between P and S.

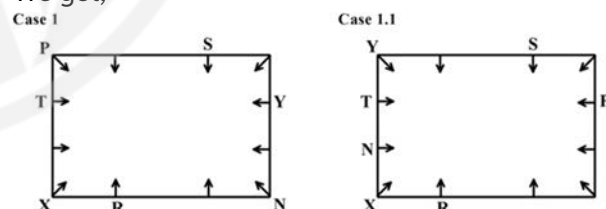

Only three people are sitting between P and Y, who is not sitting along the longer side of the table.

Here, case 2 is invalid.

Only one person is sitting between Y and N, who is not sitting along the longer side of the table.

Here, case 2.1 is invalid.

We get,

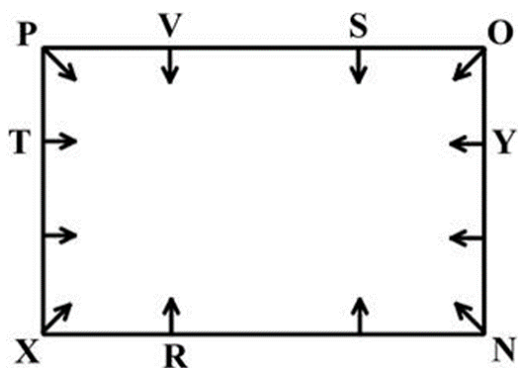

O is sitting third to the right of N and is sitting second to the left of V.

No one among Q, U, or Z is sitting at the corner of the table.

Here, case 1.1 is invalid.

We get,

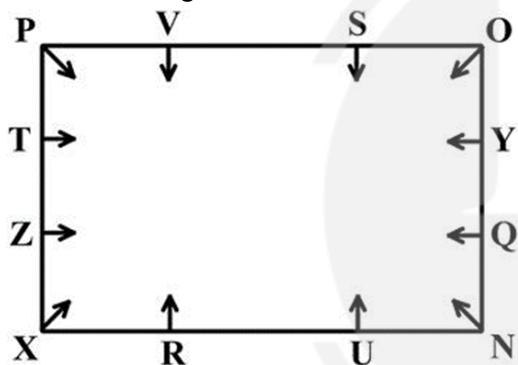

The number of people sitting between Z and Q is one more than the number of people sitting between X and O.

Hence, six people are sitting between Z and Q.

The number of people sitting between U and Q when counted from the left of Q is not more than three.

Hence, U is sitting second to the left of Q.

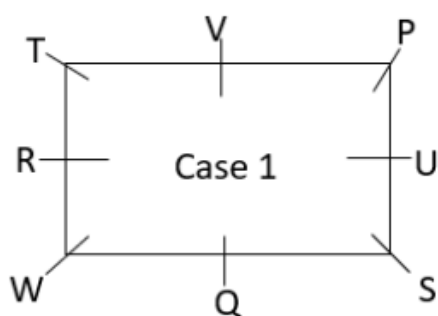

The final arrangement is,

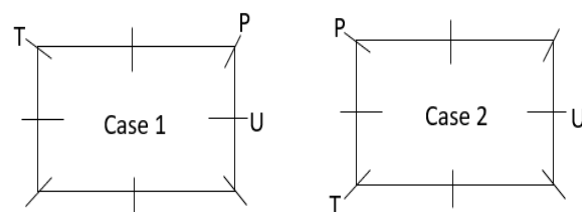

O is sitting fourth to the right of U.

Q35 Text Solution:

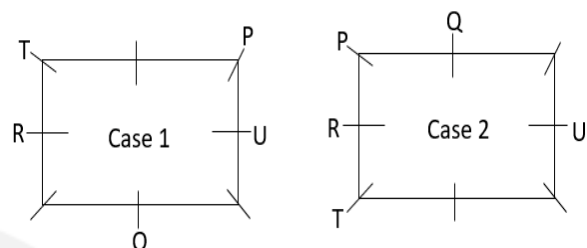

Final answer:

Two persons sit between T and U, who sits on the shorter side of the table. P sits second to the left of T. From these conditions, we get,

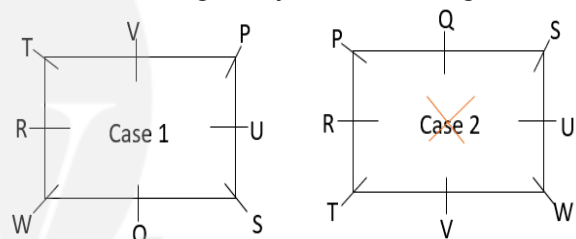

The number of persons sitting between U and Q is the same as the number of persons sitting between Q and R. Q is not an immediate neighbour of T. R sits opposite U.

S sits second to the left of P. W sits second to the right of T.

