

Reasoning

Triangular Arrangements

Level-1

Q1 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the center, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. Q sits third to the right of R. Only one person sits between Q and T, who is immediate left of R. As many persons sit between S and T is the same as between Q and S, who is an immediate neighbour of R. P sits second to the left of U. P does not sit on the corner of the table.

Which of the following statement(s) is/are true with respect to the final arrangement?

- (A) Three persons sits between T and P
- (B) P sits to the immediate left of S
- (C) P sits third to the left of Q
- (D) No one sits between U and Q
- (E) None is true

Q2 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the center, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. Q sits third to the right of R. Only one person sits between Q and T, who is immediate left of R. As many persons sit between S and T is the same as between Q and S, who is an immediate

neighbour of R. P sits second to the left of U. P does not sit on the corner of the table.

Who among the following sits opposite to T?

- (A) P
- (B) T
- (C) Q
- (D) R
- (E) None of these

Q3 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the center, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. Q sits third to the right of R. Only one person sits between Q and T, who is immediate left of R. As many persons sit between S and T is the same as between Q and S, who is an immediate neighbour of R. P sits second to the left of U. P does not sit on the corner of the table.

Who among the following sits second to the right of the one who is third to the right of S?

- (A) P
- (B) T
- (C) Q
- (D) R
- (E) None of these

Q4 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the

middle of the sides of the table. S does not sit on the corner of the table. Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. T sits two places away from U, who sits immediate left of S.

Four of the following five are alike in a certain way and hence form a group. Which of the following one does not belong to that group?

- (A) RS (B) PS
(C) QT (D) US
(E) TP

Q5 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. S does not sit on the corner of the table. Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. T sits two places away from U, who sits immediate left of S.

How many persons sit between R and T, when counted from the right of T?

- (A) 1 (B) 3
(C) 2 (D) 4
(E) None of these

Q6 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the

corners while three persons are sitting in the middle of the sides of the table. S does not sit on the corner of the table. Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. T sits two places away from U, who sits immediate left of S.

Which of the following statement(s) is/are true with respect to the final arrangement?

- (A) One person sits between T and S
(B) R sits to the immediate right of S
(C) P sits third to the left of Q
(D) No one sits between S and Q
(E) None of these

Q7 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. S does not sit on the corner of the table. Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. T sits two places away from U, who sits immediate left of S.

Who among the following person sits second to the right of S?

- (A) R (B) U
(C) P (D) Q
(E) T

Q8 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing

towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. S does not sit on the corner of the table. Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. T sits two places away from U, who sits immediate left of S.

Who among the following sits opposite to Q?

- (A) P (B) R
(C) T (D) U
(E) S

Q9 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. T sits third to the left of R. Only one person sits between T and P, who is second to the left of T. The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P. Q sits on one of the corner of the table.

Four of the following five are alike in a certain way and hence form a group. Which of the following one does not belong to that group?

- (A) RS (B) PR
(C) QS (D) UT
(E) QR

Q10 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing

towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. T sits third to the left of R. Only one person sits between T and P, who is second to the left of T. The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P. Q sits on one of the corner of the table.

How many persons sit between Q and T, when counted from the right of T?

- (A) 1 (B) 3
(C) 2 (D) 4
(E) None

Q11 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. T sits third to the left of R. Only one person sits between T and P, who is second to the left of T. The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P. Q sits on one of the corner of the table.

Which of the following statement(s) is/are true with respect to the final arrangement?

- (A) Three persons sits between T and S
(B) R sits to the immediate left of S
(C) P sits third to the left of Q
(D) No one sits between S and R
(E) None is true

Q12 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. T sits third to the left of R. Only one person sits between T and P, who is second to the left of T. The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P. Q sits on one of the corner of the table.

Who among the following sits opposite to U?

- (A) Q (B) R
(C) S (D) P
(E) None of these

Q13 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. T sits third to the left of R. Only one person sits between T and P, who is second to the left of T. The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P. Q sits on one of the corner of the table.

Who among the following sits second to the right of the one who is third to the right of P?

- (A) Q (B) R
(C) S (D) P
(E) None of these

Q14 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. Only one person sits between P and U. T sits adjacent to Q, who sits on the side of triangular table. The one who sits immediate right of Q, sits opposite P. S does not sit opposite P. R sits two places away from T but not sits adjacent to Q.

Four of the following five are alike in a certain way and hence form a group. Which of the following one does not belong to that group?

- (A) RS (B) PU
(C) QT (D) UQ
(E) ST

Q15 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. Only one person sits between P and U. T sits adjacent to Q, who sits on the side of triangular table. The one who sits immediate right of Q, sits opposite P. S does not sit opposite P. R sits two places away from T but not sits adjacent to Q.

How many persons sit between P and T, when counted from the right of P?

- (A) 1 (B) 3
(C) 2 (D) 4
(E) None

Q16 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. Only one person sits between P and U. T sits adjacent to Q, who sits on the side of triangular table. The one who sits immediate right of Q, sits opposite P. S does not sit opposite P. R sits two places away from T but not sits adjacent to Q.

Which of the following statement(s) is/are true with respect to the final arrangement?

- (A) Two persons sits between T and S
- (B) R sits to the immediate right of S
- (C) P sits second to the left of Q
- (D) No one sits between S and R
- (E) None of these

Q17 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. Only one person sits between P and U. T sits adjacent to Q, who sits on the side of triangular table. The one who sits immediate right of Q, sits opposite P. S does not sit opposite P. R sits two places away from T but not sits adjacent to Q.

Who among the following person sits second to the right of S?

- (A) R
- (B) U
- (C) T
- (D) Q
- (E) P

Q18 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Three persons are sitting on the corners while three persons are sitting in the middle of the sides of the table. Only one person sits between P and U. T sits adjacent to Q, who sits on the side of triangular table. The one who sits immediate right of Q, sits opposite P. S does not sit opposite P. R sits two places away from T but not sits adjacent to Q.

Who among the following sits opposite T?

- (A) R
- (B) Q
- (C) P
- (D) S
- (E) U

Q19 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Two persons sit on each side of the table. Only two persons sit between Q and U. Only two persons sit between R and S. P sits second to the left of S. The number of persons sitting between R and S is the same as the number of persons sitting between T and P. T sits immediate left of U and both sit on the same side of the triangle.

Four of the following five are alike in a certain way and hence form a group. Which of the following one does not belong to that group?

- (A) RS
- (B) PT
- (C) QU
- (D) UT
- (E) TR

Q20 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing

towards the centre, but not necessarily in the same order. Two persons sit on each side of the table. Only two persons sit between Q and U. Only two persons sit between R and S. P sits second to the left of S. The number of persons sitting between R and S is the same as the number of persons sitting between T and P. T sits immediate left of U and both sit on the same side of the triangle.

How many persons sit between Q and R, when counted from the right of Q?

- (A) One (B) Three
(C) Two (D) Four
(E) None

Q21 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Two persons sit on each side of the table. Only two persons sit between Q and U. Only two persons sit between R and S. P sits second to the left of S. The number of persons sitting between R and S is the same as the number of persons sitting between T and P. T sits immediate left of U and both sit on the same side of the triangle.

Which of the following statement(s) is/are true with respect to the final arrangement?

- (A) Two persons sits between T and S
(B) R sits to the immediate right of S
(C) P sits second to the left of Q
(D) No one sits between S and Q
(E) None is true

Q22 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing

towards the centre, but not necessarily in the same order. Two persons sit on each side of the table. Only two persons sit between Q and U. Only two persons sit between R and S. P sits second to the left of S. The number of persons sitting between R and S is the same as the number of persons sitting between T and P. T sits immediate left of U and both sit on the same side of the triangle.

Who among the following person sits second to the right of Q?

- (A) P (B) U
(C) T (D) S
(E) R

Q23 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Two persons sit on each side of the table. Only two persons sit between Q and U. Only two persons sit between R and S. P sits second to the left of S. The number of persons sitting between R and S is the same as the number of persons sitting between T and P. T sits immediate left of U and both sit on the same side of the triangle.

Who among the following sits immediate left of the one who is second to the right of U?

- (A) P (B) T
(C) Q (D) R
(E) S

Q24 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Two persons sits on each side of the

table. Q sits second to the left of T. P sits third to the left of T, who is immediate right of U. The number of persons sitting between U and P is the same as the number of persons sitting between P and S. Both R and S sits on the same side of the triangular shape.

Four of the following five are alike in a certain way and hence form a group. Which of the following one does not belong to that group?

- (A) RS (B) PT
(C) QU (D) UT
(E) TS

Q25 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Two persons sits on each side of the table. Q sits second to the left of T. P sits third to the left of T, who is immediate right of U. The number of persons sitting between U and P is the same as the number of persons sitting between P and S. Both R and S sits on the same side of the triangular shape.

How many persons sit between S and U, when counted from the right of U?

- (A) One (B) Three
(C) Two (D) Four
(E) None

Q26 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Two persons sits on each side of the table. Q sits second to the left of T. P sits third to the left of T, who is immediate right of U. The number of persons sitting between U and P is the

same as the number of persons sitting between P and S. Both R and S sits on the same side of the triangular shape.