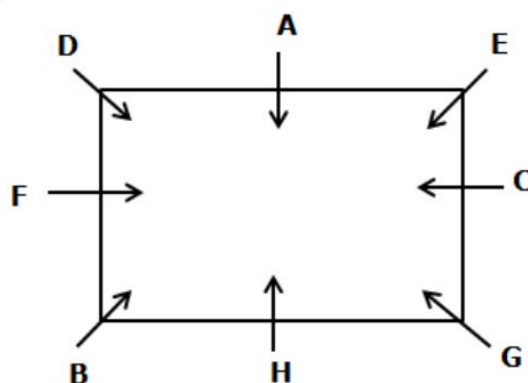

V is not an immediate neighbour of W. From this condition Case 2 gets rejected, and we get

Hence, **W sits opposite P.**

Q36 Text Solution:

Final Answer:

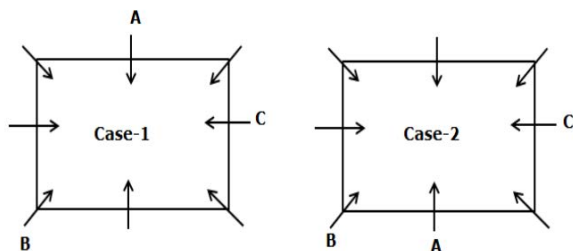

We have,

B sits third to the left of C. One person sits between A and C. A sits on one of the sides of the table.

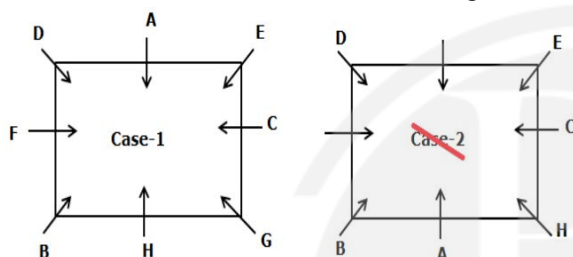

From the above condition, there are two possibilities.

Again we have,

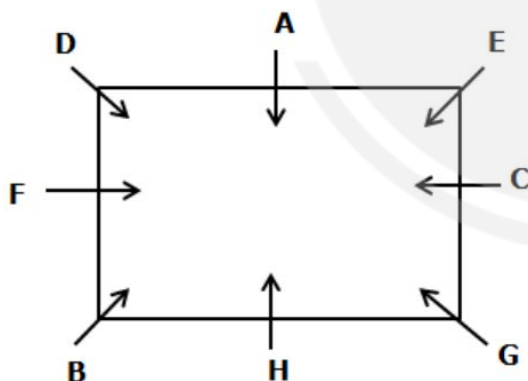

D sits second to the right of E but neither adjacent to B nor C. G sits third to the right of F. H neither sits adjacent to D nor E.

From the above condition, Case-2 gets eliminated. Case-1 shows the final Arrangement.

Q37 Text Solution:

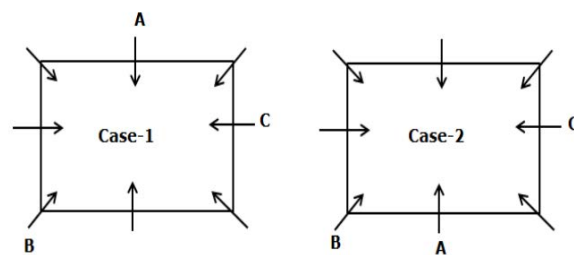

Final Answer:

We have,

B sits third to the left of C. One person sits between A and C. A sits on one of the sides of the table.

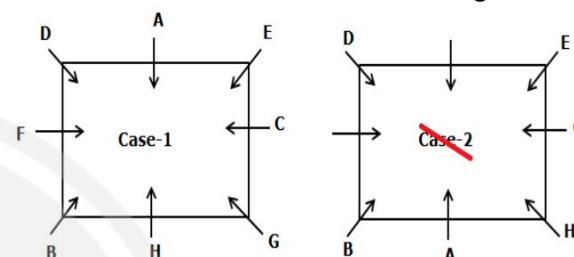

From the above condition, there are two possibilities.

Again we have,

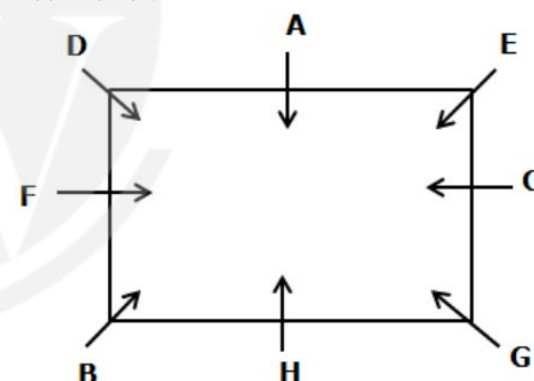

D sits second to the right of E but neither adjacent to B nor C. G sits third to the right of F. H neither sits adjacent to D nor E.

From the above condition, Case-2 gets eliminated. Case-1 shows the final Arrangement.

Q38 Text Solution:

Final Answer:

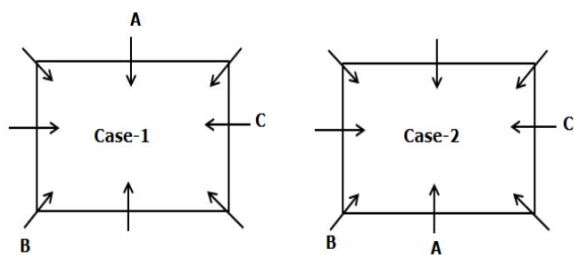

We have,

B sits third to the left of C. One person sits between A and C. A sits on one of the sides of the table.

From the above condition, there are two possibilities.

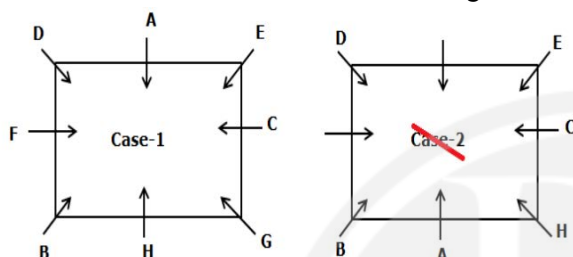

Again we have,

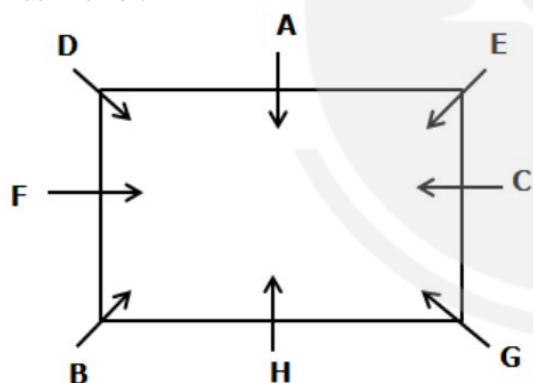

D sits second to the right of E but neither adjacent to B nor C. G sits third to the right of F. H neither sits adjacent to D nor E.

From the above condition, Case-2 gets eliminated. Case-1 shows the final Arrangement.

Q39 Text Solution:

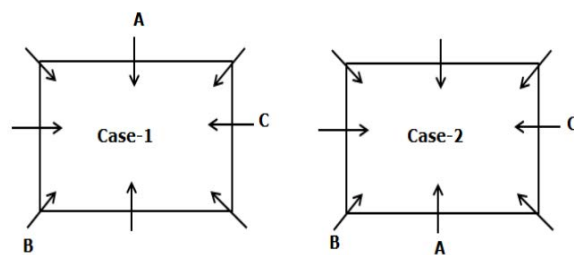

Final Answer:

We have,

B sits third to the left of C. One person sits between A and C. A sits on one of the sides of the table.

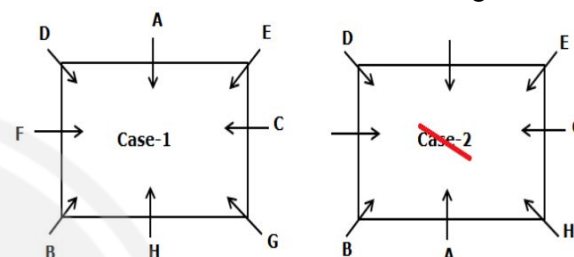

From the above condition, there are two possibilities.

Again we have,

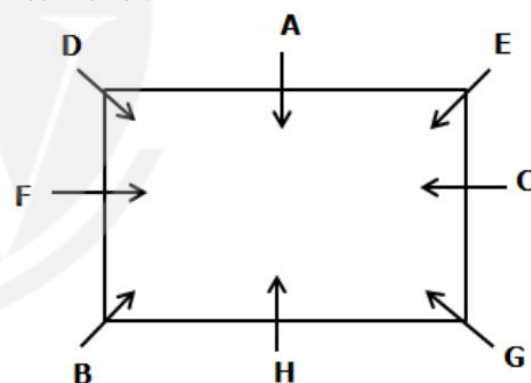

D sits second to the right of E but neither adjacent to B nor C. G sits third to the right of F. H neither sits adjacent to D nor E.

From the above condition, Case-2 gets eliminated. Case-1 shows the final Arrangement.

Q40 Text Solution:

Final Answer:

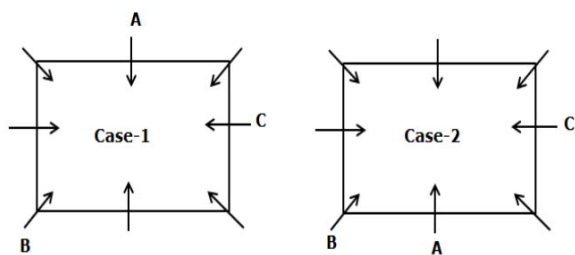

We have,

B sits third to the left of C. One person sits between A and C. A sits on one of the sides of the table.

From the above condition, there are two possibilities.