Which of the following statement(s) is/are true with respect to the final arrangement?

- (A) Two persons sits between T and S
(B) R sits to the immediate right of S
(C) P sits second to the left of Q
(D) No one sits between S and Q
(E) None is true

Q27 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Two persons sits on each side of the table. Q sits second to the left of T. P sits third to the left of T, who is immediate right of U. The number of persons sitting between U and P is the same as the number of persons sitting between P and S. Both R and S sits on the same side of the triangular shape.

Who among the following person sits second to the right of R?

- (A) U (B) T
(C) Q (D) P
(E) S

Q28 Study the following information carefully and answer the questions accordingly.

Six persons - P, Q, R, S, T, and U are sitting on a triangular table such that all of them are facing towards the centre, but not necessarily in the same order. Two persons sits on each side of the table. Q sits second to the left of T. P sits third to the left of T, who is immediate right of U. The number of persons sitting between U and P is the same as the number of persons sitting between P

and S. Both R and S sits on the same side of the triangular shape.

Who among the following sits immediate left of T?

- (A) Q (B) U
(C) P (D) S
(E) R

Q29 Directions: Study the following data carefully and answer the questions accordingly.

There are six people i.e. M, N, O, P, Q and R sitting around a triangular-shaped table. Two people sit in the middle of each of the three sides. All are facing outside the triangular table. All the information is not necessarily in the same order.

N sits fourth to the right of Q. P sits fourth to the left of R. There are three people sitting between P and M. There are two people sitting between M and O.

How many people sit between N and Q ?

- (A) Either one or three
(B) One
(C) Two
(D) Three
(E) None of these

Q30 Directions: Study the following data carefully and answer the questions accordingly.

There are six people i.e. M, N, O, P, Q and R sitting around a triangular-shaped table. Two people sit in the middle of each of the three sides. All are facing outside the triangular table. All the information is not necessarily in the same order.

N sits fourth to the right of Q. P sits fourth to the left of R. There are three people sitting between P and M. There are two people sitting between M and O.

What is the position of Q with respect to O ?

- (A) Third to the right
(B) second to the right
(C) Immediate left
(D) Third to the left
(E) None of these

Q31 Directions: Study the following data carefully and answer the questions accordingly.

There are six people i.e. M, N, O, P, Q and R sitting around a triangular-shaped table. Two people sit in the middle of each of the three sides. All are facing outside the triangular table. All the information is not necessarily in the same order.

N sits fourth to the right of Q. P sits fourth to the left of R. There are three people sitting between P and M. There are two people sitting between M and O.

Which of the following sit Immediate right of N ?

- (A) P (B) O
(C) R (D) Q
(E) M

Q32 Directions: Study the following data carefully and answer the questions accordingly.

There are six people i.e. M, N, O, P, Q and R sitting around a triangular-shaped table. Two people sit in the middle of each of the three sides. All are facing outside the triangular table. All the information is not necessarily in the same order.

N sits fourth to the right of Q. P sits fourth to the left of R. There are three people sitting between P and M. There are two people sitting between M and O.

Which of the following sit third to the right of N ?

- (A) R (B) P
(C) Q (D) O
(E) M

Q33 Directions: Study the following data carefully and answer the questions accordingly.

There are six people i.e. M, N, O, P, Q and R sitting around a triangular-shaped table. Two people sit in the middle of each of the three sides. All are facing outside the triangular table. All the information is not necessarily in the same order.

N sits fourth to the right of Q. P sits fourth to the left of R. There are three people sitting between P and M. There are two people sitting between M and O.

Which of the following statements is true ?

- (A) M sits second to left of P
- (B) R is not near to O
- (C) Two people sit between N and Q

- (D) N sits immediate left of M
- (E) None is true

Hints & Solutions

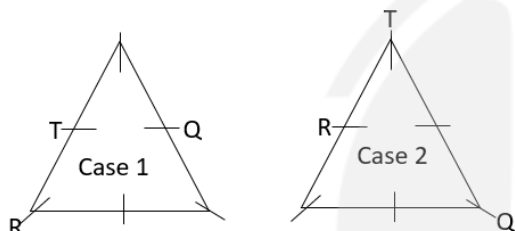

Q1 Text Solution:

Final answer:

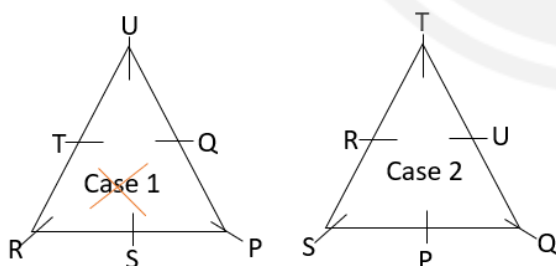

Q sits third to the right of R. Only one person sits between Q and T, who is immediate left of R.

From these conditions, we get,

As many persons sit between S and T is the same as between Q and S, who is an immediate neighbour of R. P sits second to the left of U.

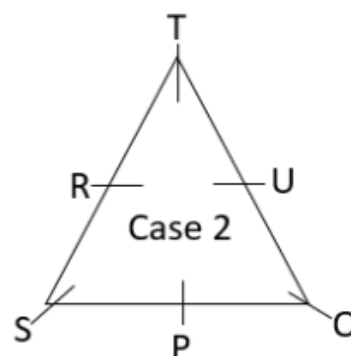

P does not sit on the corner of the table. From this condition Case, 1 gets rejected, and we get

Hence, **No one sits between U and Q is true.**

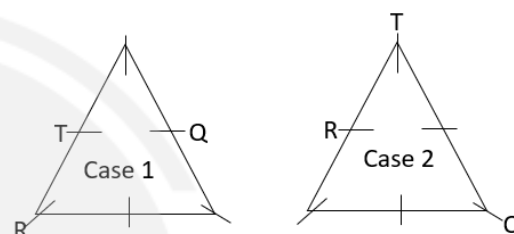

Q2 Text Solution:

Final answer:

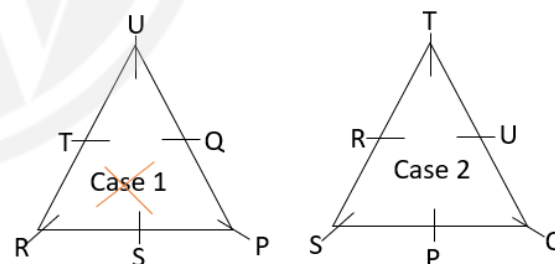

Q sits third to the right of R. Only one person sits between Q and T, who is immediate left of R.

From these conditions, we get,

As many persons sit between S and T is the same as between Q and S, who is an immediate neighbour of R. P sits second to the left of U.

P does not sit on the corner of the table. From this condition Case, 1 gets rejected, and we get

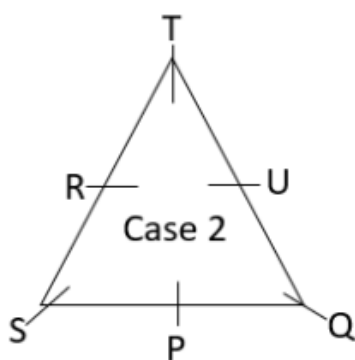

Hence, **P sits opposite to T**

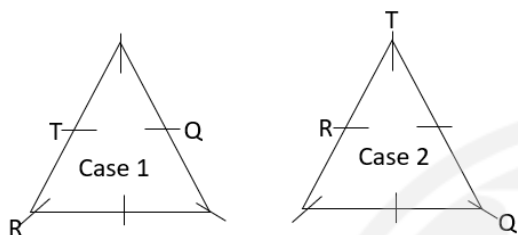

Q3 Text Solution:

Final answer:

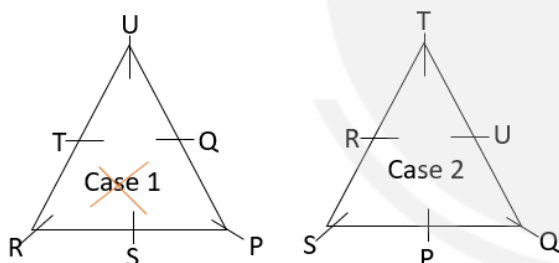

Q sits third to the right of R. Only one person sits between Q and T, who is immediate left of R. From these conditions, we get,

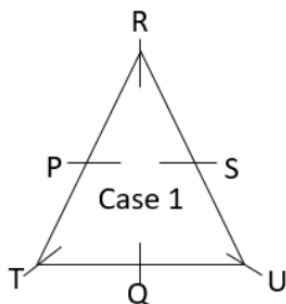

As many persons sit between S and T is the same as between Q and S, who is an immediate neighbour of R. P sits second to the left of U. P does not sit on the corner of the table. From this condition Case, 1 gets rejected, and we get

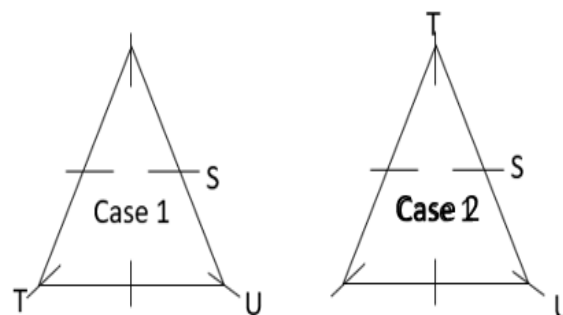

Hence, **R sits second to the right of the one who is third to the right of S.**

Q4 Text Solution:

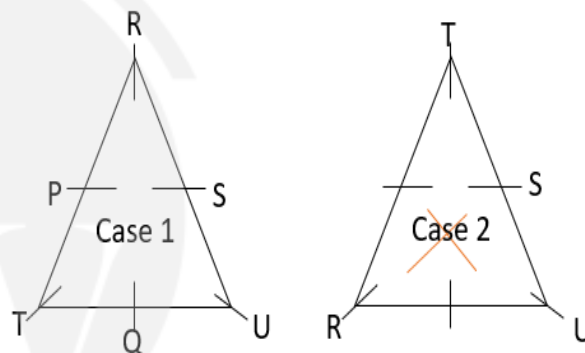

Final answer:

T sits two places away from U, who sits immediate left of S. S does not sit on the corner of the table. From these conditions, we get,

Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. From this condition Case, 2 gets rejected, and we get

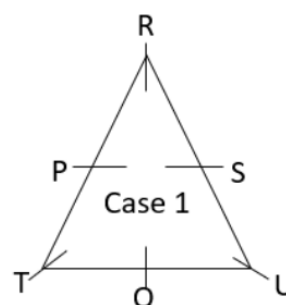

Logic- In all options, Both persons are immediate to each other except option B.

Hence, Option B is the correct answer.

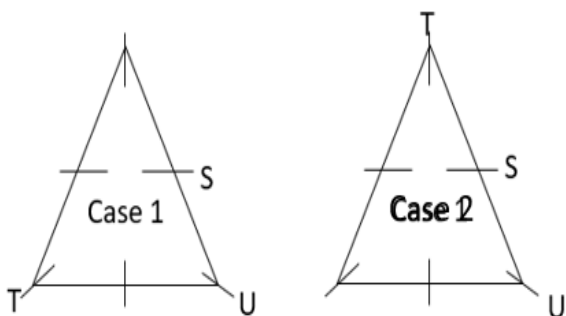

Q5 Text Solution:

Final answer:

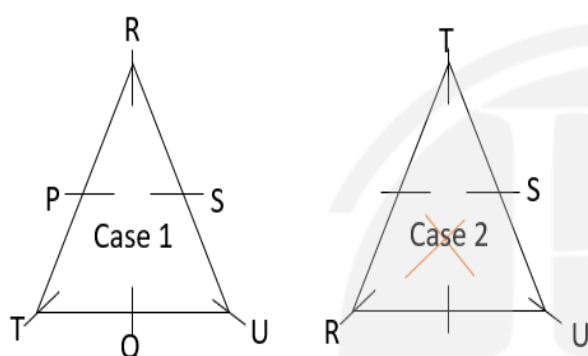

T sits two places away from U, who sits immediate left of S. S does not sit on the corner of the table. From these conditions, we get,

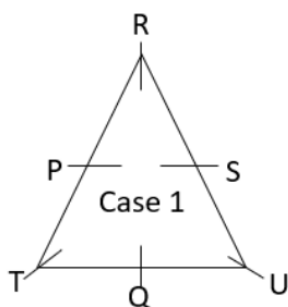

Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. From this condition Case, 2 gets rejected, and we get

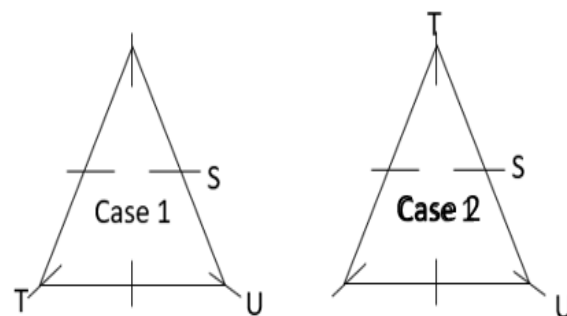

Hence, three persons sit between R and T, when counted from the right of T

Q6 Text Solution:

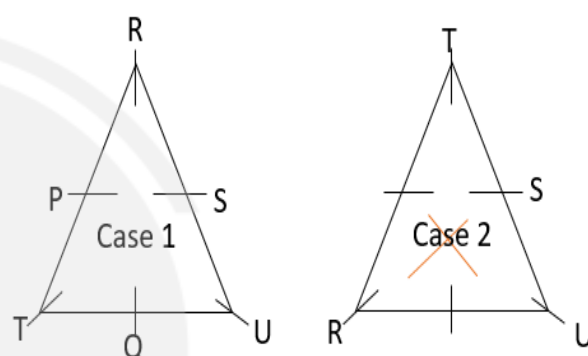

Final answer:

T sits two places away from U, who sits immediate left of S. S does not sit on the corner of the table. From these conditions, we get,

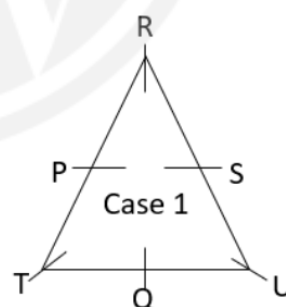

Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. From this condition Case, 2 gets rejected, and we get

Hence, R sits to the immediate right of S is true.

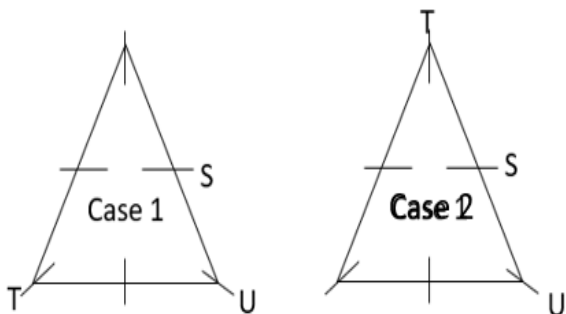

Q7 Text Solution:

Final answer:

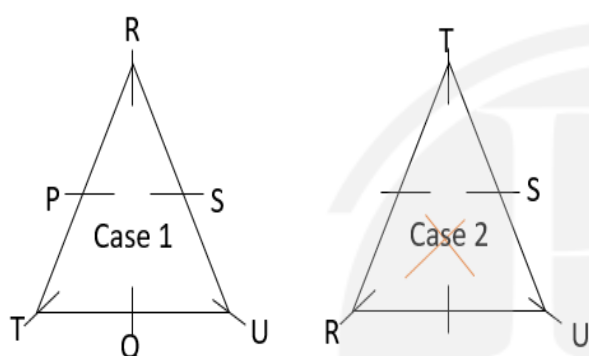

T sits two places away from U, who sits immediate left of S. S does not sit on the corner of the table. From these conditions, we get,

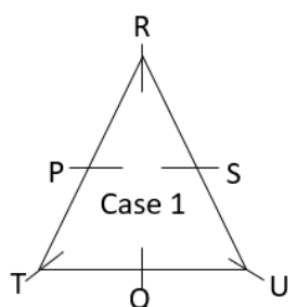

Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. From this condition Case, 2 gets rejected, and we get

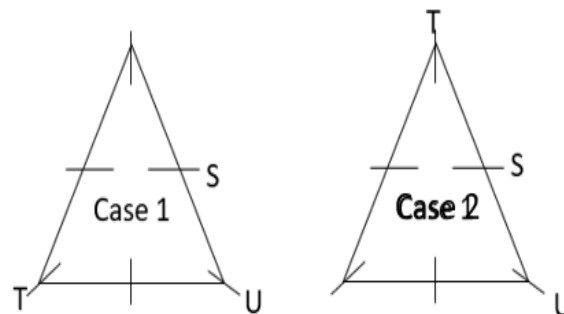

Hence, P sits second to the right of S

Q8 Text Solution:

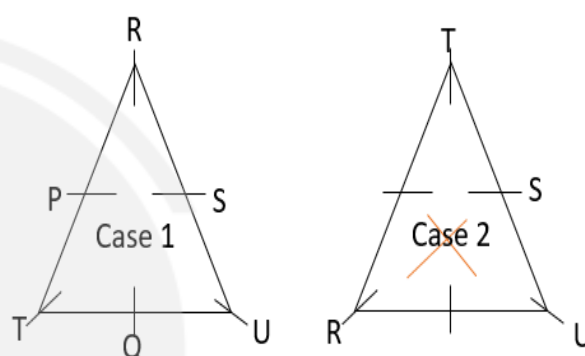

Final answer:

T sits two places away from U, who sits immediate left of S. S does not sit on the corner of the table. From these conditions, we get,

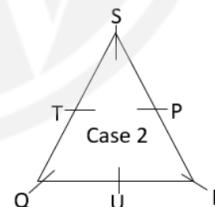

Only one person sits between T and R. The number of persons sitting between S and P is the same as the number of persons sitting between S and Q, who is not an immediate neighbour of R. From this condition Case, 2 gets rejected, and we get

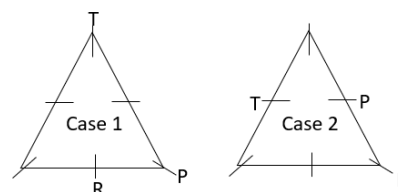

Hence, R sits opposite to Q.