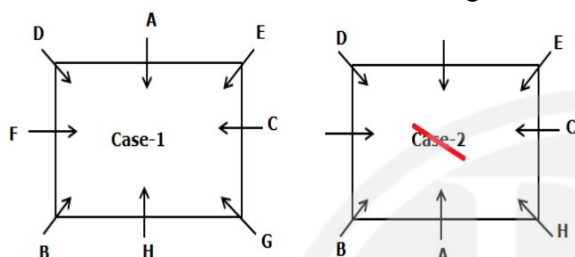

Again we have,

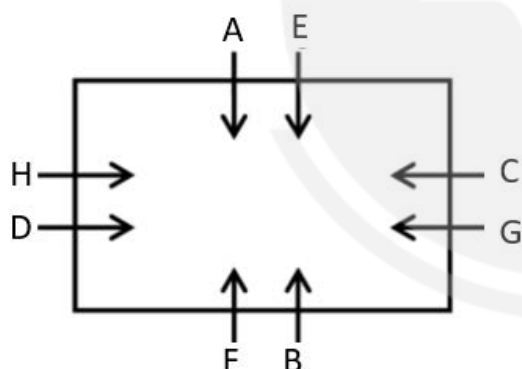

D sits second to the right of E but neither adjacent to B nor C. G sits third to the right of F. H neither sits adjacent to D nor E.

From the above condition, Case-2 gets eliminated. Case-1 shows the final Arrangement.

Q41 Text Solution:

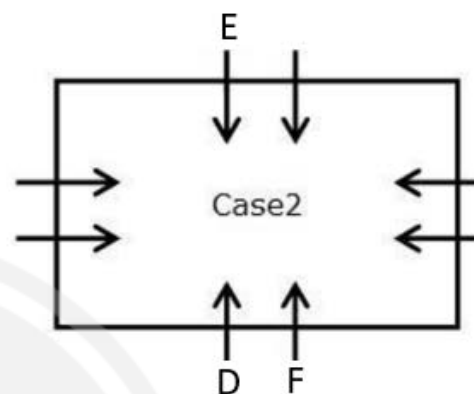

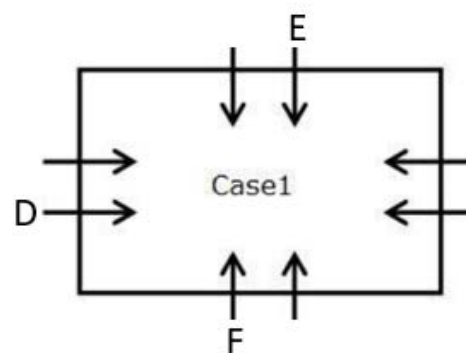

Final Answer:

Logic is used here, F is not the immediate neighbor of C.

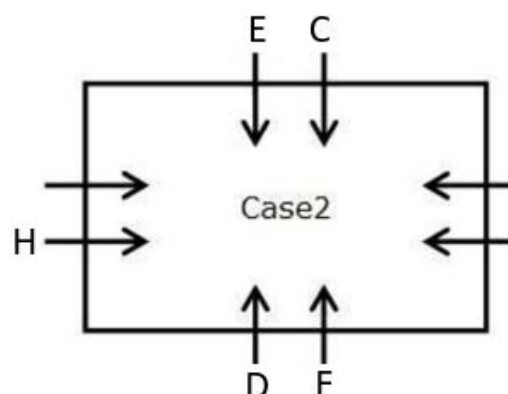

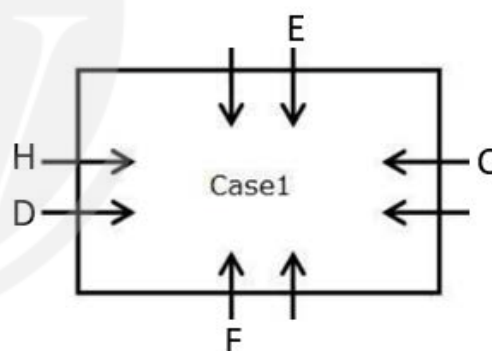

We have,

F sits immediate right of D. Only three persons sit between E and F.

Again we have,

E sits adjacent to C who sits third to the left of H. C is not an immediate neighbor of B

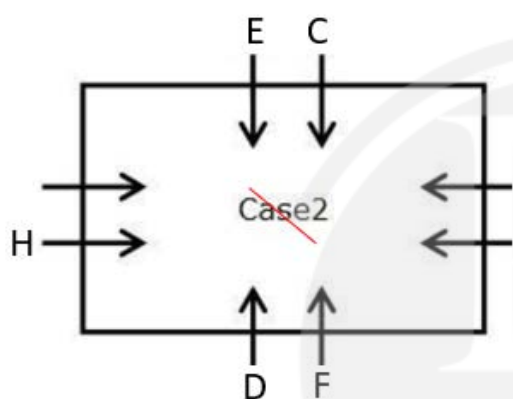

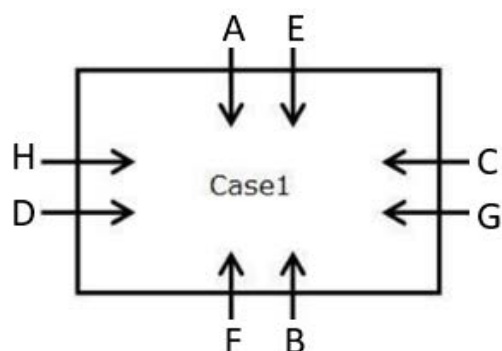

Again we have,

Both G and B sit neither on the same side nor opposite sides of the table. Only two persons sit