Q9 Text Solution:

Final answer:

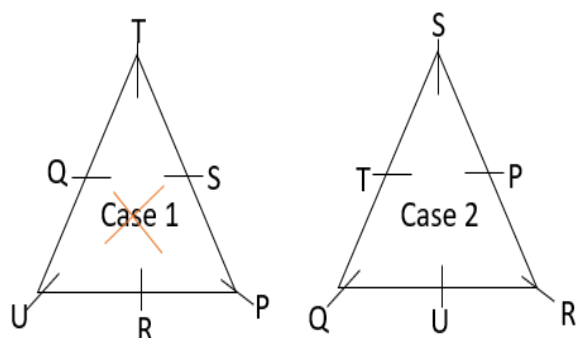

T sits third to the left of R. Only one person sits between T and P, who is second to the left of T. From these conditions, we get,

The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P.

Q sits on one of the corner of the table. From this condition Case, 1 gets rejected, and we get

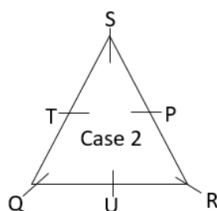

Logic - In all options, both persons are not adjacent to each other except option B.

Hence, **option B is the correct answer.**

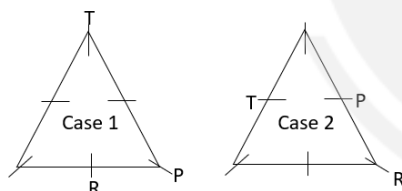

Q10 Text Solution:

Final answer:

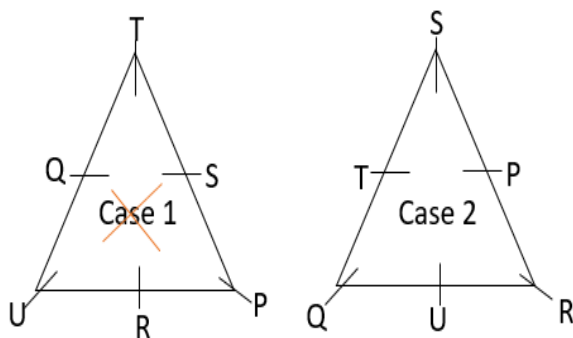

T sits third to the left of R. Only one person sits between T and P, who is second to the left of T.

From these conditions, we get,

The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P.

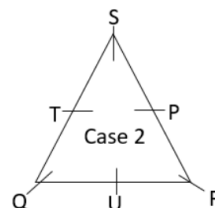

Q sits on one of the corner of the table. From this condition Case, 1 gets rejected, and we get

Hence, **No one sit between Q and T, when counted from the right of T.**

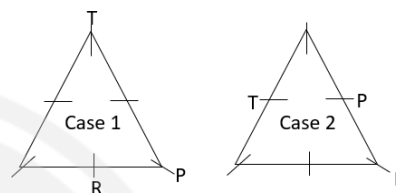

Q11 Text Solution:

Final answer:

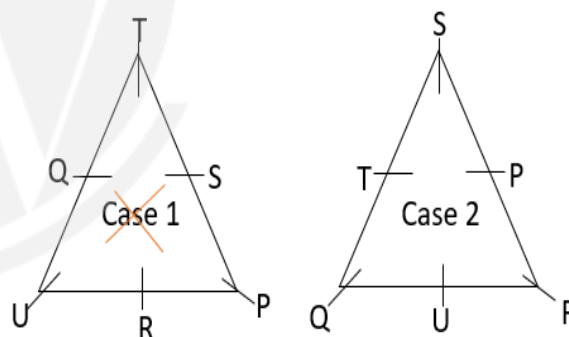

T sits third to the left of R. Only one person sits between T and P, who is second to the left of T.

From these conditions, we get,

The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P.

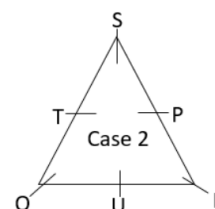

Q sits on one of the corner of the table. From this condition Case, 1 gets rejected, and we get

Hence, **P sits third to the left of Q is true.**

Q12 Text Solution:

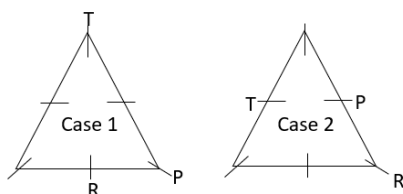

Final answer:

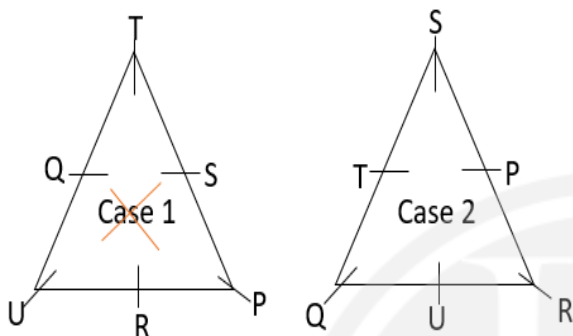

T sits third to the left of R. Only one person sits between T and P, who is second to the left of T.

From these conditions, we get,

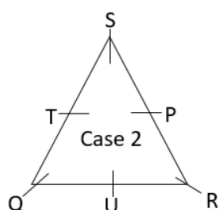

The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P. Q sits on one of the corner of the table. From this condition Case, 1 gets rejected, and we get

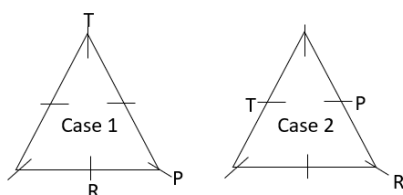

Hence, **S sits opposite to U.**

Q13 Text Solution:

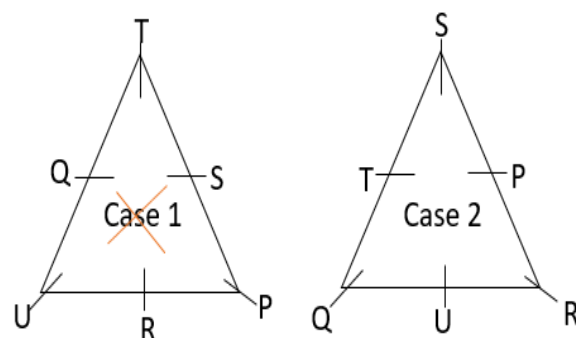

Final answer:

T sits third to the left of R. Only one person sits between T and P, who is second to the left of T. From these conditions, we get,

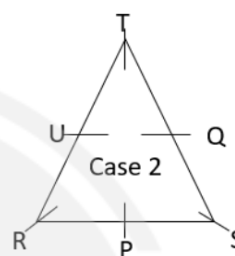

The number of persons sitting between P and R is the same as the number of persons sitting between U and R. S sits immediate right of P. Q sits on one of the corner of the table. From this condition Case, 1 gets rejected, and we get

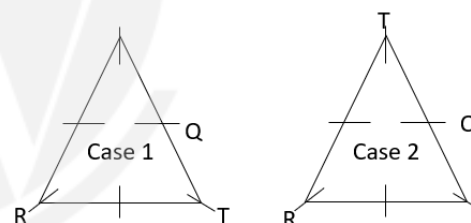

Hence, **R sits second to the right of the one who is third to the right of P**

Q14 Text Solution:

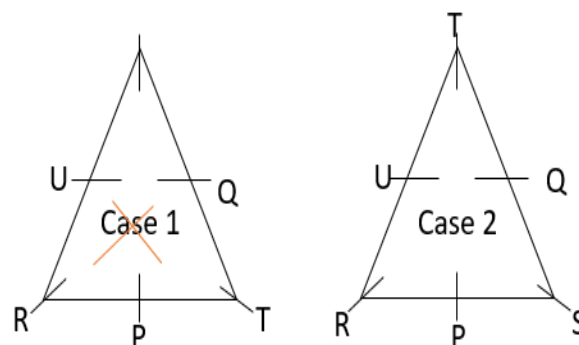

Final answer:

T sits adjacent to Q, who sits on the side of triangular table. R sits two places away from T but does not sit adjacent to Q. From these conditions, we get,

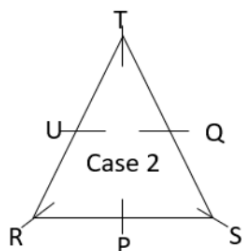

The one who sits immediate right of Q, sits opposite P. Only one person sits between P and U. S does not sit opposite P. From this condition Case 1 gets rejected, and we get

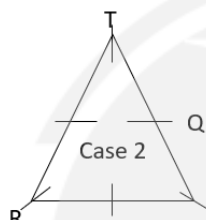

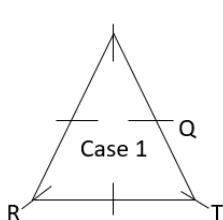

Logic - In all options, both persons are not adjacent to each other except option C.
Hence, Option C is the correct answer.

Q15 Text Solution:

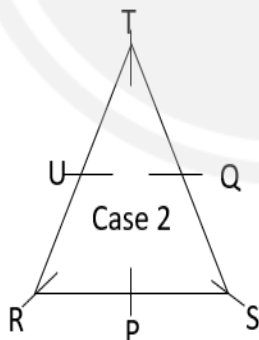

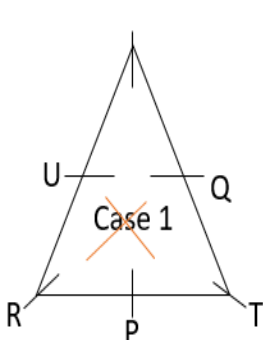

Final answer:

T sits adjacent to Q, who sits on the side of triangular table. R sits two places away from T but does not sit adjacent to Q. From these conditions, we get,

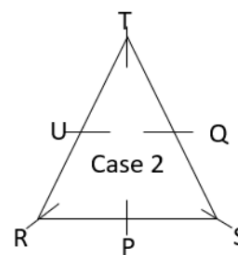

The one who sits immediate right of Q, sits opposite P. Only one person sits between P and U. S does not sit opposite P. From this condition Case 1 gets rejected, and we get

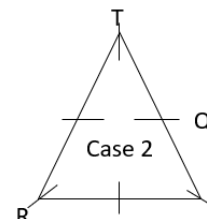

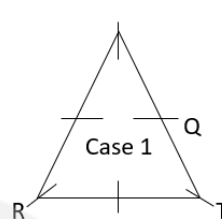

Hence, two persons sit between P and T, when counted from the right of P

Q16 Text Solution:

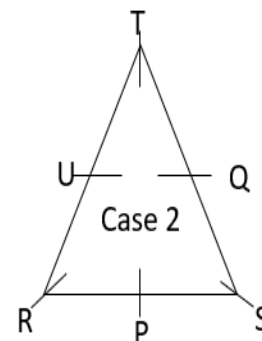

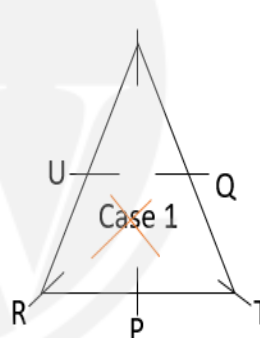

Final answer:

T sits adjacent to Q, who sits on the side of triangular table. R sits two places away from T but does not sit adjacent to Q. From these conditions, we get,

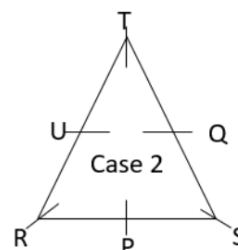

The one who sits immediate right of Q, sits opposite P. Only one person sits between P and U. S does not sit opposite P. From this condition Case 1 gets rejected, and we get

Hence, P sits second to the left of Q is true.

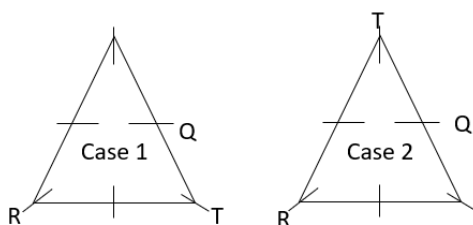

Q17 Text Solution:

Final answer:

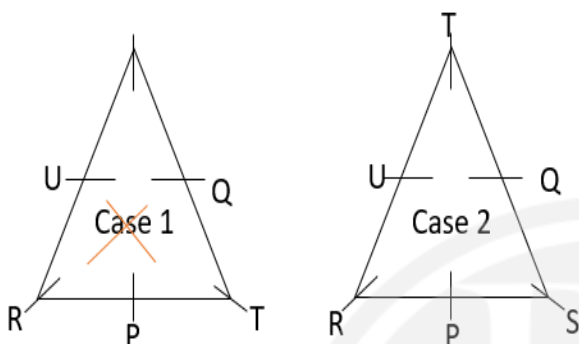

T sits adjacent to Q, who sits on the side of triangular table. R sits two places away from T but does not sit adjacent to Q. From these conditions, we get,

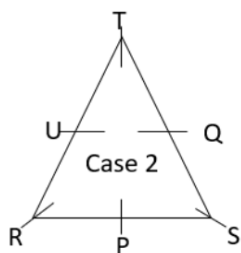

The one who sits immediate right of Q, sits opposite P. Only one person sits between P and U. S does not sit opposite P. From this condition Case 1 gets rejected, and we get

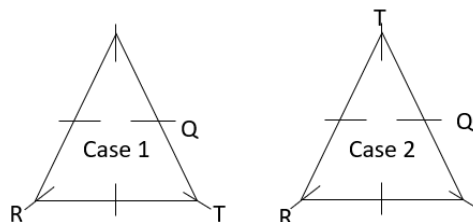

Hence, T sits second to the right of S.

Q18 Text Solution:

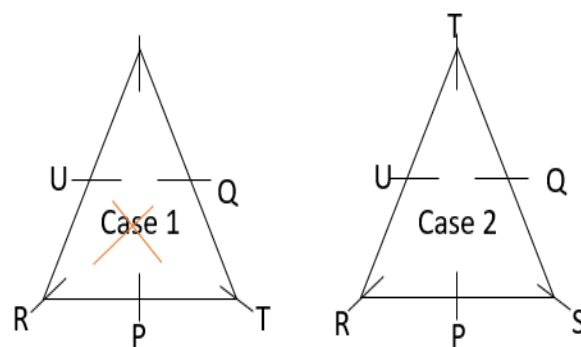

Final answer:

T sits adjacent to Q, who sits on the side of triangular table. R sits two places away from T but does not sit adjacent to Q. From these conditions, we get,

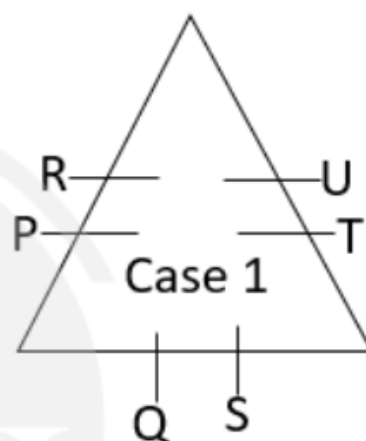

The one who sits immediate right of Q, sits opposite P. Only one person sits between P and U. S does not sit opposite P. From this condition Case 1 gets rejected, and we get

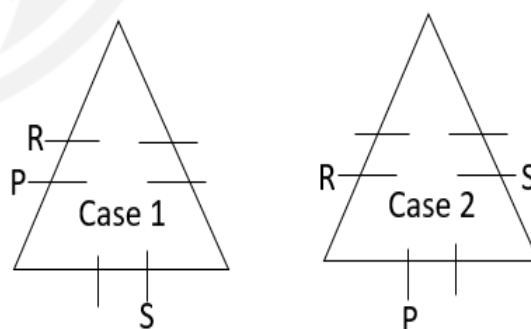

Hence, P sits opposite to T.

Q19 Text Solution:

Final answer:

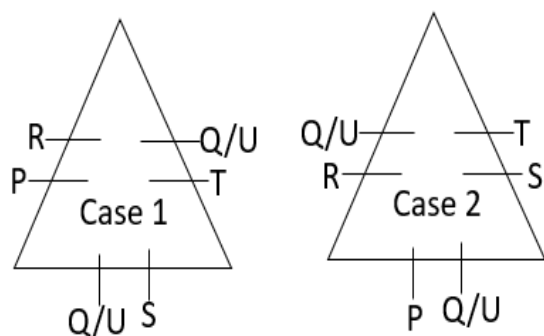

Only two persons sit between R and S. P sits second to the left of S. From these conditions, we get,

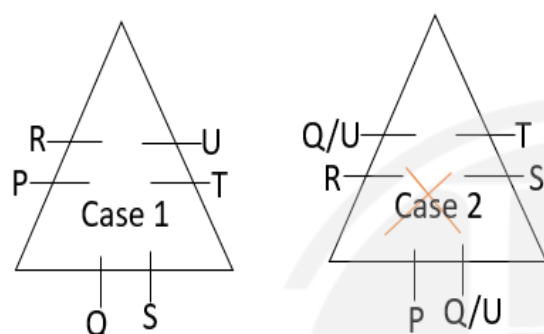

The number of persons sitting between R and S is the same as the number of persons sitting between T and P. Only two persons sit between Q and U.