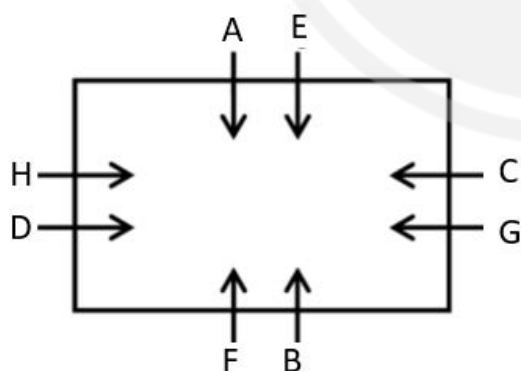

between G and A. C is not an immediate neighbor of B. From the above condition Case2 gets eliminated. Hence Case1 shows the final arrangement.

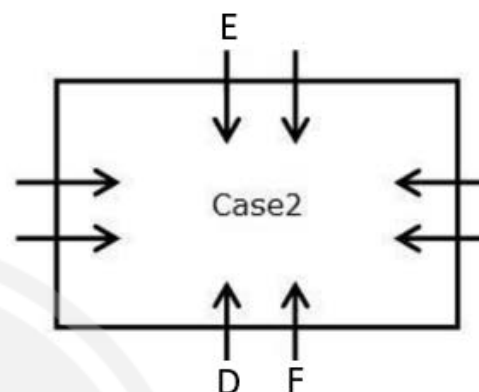

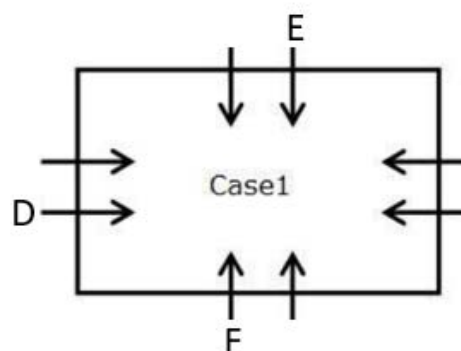

Q42 Text Solution:

Final Answer:

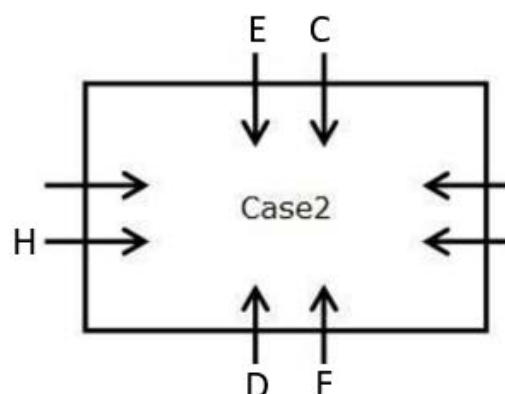

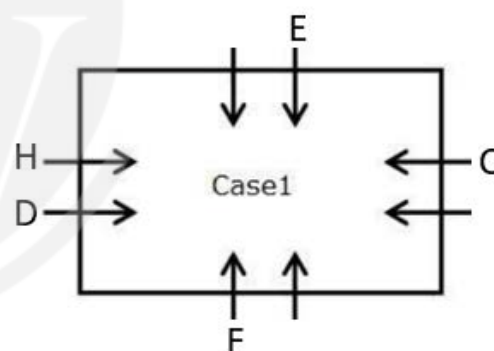

We have,

F sits immediate right of D. Only three persons sit between E and F.

Again we have,

E sits adjacent to C, who sits third to the left of H. C is not an immediate neighbor of B