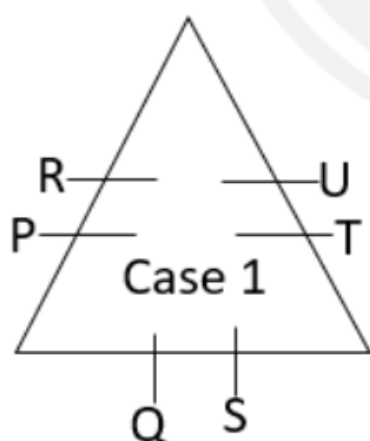

T sits immediate left of U and both sit on the same side of the triangle. From this condition Case, 2 gets rejected, and we get

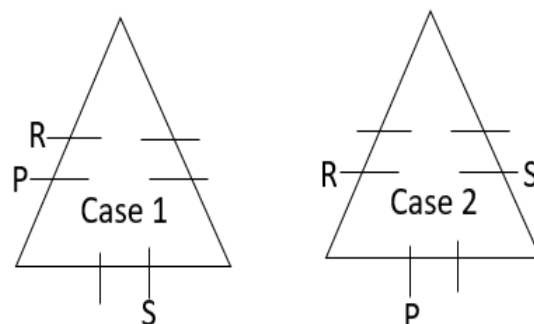

Logic- In all options, at least one person sits between both the persons except option D. Hence, **option D is the correct answer.**

Q20 Text Solution:

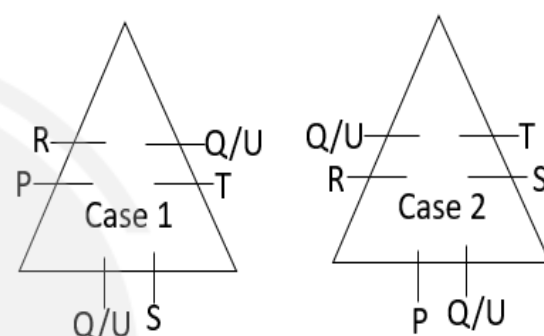

Final answer:

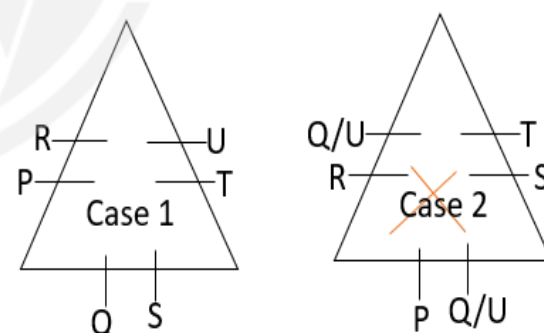

Only two persons sit between R and S. P sits second to the left of S. From these conditions, we get,

The number of persons sitting between R and S is the same as the number of persons sitting between T and P. Only two persons sit between Q and U.

T sits immediate left of U and both sit on the same side of the triangle. From this condition Case, 2 gets rejected, and we get

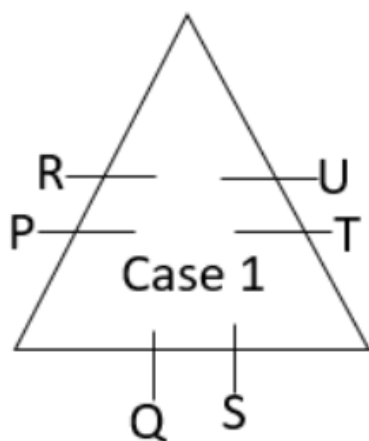

Hence, **three persons sit between Q and R, when counted from the right of Q**

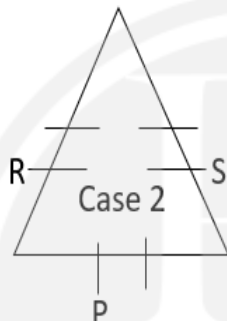

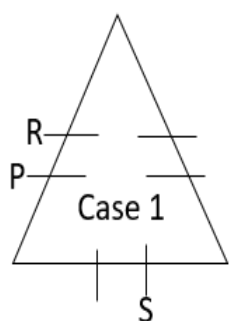

Q21 Text Solution:

Final answer:

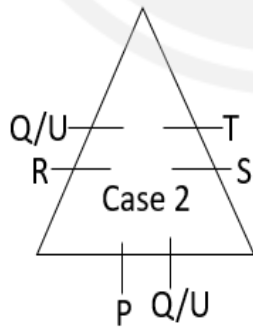

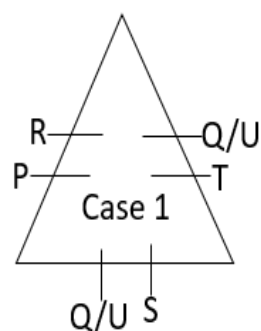

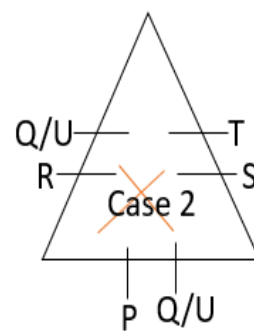

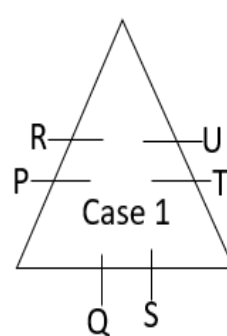

Only two persons sit between R and S. P sits second to the left of S. From these conditions, we get,

The number of persons sitting between R and S is the same as the number of persons sitting between T and P. Only two persons sit between Q and U.

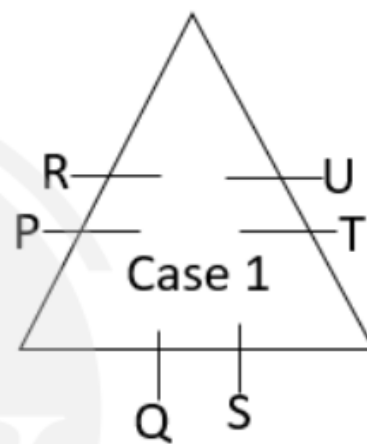

T sits immediate left of U and both sit on the same side of the triangle. From this condition Case, 2 gets rejected, and we get

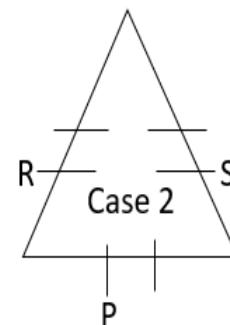

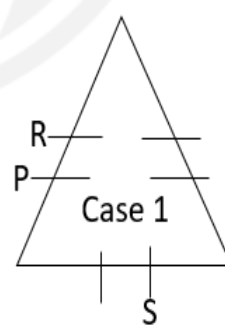

Hence, **No one sits between S and Q is true.**

Q22 Text Solution:

Final answer:

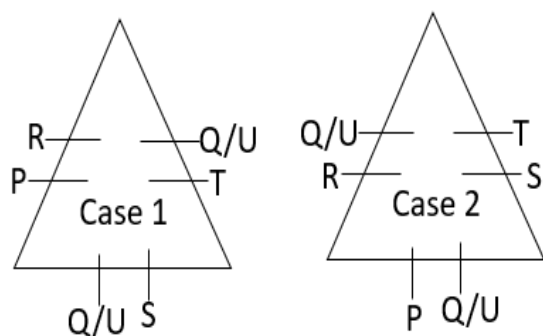

Only two persons sit between R and S. P sits second to the left of S. From these conditions, we get,

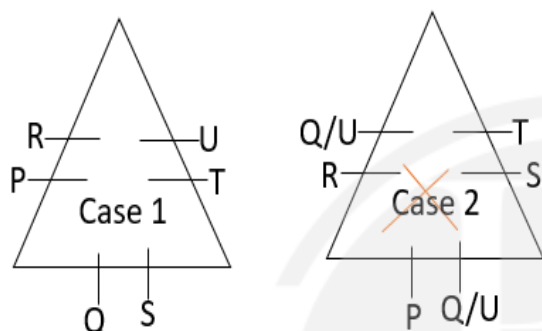

The number of persons sitting between R and S is the same as the number of persons sitting between T and P. Only two persons sit between Q and U.

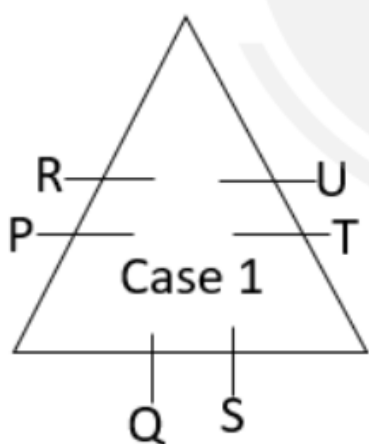

T sits immediate left of U and both sit on the same side of the triangle. From this condition Case, 2 gets rejected, and we get

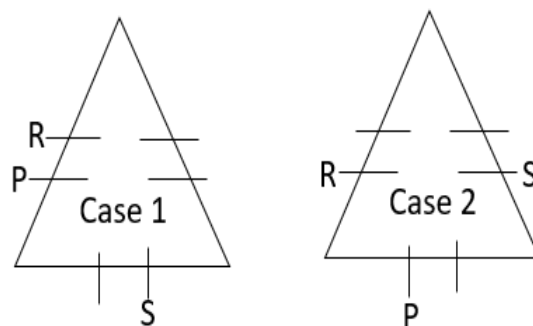

Hence, T sits second to the right of Q

Q23 Text Solution:

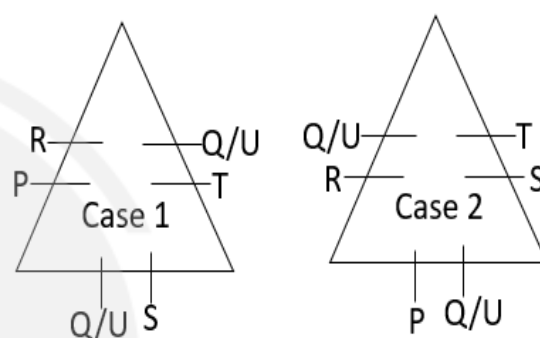

Final answer:

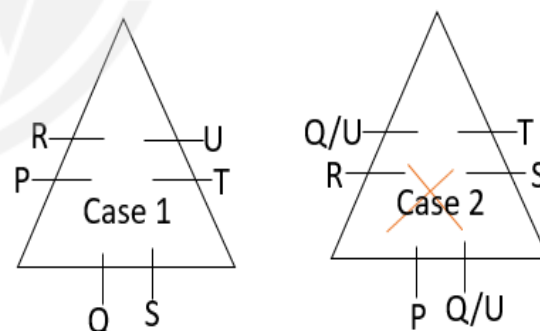

Only two persons sit between R and S. P sits second to the left of S. From these conditions, we get,

The number of persons sitting between R and S is the same as the number of persons sitting between T and P. Only two persons sit between Q and U.

T sits immediate left of U and both sit on the same side of the triangle. From this condition Case, 2 gets rejected, and we get

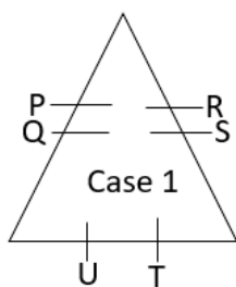

Hence, R sits immediate left of the one who is second to the right of U.

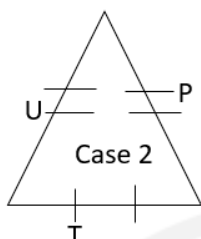

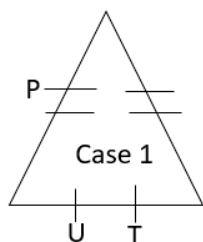

Q24 Text Solution:

Final answer:

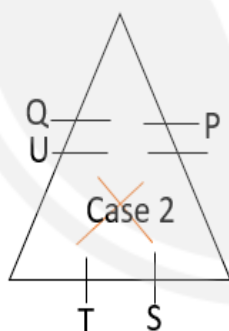

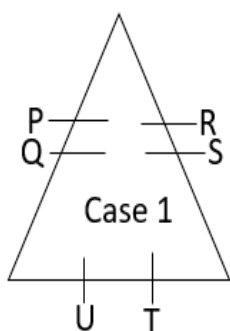

P sits third to the left of T, who is immediate right of U. From these conditions, we get,

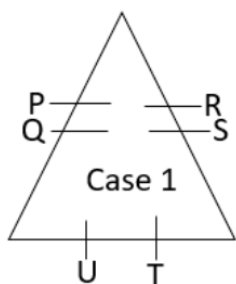

The number of persons sitting between U and P is the same as the number of persons sitting between P and S. Q sits second to the left of T. Both R and S sits on the same side of the triangular shape. From this condition Case, 2 gets rejected, and we get

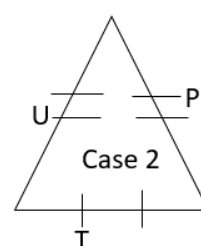

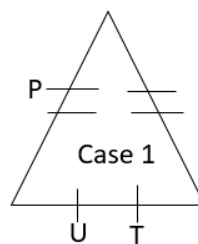

Hence, in all options, both persons sit adjacent to each other except option B.

Q25 Text Solution:

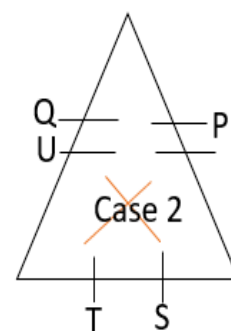

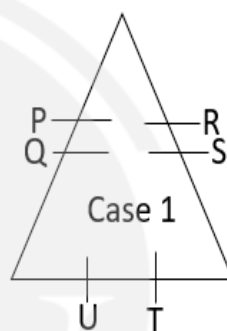

Final answer:

P sits third to the left of T, who is immediate right of U. From these conditions, we get,

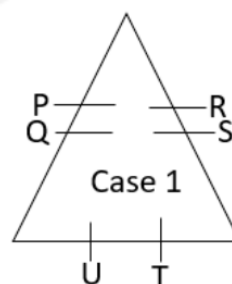

The number of persons sitting between U and P is the same as the number of persons sitting between P and S. Q sits second to the left of T. Both R and S sits on the same side of the triangular shape. From this condition Case, 2 gets rejected, and we get

Hence, one person sit between S and U, when counted from the right of U

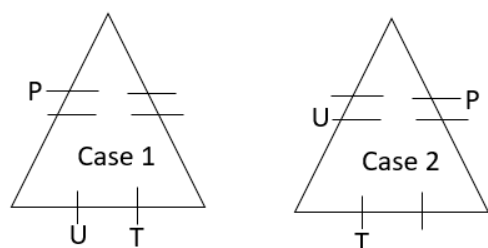

Q26 Text Solution:

Final answer:

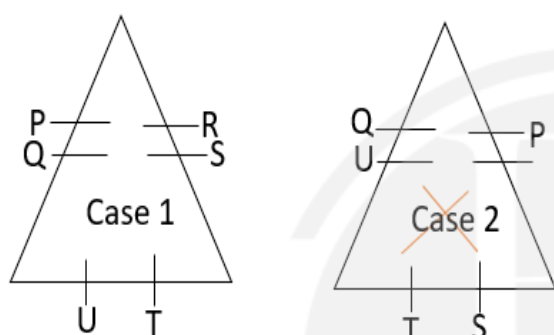

P sits third to the left of T, who is immediate right of U. From these conditions, we get,

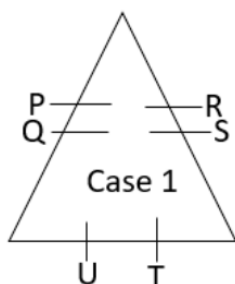

The number of persons sitting between U and P is the same as the number of persons sitting between P and S. Q sits second to the left of T. Both R and S sits on the same side of the triangular shape. From this condition Case, 2 gets rejected, and we get

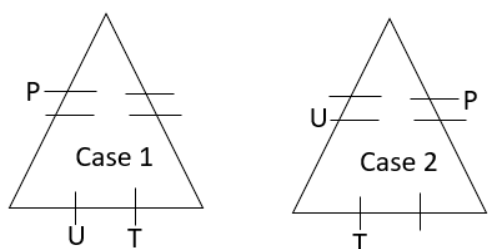

Hence, R sits to the immediate right of S is true.

Q27 Text Solution:

Final answer:

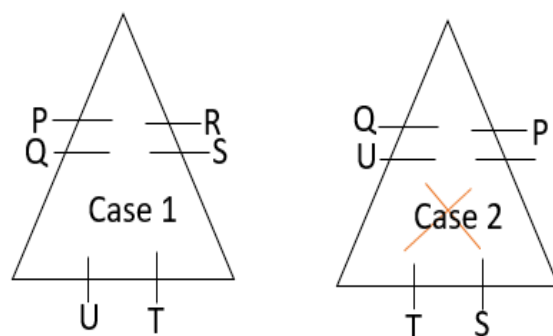

P sits third to the left of T, who is immediate right of U. From these conditions, we get,

The number of persons sitting between U and P is the same as the number of persons sitting

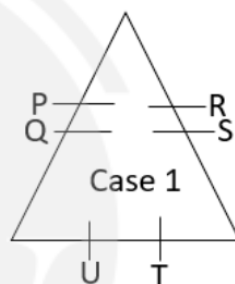

between P and S. Q sits second to the left of T. Both R and S sits on the same side of the triangular shape. From this condition Case, 2 gets rejected, and we get

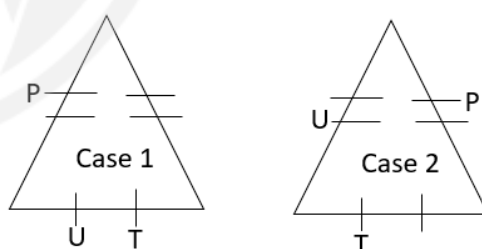

Hence, Q sits second to the right of R

Q28 Text Solution:

Final answer:

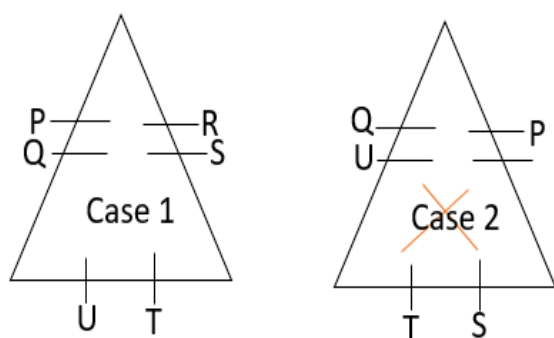

P sits third to the left of T, who is immediate right of U. From these conditions, we get,