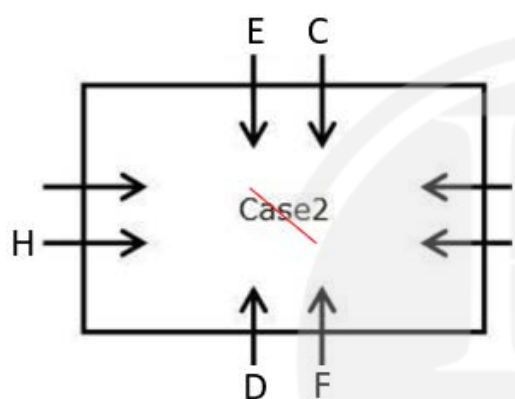

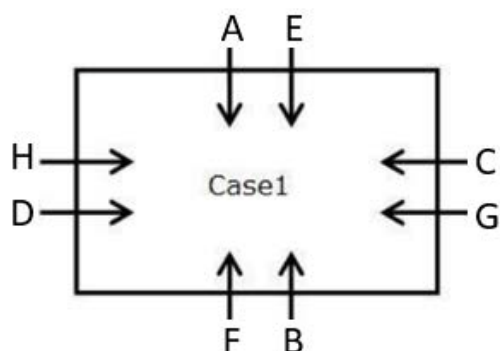

Again we have,

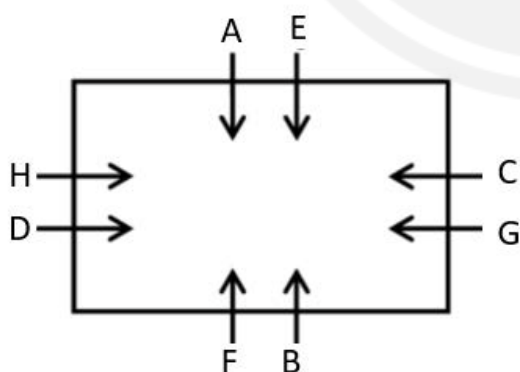

Both G and B sit neither on the same side nor opposite sides of the table. Only two persons sit

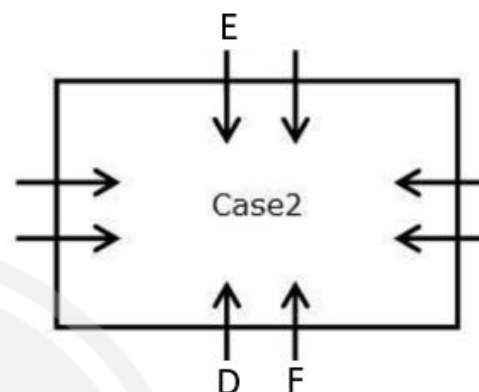

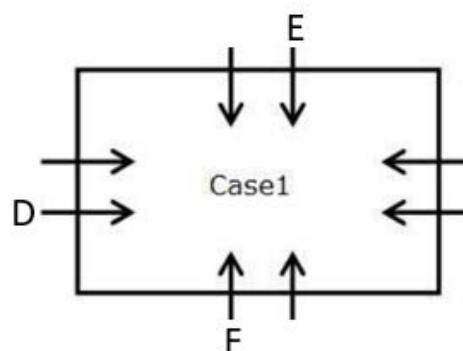

between G and A. C is not an immediate neighbor of B. From the above condition Case2 gets eliminated. Hence Case1 shows the final arrangement.

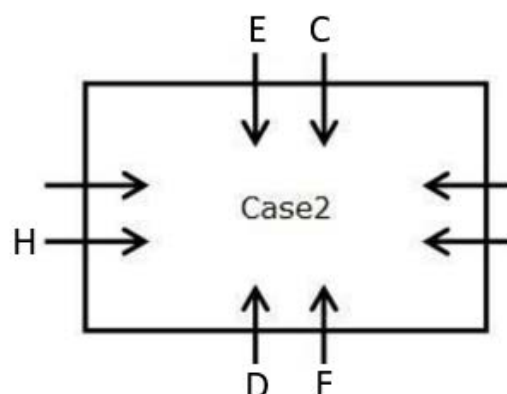

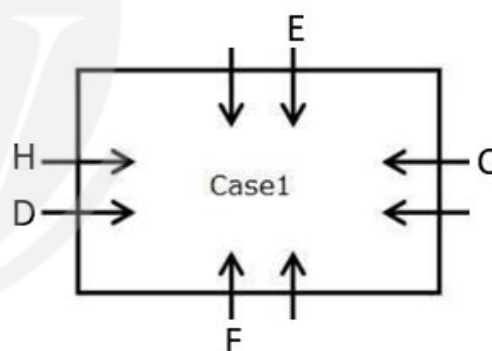

Q43 Text Solution:
Final Answer:

We have,
F sits immediate right of D. Only three persons sit between E and F.

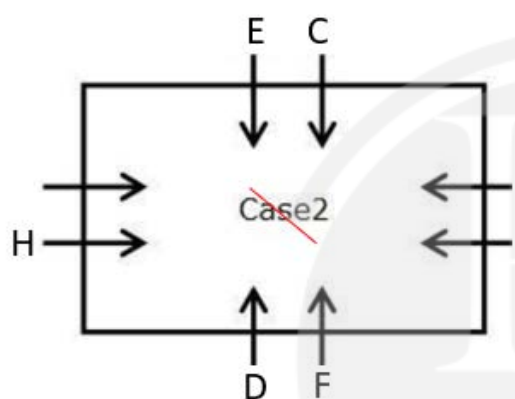

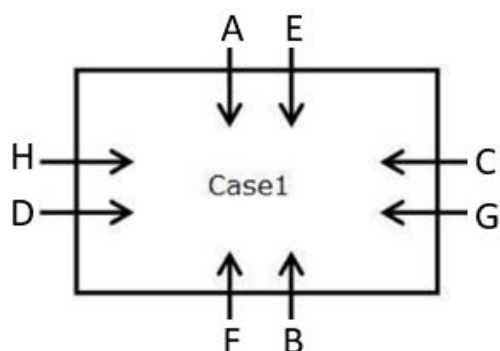

Again we have,
E sits adjacent to C, who sits third to the left of H.
C is not an immediate neighbor of B

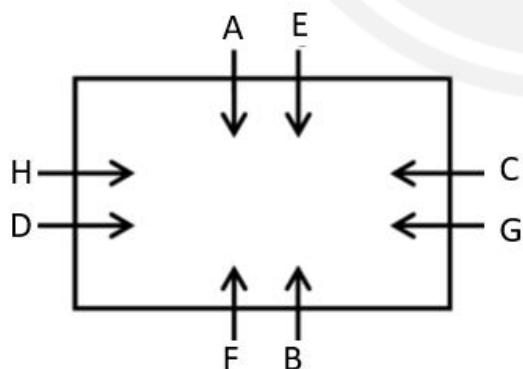

Again we have,
Both G and B sit neither on the same side nor opposite sides of the table. Only two persons sit

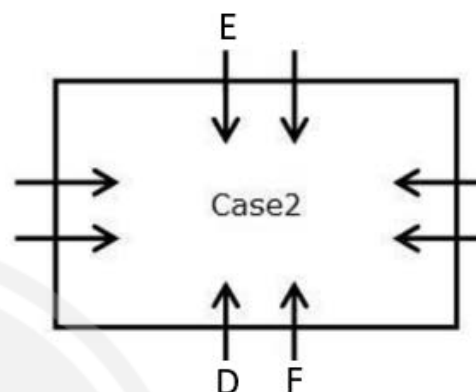

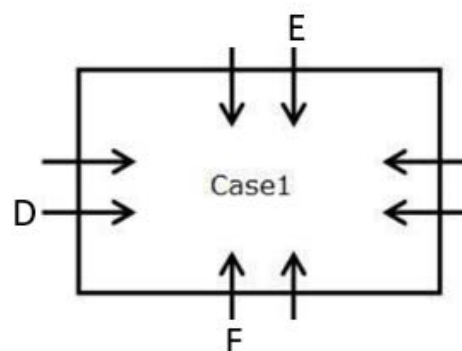

between G and A. C is not an immediate neighbor of B. From the above condition Case2 gets eliminated. Hence Case1 shows the final arrangement.

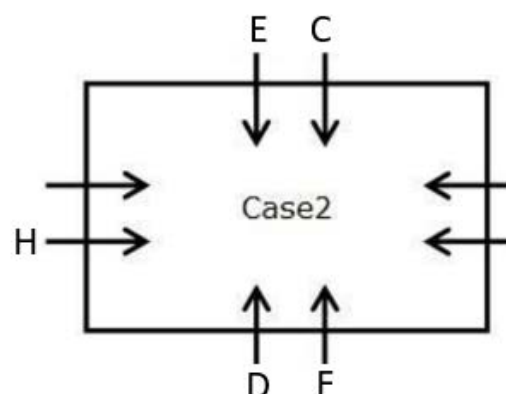

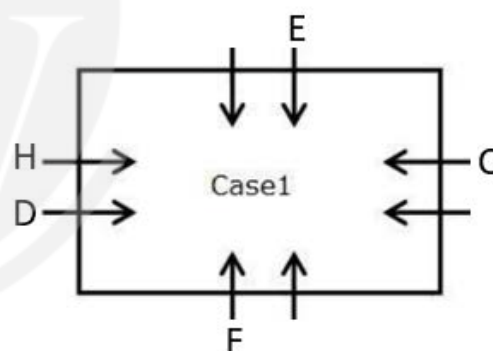

Q44 Text Solution:
Final Answer:

We have,
F sits immediate right of D. Only three persons sit between E and F.

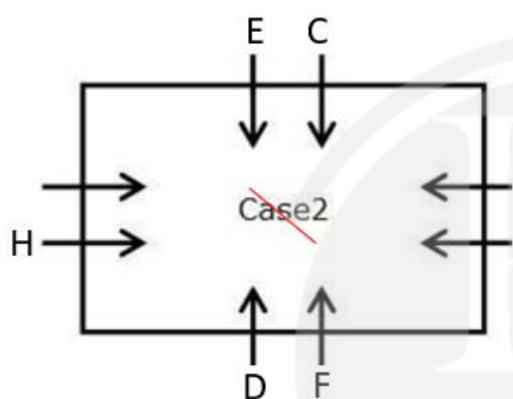

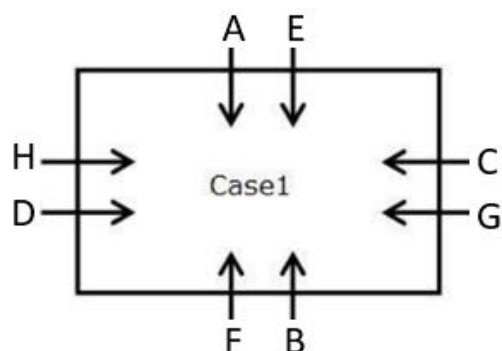

Again we have,
E sits adjacent to C, who sits third to the left of H.
C is not an immediate neighbor of B