The number of persons sitting between U and P is the same as the number of persons sitting between P and S. Q sits second to the left of T. Both R and S sits on the same side of the triangular shape. From this condition Case, 2 gets rejected, and we get

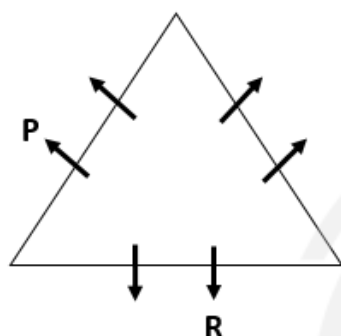

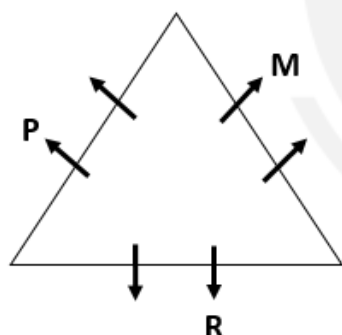

Hence, U sits immediate left of T

Q29 Text Solution:

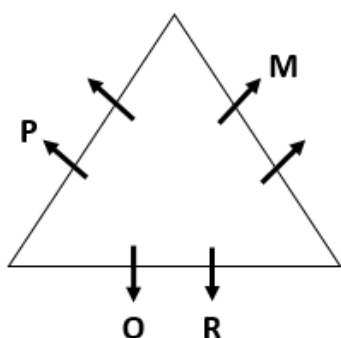

P sits fourth to the left of R.

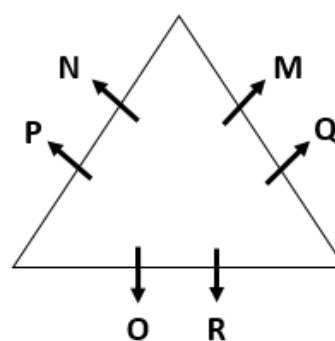

There are three people sitting between P and M.

There are two people sitting between M and O.

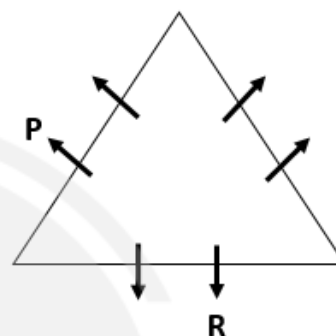

N sits fourth to the right of Q.

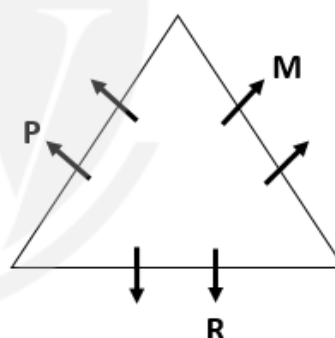

Q30 Text Solution:

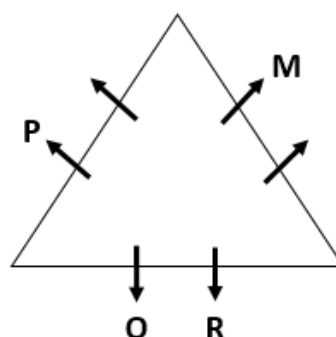

P sits fourth to the left of R.

There are three people sitting between P and M.

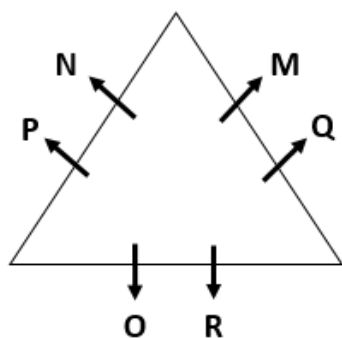

There are two people sitting between M and O.

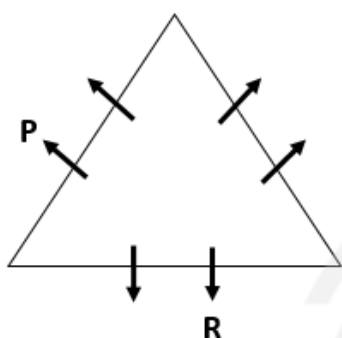

N sits fourth to the right of Q.

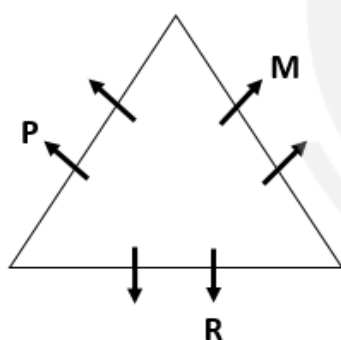

Q31 Text Solution:

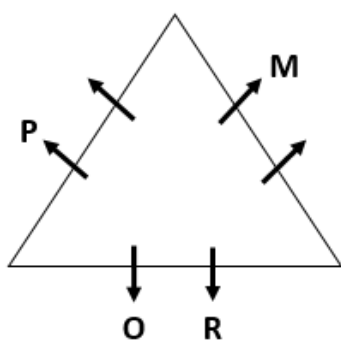

P sits fourth to the left of R.

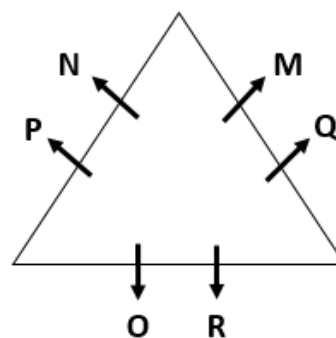

There are three people sitting between P and M.

There are two people sitting between M and O.

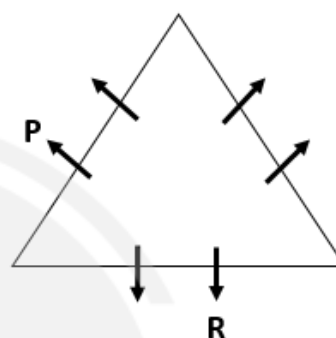

N sits fourth to the right of Q.

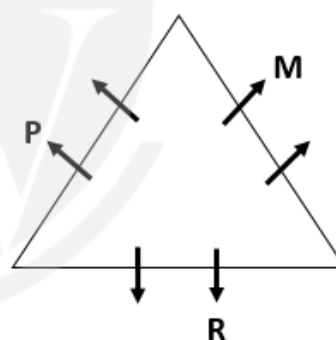

Q32 Text Solution:

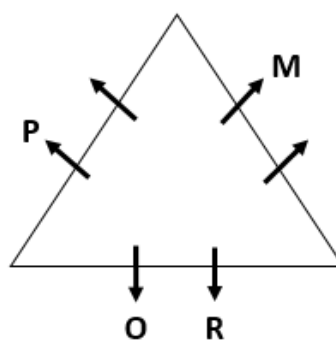

P sits fourth to the left of R.

There are three people sitting between P and M.

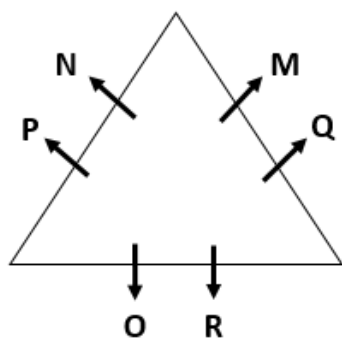

There are two people sitting between M and O.

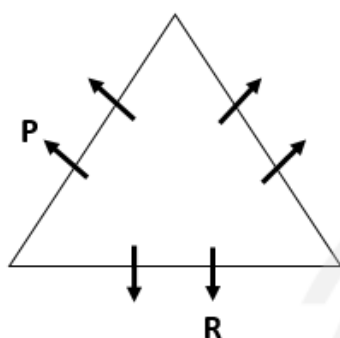

N sits fourth to the right of Q.

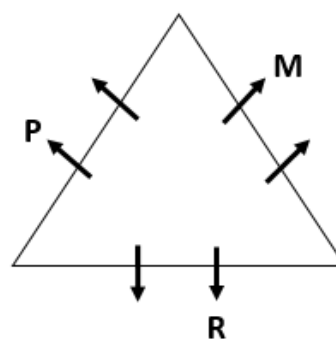

**Q33 Text Solution:**

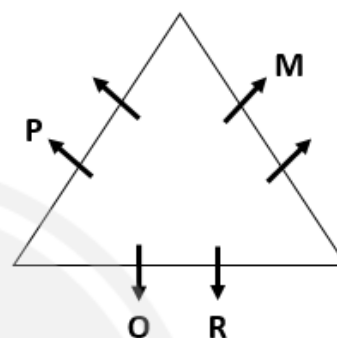

P sits fourth to the left of R.

There are three people sitting between P and M.

There are two people sitting between M and O.

N sits fourth to the right of Q.