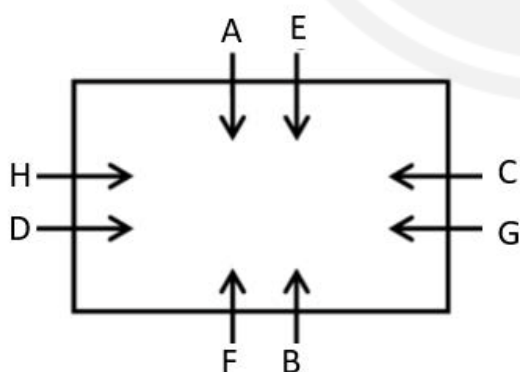

Again we have,
Both G and B sit neither on the same side nor opposite sides of the table. Only two persons sit

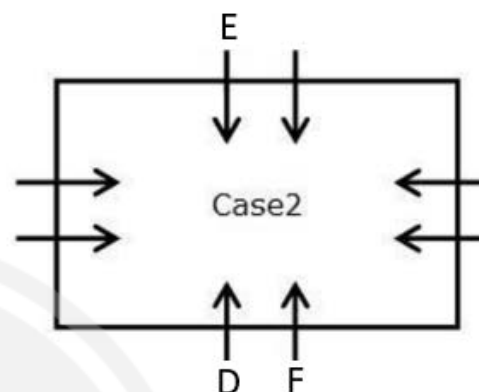

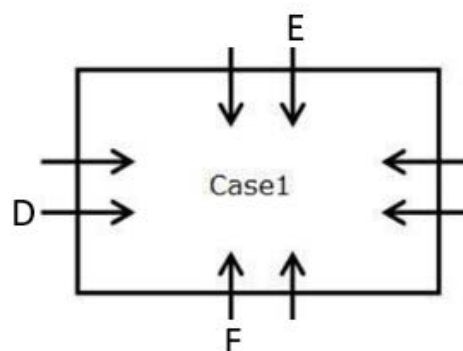

between G and A. C is not an immediate neighbor of B. From the above condition Case2 gets eliminated. Hence Case1 shows the final arrangement.

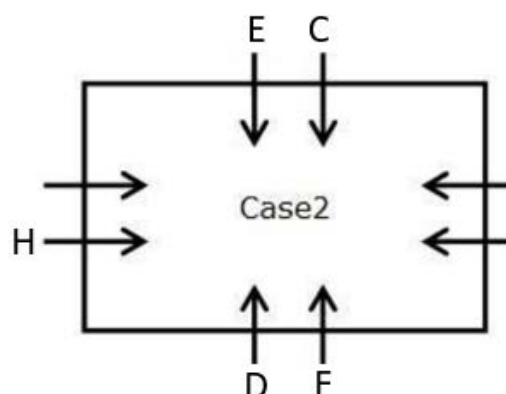

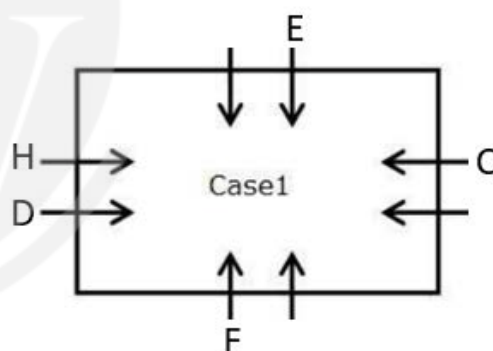

Q45 Text Solution:
Final Answer:

We have,
F sits immediate right of D. Only three persons sit between E and F.

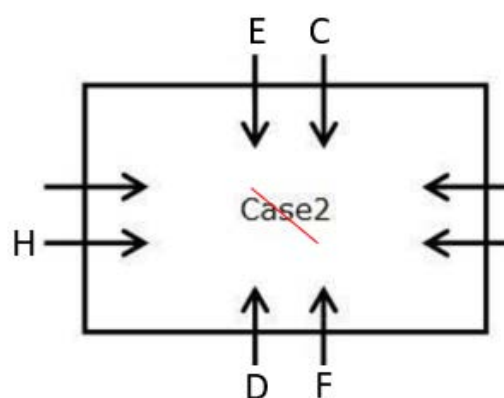

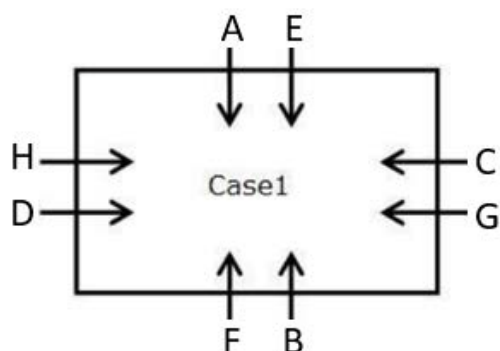

Again we have,
E sits adjacent to C, who sits third to the left of H.
C is not an immediate neighbor of B

Again we have,
Both G and B sit neither on the same side nor opposite sides of the table. Only two persons sit

between G and A. C is not an immediate neighbor of B. From the above condition Case2 gets eliminated. Hence Case1 shows the final arrangement.
